

HEDGE FUND TREND MONITOR

Flat beta, volatile alpha

In this report we analyze the holdings of 1,029 hedge funds with \$4.4 trillion of gross equity positions at the start of 1Q 2026 (\$2.9 trillion long and \$1.5 trillion short).

US equity hedge funds have generated a +1.5% return in what has been a deceptively challenging environment so far this year. Despite a flat headline S&P 500 return, sharp intra-market rotations have created volatility for many of the most popular long and short hedge fund positions. Our Hedge Fund VIP list ([GSTHHVIP](#)) of the most popular long positions has returned +3% YTD while a basket of most concentrated shorts ([GSCBMSAL](#)) has returned +9% YTD.

As a result of the rotational volatility, hedge funds have trimmed gross leverage from record levels and turned over portfolio positions at the highest rate since 2021. Despite the recent reduction, gross leverage remains near record highs. Similarly, short interest in the median S&P 500 stock continues to rank near the highest level in recent years, particularly in small-caps and defensive sectors. Concentration within hedge fund portfolios and crowding across portfolios also remain elevated relative to history.

Prescient rotations toward cyclical and from Software to Semis have supported hedge fund returns this year. Hedge funds last quarter increased their overweights to Energy, Materials, and Industrials, which rank as the best-performing sectors YTD. BA and GEV joined our Hedge Fund VIP list of the most popular long positions this quarter. CLF, ETN, ITT, and SEE ranked on our list of Rising Stars with the largest increases in hedge fund popularity. Within Info Tech, funds lifted Semis to a 9% weight in long portfolios, exceeding Software's weight (7%) for the first time since 2018. AMAT, MU, NVDA, and TER ranked as Rising Stars while CRM and DOCU ranked as Falling Stars.

5 key points from the Goldman Sachs Hedge Fund Trend Monitor

This Hedge Fund Trend Monitor analyzes 1,029 hedge funds with \$4.4 trillion of gross equity positions (\$2.9 trillion long and \$1.5 trillion short). Our analysis of positions at the start of 2026 is based on 13-F filings as of February 18, 2026.

- 1. PERFORMANCE: Hedge funds have returned +1.5% through February 19th amid choppy intra-market rotations.** The most popular hedge fund long positions have traded sideways while a sharp short squeeze in January weighed on fund returns. Our Hedge Fund VIP list of the most popular long positions (ticker: [GSTHHVIP](#)) has returned +3% YTD, lagging the equal-weight S&P 500 (+6%) and a basket of the most concentrated shorts ([GSCBMSAL](#), +9%).
- 2. LEVERAGE AND SHORT INTEREST: Fundamental hedge fund gross leverage remains near record highs while net leverage registers close to 5-year average levels.** GS Prime Services data show that fundamental long/short equity hedge fund gross and net leverage rank in the 99th and 63rd percentiles vs. the last five years. The median S&P 500 stock carries short interest equivalent to 2.7% of market cap, below its recent peak but still close to the highest level in recent years. Short interest is particularly elevated in small-caps and defensive sectors, with levels for Consumer Staples and Health Care near 30-year highs. [Exhibit 11](#) contains a list of the stocks with the largest recent increases in short interest YTD.
- 3. HEDGE FUND VIPS: The mega-cap tech stocks remain the most popular hedge fund long positions.** AMZN, NVDA, MSFT, GOOGL, and META remain the top five stocks in our Hedge Fund VIP list, followed by TSM, AAPL, and AVGO. This quarter TSLA rejoined the list after dropping out last quarter. The VIP list contains the 50 stocks that appear most often among the top 10 holdings of fundamental hedge funds. The basket has outperformed the S&P 500 in 60% of quarters since 2001 with an average quarterly excess return of 54 bp. 19 new constituents: AMAT, ASML, BA, C, CFLT, CORZ, DASH, EA, EXAS, GEV, JPM, LITE, NU, RKT, RNA, SE, SN, TPB, TSLA ([Exhibit 28](#)).
- 4. TECH ROTATIONS: Hedge funds rotated within Info Tech, moving to Semis from Software ahead of this year's Software selloff.** Funds entered 2026 carrying a record long portfolio weight in Semiconductors and the lowest weight in Software since 2019. Similarly, GS Prime Services data show hedge funds slashing Software net exposures in recent weeks to the lowest levels in over a decade. At the stock level, AMAT and ASML joined the Hedge Fund VIP list, and TSM ranks among the top 10 VIPs. AMAT also ranked among our list of Rising Stars with the most popular increases in ownership, along with MU, NVDA, and TER. In contrast, software stocks CRM and DOCU screened as Falling Stars with the largest declines in hedge fund ownership.
- 5. CYCLICALS: Hedge funds have rotated toward "old economy" cyclical sectors.** Funds bought Industrials, Materials, and Energy at the expense of Health Care and Communication Services. Funds entered 2026 with the largest overweight in Industrials on record (+734 bp relative to the Russell 3000). In contrast, funds carry a record underweight in Communication Services. The move away from Health Care

has been concentrated in Biotech, with BRKR, HALO, REGN, and RGEN ranking as Falling Stars this quarter.

Performance, leverage, and short interest

Equity hedge fund returns have been resilient to start the year amid sharp intra-market rotations. Based on estimates from GS Prime Services, US equity long/short funds have returned +1.5% YTD through February 19th. Our Hedge Fund VIP basket of the most popular hedge fund long positions (ticker: GSTHHVIP) has returned +3% YTD, compared with +6% for the equal-weight S&P 500 and +9% for a basket of stocks with the most concentrated short interest (GSCBMSAL).

Exhibit 1: US equity hedge funds have returned 1.5% YTD
as of February 19, 2026

Hedge fund performance estimate represents a weighted average of fund performance derived from aggregated Goldman Sachs Prime Services client positions for an anonymized basket of Equity Long/Short funds.

Source: FactSet, Goldman Sachs FICC and Equities, Goldman Sachs Global Investment Research

Hedge fund long positions have been caught between a factor rotation from Growth to Value and a rally in Momentum. Hedge Fund VIPs have been positively correlated with Growth and Momentum and negatively correlated with Value. While our long/short Momentum factor has returned +10% YTD, our long/short Growth factor has declined by -3% and Value has returned +7% YTD. We expect the recent Value outperformance will continue.

Exhibit 2: Hedge Fund VIPs are positively correlated with Growth and Momentum

Source: Goldman Sachs Global Investment Research

Exhibit 3: Value has recently outperformed sector-neutral Growth and Value factors

Source: Goldman Sachs Global Investment Research

Volatility in concentrated short positions has also been challenging for hedge fund returns. A basket of the most concentrated short positions (GSCBMSAL) squeezed higher by more than 20% during the first three weeks of the year, and the basket's recent volatility has registered the highest level since last year's tariff shock.

Exhibit 4: Realized volatility in the most concentrated short positions has recently spiked

Source: Goldman Sachs Global Investment Research

The most concentrated short positions have outperformed popular longs in 6 of 11 sectors YTD. Concentrated shorts have declined outright YTD in Communication Services, Info Tech, and Financials.

Exhibit 5: The recent short squeeze has affected nearly every sector

Source: Goldman Sachs Global Investment Research

Amid a volatile backdrop for alpha and little tailwind from market beta, hedge funds have recently trimmed gross leverage from record levels. Although gross leverage for fundamental L/S hedge funds remains extremely elevated relative to history, [GS Prime Services data](#) show funds have cut gross leverage by 9 pp MTD, one of the sharpest monthly declines on record. Net leverage for fundamental equity hedge funds remains close to 5-year averages.

Exhibit 6: Fundamental hedge fund gross and net leverage

Aggregated data from Goldman Sachs Prime Services as of 19-Feb-26; should not be relied upon as a comprehensive view of the market

Source: Goldman Sachs FICC and Equities, Goldman Sachs Global Investment Research

Exhibit 7: Hedge fund leverage relative to recent history

Aggregated data from Goldman Sachs Prime Services as of 19-Feb-26; should not be relied upon as a comprehensive view of the market

GS Prime Services hedge fund leverage and percentile ranks vs. history

	Overall universe	Fundamental long/short
Net leverage	81%	56%
1-year %ile	83%	68%
5-year %ile	78%	63%
Gross leverage	307%	222%
1-year %ile	97%	97%
5-year %ile	99%	99%

Source: Goldman Sachs FICC and Equities, Goldman Sachs Global Investment Research

Mirroring gross leverage, short interest has recently dipped slightly but remains at very elevated levels. The median S&P 500 stock carries short interest equivalent to 2.7% of market cap, which ranks in the 84th percentile since 1995 and the 97th percentile relative to the last five years. However, perhaps as a lesson from recent short squeezes, there is little evidence today of extremely concentrated short interest at a single stock level relative to history.

Exhibit 8: The median S&P 500 stock carries elevated short interest

Source: FactSet, Goldman Sachs Global Investment Research

Within the market, short interest remains most elevated relative to history in defensive sectors. Short interest is close to 30-year highs in Consumer Staples and Health Care. Elevated short interest is likely one driver of Consumer Staples' +13% YTD return.

Exhibit 9: Short interest is most elevated vs. history in defensive sectors**Median stock short interest as share of market cap**

Sector	Current	Average since 1995	%ile rank vs. history	Last 3m change
Consumer Staples	3.9%	2.0%	99%	0.7 pp

AI disruption and Tech rotation

Hedge funds rotated from Software towards Semis ahead of this year's Tech rotations. Software stocks have recently plunged by more than 30% due to the industry's perceived AI disruption risk. Hedge funds entered 2026 with the most elevated long portfolio weight in Semis on record, exceeding the weight of Software for the first time since 2018. Data from GS Prime Services shows the lowest hedge fund net exposure to Software in data history since 2016, although funds remain net long the industry.

Exhibit 16: Hedge funds increased long exposure to Semis and cut exposure to Software

Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 17: Hedge funds have recently slashed exposure to Software

Aggregated data from Goldman Sachs Prime Services as of 11-Feb-26; should not be relied upon as a comprehensive view of the market

Source: Goldman Sachs Prime Services, Goldman Sachs Global Investment Research

Exhibit 18 below lists the Software stocks with the largest changes in hedge fund popularity during 4Q. The table below compares the number of funds establishing new positions or adding to existing positions in each stock versus the number of funds trimming or dropping their positions altogether. Although funds cut positions on net in APP, it remains a Hedge Fund VIP. CRM and DOCU ranked among our list of Falling Stars with the most popular decreases in ownership across the full universe of hedge fund portfolios in our analysis. No Software stock ranked as a Rising Star, while four Semiconductor stocks, AMAT, MU, NVDA, TER, joined the list.

Exhibit 18: Software stocks with the largest net increases and decreases in hedge fund popularity during 4Q 2025**Most popular INCREASES in SOFTWARE based on # of funds changing portfolio allocation during 4Q 2025**

Despite the volatility of Software, MSFT continues to rank among the stocks at the top of our Hedge Fund VIP list of the most popular long positions. Across the Magnificent 7, funds added on net to AMZN, NVDA, and TSLA while cutting positions in META. Hedge fund buyers and sellers roughly offset for GOOGL, MSFT, and AAPL.

Sector positions

Industrials was the largest “overweight” relative to the Russell 3000 (+734 bp) and 16% of total net exposure. Information Technology was the largest hedge fund net sector weight at the start of 2026 (18% of total net exposure) but the largest “underweight” relative to the Russell 3000 (-1,287 bp).

Exhibit 20: Hedge fund sector allocations relative to the Russell 3000 and large-cap mutual funds

holdings as of December 31, 2025

Sector	Aggregate hedge fund asset allocation				vs. Russell 3000		Mutual funds
	Long portfolio (\$2.9 tn)	Short portfolio (\$1474 bn)	Allocation difference	Net weight	Russell 3000 weight	Hedge fund net tilt	Average large-cap fund tilt

The Hedge Fund VIP List: “The stocks that matter most”

Our Hedge Fund VIP list (ticker: GSTHHVIP) contains the top long positions of fundamentally-driven hedge funds. These “stocks that matter most” are the positions that appear most frequently among the top 10 holdings within hedge fund portfolios. For this analysis, we limit our universe to hedge funds with 10 to 200 distinct equity positions in an attempt to isolate fundamentally-driven investors from quantitative funds or funds that mirror private equity investments.

From an implementation standpoint, the Hedge Fund VIP list represents a tool for investors seeking to “follow the smart money” based on 13-F filings. By construction, the VIP list identifies the 50 stocks whose performance will largely influence the long side of many fundamentally driven hedge funds.

The Hedge Fund VIP basket has outperformed the S&P 500 YTD (+3% vs. +1%) and has outperformed the S&P 500 in 60% of quarters since 2001. The basket has been a strong historical performer at the cost of high volatility.

Our Hedge Fund VIP basket is not sector-neutral to the S&P 500. The VIP list contains stocks from 10 of the 11 sectors, with Real Estate absent. Info Tech (36%) represents the largest weight in the basket.

Turnover for the basket during 4Q 2025 was above the historical average, with 19 new stocks entering the list (38%). New constituents are listed in bold in [Exhibit 28](#).

Exhibit 27: Hedge fund VIPs have outperformed by 54 bp on average each quarter since 2001 (99 quarters)

The most concentrated hedge fund positions

Since 2001, the strategy of buying the 20 most concentrated S&P 500 stocks has outperformed the broad index in 59% of quarters, with an average quarterly excess return of 142 bp per quarter. We define “concentration” as the share of market capitalization owned in aggregate by hedge funds. The High Concentration basket is not sector-neutral to the S&P 500, and the stocks tend to be mid-caps, at the lower end of the S&P 500 capitalization distribution.

Six new High Concentration basket stocks this quarter: AKAM, CPT, CVNA, KVUE, NSC, SNDK.

Rising and falling stars

Changes in hedge fund popularity can be signals for future stock performance.

Historically, stocks with the largest increase in the number of hedge fund investors (“Rising Stars”) have typically gone on to outperform sector peers during the quarters following their rise in popularity. “Falling Stars” with the largest decline in owners have subsequently underperformed peers on average. For details, see [Hedge Fund Trend Monitor, Nov. 2018](#).

The tables below show our new lists of Rising and Falling Stars based on the most recent position filings. No stock in these lists screened into the same list last quarter.

ETF ownership

The ETF share of hedge fund long portfolios increased during 4Q. The current share of 4.7% rivals positions in 2024 as the highest since the GFC.

The \$255 billion of ETF shorts accounts for 65% of gross hedge fund ETF exposure. Funds use ETFs more as hedging tools than as directional investments. In contrast, single-stock shorts constitute just 32% of gross single-stock positions.

Appendix A: Hedging the Hedge Fund VIP List

Our Very Important Short Position list (ticker: **GSTHVISP) is designed as a short hedge for the Hedge Fund VIP List long portfolio.** The equal-weighted basket consists of 50 S&P 500 constituents with the highest total dollar value of short interest outstanding. The VISP basket excludes companies in our long VIP List and stocks with more than 10% of float-adjusted shares held short to allow for sufficient liquidity.

Constituents of this basket are not based on 13-F holdings and these are not stocks with the highest percentage of short interest. See Appendix B for screens of stocks with the largest outstanding short interest as a share of market cap.

Appendix D: Drawbacks of our hedge fund holding analysis

Data limitations

One weakness of our analysis is that it excludes any synthetic positions that hedge funds may create through the use of derivative contracts (options, swaps, futures).

Such financial instruments are not required to be disclosed in public filings.

We track both natural and leveraged long positions based on filings of hedge fund holdings. However, a hedge fund could offset a long position that we are able to monitor with a synthetic short position in options or futures on the underlying stock or an index of similar stocks that we currently are not able to monitor because the data on such trades and positions is not disclosed. These positions could either magnify or reduce the conclusions of our Hedge Fund Trend Monitor.

Lack of international holdings

Hedge funds are not required to include foreign holdings in their 13-F filings.

Consequently, our analysis may not capture all the long equity positions of hedge funds. While we do not believe this lack of data significantly affects our analysis of holdings by sector and capitalization size, we may overestimate the “density” of hedge fund portfolios.

Incomplete reporting of short positions

Our data is limited to publicly disclosed short interest statistics released by the exchanges. Only US broker-dealers are required to report short positions to these exchanges, so we miss any shorts held in overseas accounts. Swaps and other derivatives are also not captured in this analysis. We assume that hedge funds account for 85% of all short interest in the market and that the short side of hedge fund portfolios mirrors the overall short market in terms of sector allocation.

Timeliness

Another potential weakness of our analysis relates to the timeliness of the reported data. For example, the equity holdings for the 1029 hedge funds we studied were based on 13-F filings of positions owned as of December 31, 2025, although these filings were not made public until mid-February 2026.

Importantly, we believe our analysis of hedge fund holdings based on 13-F filings with 45-day delays is generally more reflective of actual current holdings than many market participants are inclined to believe.

Hedge fund holdings turnover is lower than most expect. On average, 73% of stocks that were in hedge fund portfolios on December 31, 2025 also appeared in portfolios on September 30, 2025. Because the overall holdings picture was surprisingly constant, we think it is reasonable to believe that the most recent holdings data remain relevant today.

Disclosure Appendix

Reg AC

We, Ben Snider, Jenny Ma, Ryan Hammond, Daniel Chavez, Kartik Jayachandran and Christophe Sung, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Basket disclosure

The ability to trade the basket(s) in this report will depend upon market conditions, including liquidity and borrow constraints at the time of trade.

Marquee disclosure

Marquee is a product of Goldman Sachs FICC and Equities. Any Marquee content linked in this report is not necessarily representative of GS Research views. Because the Marquee platform and third-party platforms (e.g., Bloomberg) are only permitted to reflect changes to these baskets after publication of this note, there will be a delay between the rebalancing of baskets in this note and when the changes to these baskets are reflected on such platforms. If you need access to Marquee, please contact your GS salesperson or email the Marquee team at gs-marquee-sales@gs.com.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: _____. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at _____. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: _____, and a copy of the annual audit

compliance report can be found at this link: _____. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: _____.

Russia: Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs

(Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at _____ which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, The Investment Trusts Association, Japan, and Japan Investment Advisers Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Global product; distributing entities

Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (_____).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at _____ and _____. Transaction

costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to _____.

Disclosure information is also available at _____ or from Research Compliance, 200 West Street, New York, NY 10282.
