## Initiation: mining the AI ASIC & CPO build-out

- Dominating customer ASICs and capturing spillover orders from CPUs
- Price hikes of MEMS probe cards and early-mover advantage in CPO
- Initiating our coverage with a Buy (1) call and 12M TP of TWD8,415

**Leon Chen**

**Investment case:** We initiate coverage of MPI, a global leader in semiconductor testing interfaces and automated test equipment (ATE), with a Buy (1) rating. We view MPI as a key beneficiary of the AI ASIC trend, given its near-exclusive relationships with major US cloud service providers (CSPs) for custom AI ASICs. It is also capturing orders for server CPUs, as overseas competitors face capacity bottlenecks.

**Technology transition to high-ASP MEMS.** Advanced nodes (3nm/2nm) and larger package sizes are driving pin counts above 40k+ per assembly. Micro-electro-mechanical system (MEMS) probe cards are priced 20-30% higher vs. vertical probe cards (VPC) and are fast becoming the preferred technology and is substantially expanding revenue per wafer test. We believe MEMS probe cards will become the standard testing interface across almost all ASIC platforms from 2027E, driving MPI's gross margin expansion from 59.7% to 63% over 2026-28E.

**Early mover in co-packaged optics (CPO) testing.** Leveraging its photonics automation (PA) and advanced semiconductor test (AST) divisions, MPI provides turnkey electro-optical wafer-level testing and automated systems across critical CPO nodes (Insertion 2 and 3). We expect CPO testing equipment shipments and revenue recognition for MPI to commence in 4Q26, contributing 4.8-9.2% of revenue in 2027-28E.

**Aggressive capacity expansion and vertical integration.** MPI plans to double its monthly VPC/MEMS pin capacity from 5.5m pins (end-2026) to 9.0m pins (end-2027). We believe execution of capacity expansion could outpace management guidance, driven by robust ASIC demand. Besides, the commissioning of its dedicated Hsinchu PCB facility (>50% internal self-sufficiency rate) compresses new product introduction (NPI) lead times and eliminates third-party mark-ups, insulating operating leverage.

**Catalysts:** 1) Price hikes driven by supply tightness and structurally increased ASPs; 2) better-than-expected capacity expansion; and 3) revenue recognition from CPO testing equipment.

**Valuation:** Given the structural shift to MEMS probe cards and the potential for CPO testing equipment, we initiate coverage of MPI with a Buy (1) rating and 12-month TP of TWD8,415, based on a target PER of 65x applied to our 4-quarter-forward EPS. Our valuation is supported by our EPS CAGR of 78% over 2026-28E.

**Risks:** 1) Competitive and pricing pressure; 2) AI/HPC slowdown could delay ramp-up; 3) slower-than-expected CPO commercialisation.

## How do we justify our view?

**Buy**  
(initiation)

Growth outlook

✓ ✓ ✓ ✓ ✓

Valuation

✓ ✓ ✓ ✓ ✓

Earnings revisions

✓ ✓ ✓ ✓ ✓

### Growth outlook

✓ ✓ ✓ ✓ ✓

We forecast MPI's revenue to deliver a 62% CAGR over 2026-28E, driven by strong AI ASIC demand, accelerating adoption of high-pin-count MEMS probe cards, capacity expansion and the commercial ramp-up of CPO testing equipment. We forecast gross margin to expand from 59.7% in 2026E to 63% in 2028E, on structural product mix upgrades, the ramp up in shipments of CPO test systems, and greater vertical integration following in-house PCB capacity expansion.

### MPI: revenue and gross margin outlook

Source: Company, Daiwa forecasts

### Valuation

✓ ✓ ✓ ✓ ✓

Our 12-month TP of TWD8,415 is based on a target PER of 65x, applied to our 4-quarter-forward EPS. Our valuation is supported by our 78% EPS CAGR over 2026-28E. Although the recent share-price pullback was triggered by management's relatively conservative 2H26 guidance, we view this as an attractive entry window for long-term investors. With more AI/HPC probe card pull-ins and capacity coming online, we see upside to management's guidance by year-end.

### MPI: 1-year-forward PER bands

Source: Bloomberg

### Earnings revisions

✓ ✓ ✓ ✓ ✓

Bloomberg consensus 2026-27E EPS estimates have gradually trended higher over the past year, likely reflecting stronger earnings visibility from the accelerated expansion of VPC and MEMS capacity and improving order visibility for CPO testing equipment. MPI is currently covered by 14 brokers, indicating broadening investor interest and growing market recognition of its multi-year AI and CPO growth prospects.

## Company profile

Founded in Hsinchu in 1995, MPI is a leading global probe card supplier offering CPC, VPC and MEMS solutions, alongside photonics, semiconductor and thermal testing equipment. Growth is driven by expanding AI/HPC demand, rising MEMS adoption, capacity expansion, deeper vertical integration and emerging opportunities in CPO testing.

## Scaling new heights in the AI ASIC & CPO era

### Dominance in AI accelerators

**Well positioned to capture growing AI ASIC probe card demand, benefiting from high switching costs and expanding production ramp ups**

Founded in 1995, MPI Corporation is a global leader in semiconductor testing interfaces and automated test equipment (ATE). Starting with cantilever probe cards (CPCs), MPI has now transitioned into advanced wafer-level testing. Per management, the probe cards business accounted for 68% of its total revenue in 2025. In addition, MPI is currently the world's No.1 vertical probe card (VPC) supplier, with a 31% global market share in terms of revenue according to Yole Intelligence and maintains near-exclusive supply relations with major US networking clients, per management. We believe this entrenched position directly links MPI to core custom AI ASIC projects across top-tier CSPs.

Global: non-memory probe card supplier ranking

Source: Techinsights

Global: non-memory probe card TAM

Source: Company, Daiwa forecasts

Benefiting from Taiwan's semiconductor manufacturing cluster, we believe MPI has maintained a high market share across these ASIC projects and is progressively becoming the exclusive supplier. As highlighted in our [Initiation: paradigm shift accelerated by AI](#) report, the test interface represents a minute fraction – typically less than 1-2% – of total COGS. Even with structural growth driven by ASP expansion, we believe the cost-to-value ratio remains relatively small. This is reinforced by high switching costs, as clients are highly price inelastic when yield insurance is at stake. Therefore, with more ASIC projects being developed and moving into mass production, we expect demand for probe cards is bound to grow and MPI has positioned itself at the centre of the AI megatrend.

Global: ASIC shipments

Source: Daiwa forecasts

In addition to its market-leading position in AI ASICs, we note that agentic AI is also driving a massive surge in compute requirements for server CPUs – such as NVIDIA Vera CPU and AMD EPYC – as well as high-performance graphics processors. Given the capacity bottlenecks faced by overseas probe card competitors such as FormFactor and Technoprobe, we believe MPI's local engineering support, rapid turn-around-time (TAT), and significant manufacturing scale have enabled it to capture substantial spillover orders across major global chipmakers and transfer to long-term business.

## MEMS upgrade and content expansion

**The migration towards advanced process nodes and larger AI packages is accelerating MEMS probe card adoption, driving both pin-content and ASP expansion**

Echoing our [Initiation: paradigm shift accelerated by AI](#), as custom AI accelerator architectures migrate towards 3nm and 2nm leading-edge semiconductor nodes accompanied by significantly larger package dimensions, pin counts are surging from several thousands to over 40k pins per probe card assembly, based on our channel checks. This structural rise in pin density and signal integrity requirements is rapidly driving a transition from traditional cobra needle architectures to ultra-fine-pitch MEMS probe cards. We expect MEMS probe cards to be adopted across nearly all AI GPU and ASIC platforms from 2026.

In addition, MEMS probes command a superior ASP of c.USD13-15 per pin, representing a 20-30% premium vs. conventional VPC needles (USD10-13 per pin), which substantially expands the total dollar content per silicon wafer test, per our channel checks. As testing interface expenditure represents less than 1% of total chip manufacturing costs, we believe hyper-scaler customers prioritise test reliability over price and demonstrate extremely high vendor stickiness once a supplier is qualified.

Leveraging its vertical integration model encompassing probe design, ceramic substrate fabrication and automated assembly, MPI delivers uncompromised contact stability and yield preservation. We believe MPI's technical moat will fuel revenue growth in MEMS and VPC probe cards over our forecast horizon.

### Comparison between MEMS and traditional VPC

|                              | MEMS probe card                  | Traditional VPC                             |
|------------------------------|----------------------------------|---------------------------------------------|
| <b>Manufacturing</b>         | Lithography and microfabrication | Precision machining and mechanical assembly |
| <b>Minimum pitch</b>         | 35–45µm                          | 80-150µm                                    |
| <b>Pin-count scalability</b> | High; >20k probes                | Lower scalability at extreme densities      |

### Global: MEMS probe card adoption

Source: Daiwa forecasts

**MPI's photonics testing expertise & automation capabilities positions it as a key beneficiary of the emerging CPO testing ecosystem**

## Early mover advantage in CPO

As traditional copper interconnects reach their physical limits in bandwidth, latency and thermal dissipation, silicon photonics (SiPh), and co-packaged optics (CPO) have emerged as essential paradigm shifts for next-generation AI data centre networks. However, the commercial deployment of CPO architectures faces severe manufacturing bottlenecks, particularly in optical-electrical alignment precision and highly complex multi-stage testing protocols.

### CPO testing flow

Source: Teradyne

Combining decades of technical expertise across its Photonics Automation (PA) and Advanced Semiconductor Test (AST) divisions, MPI stands as one of the few global vendors capable of delivering fully integrated wafer-level electro-optical testing interfaces and automated test systems. MPI is strategically positioned across crucial CPO testing nodes, most notably Insertion 2 – performing double-sided electro-optical wafer-level testing on electro-photonics integrated circuits (EPIC) after hybrid bonding – and Insertion 3, which executes optical engine (OE)-level singulated die and module testing.

As foundry leaders such as TSMC ramp their Compact Universal Photonic Engine (COUPE) architecture and primary CSP CPO projects into qualification and volume production through 2026 and 2027, MPI is uniquely positioned to capture dual revenue streams. We believe testing equipment for Insertion 3 will start ramping up and contributing to revenue from 4Q26. In addition, while testing equipment for Insertion 2 is currently undergoing customer qualification, we expect its commercial adoption to pick up momentum as wafer-level optical integration scales in 2Q27.

Backed by strong ecosystem partnerships with ATE leader Advantest and metrology powerhouse Keysight, we believe MPI is uniquely positioned to capture strong tailwinds. Furthermore, we highlight that MPI's ability to bundle automated optical testing equipment with CPO-dedicated probe cards as a turnkey solution creates a compelling value proposition. We believe this integrated offering establishes a powerful second growth pillar for the company, providing multi-year earnings visibility and supporting a long-term valuation premium. We expect CPO testing equipment to account 4.8% of MPI's total revenue in 2027E and 9.2% in 2028E.

### MPI: CPO testing equipment revenue growth

Source: Company, Daiwa forecasts

### MPI's aggressive capacity expansion and PCB vertical integration support long-term AI ASIC and CPO growth

### Capacity expansion to capture the AI megatrend

To satisfy booming global demand for AI chip testing, MPI is deploying the largest capex and capacity expansion strategy in its corporate history. Management projects the company's monthly production capacity for VPC and MEMS probe pins to double from 5.5m pins by end-2026 to 9.0m pins by end-2027, underscoring exceptional long-term order visibility and customer commitments. While its headline monthly revenue has yet to return to prior peaks – partly due to revenue-recognition timing lags that keep management's tone conservative – we expect capacity additions to track ahead of official guidance over our forecast horizon, paving the way for the upcoming ASIC ramp cycle. Furthermore, we expect 2028 capacity to outpace 2027 levels, driven by robust demand from AI ASICs and the commercial mass production of CPO.

Furthermore, MPI's newly commissioned, dedicated probe-card PCB facility in Hsinchu targets an internal PCB self-sufficiency rate of over 50%. This vertical integration breakthrough successfully resolves the industry-wide bottleneck in external substrate procurement. By controlling substrate production in-house, MPI can not only dramatically compresses New Product Introduction (NPI) lead times for tier-one clients but also eliminate third-party component margin markups. Consequently, this strategic buildout acts as a primary catalyst insulating operating leverage and driving corporate gross margins towards the landmark 60%+ threshold.

### MPI: capacity expansion plan

## Financial analysis

### Revenue growth over 2026-28E

**We expect AI ASIC ramp ups and the commercialisation of CPO testing equipment to drive MPI's next multi-year growth cycle**

Driven by soaring hyperscaler demand for custom AI ASICs and equipment demand for CPO testing, we believe MPI is embarking on a multi-year revenue growth trajectory. We forecast CPC/PC probe card revenue to increase from TWD9.1bn in 2025 to TWD47.1bn in 2028E. With improved execution on capacity expansion, we believe the original capacity expansion plan could be completed ahead of schedule, potentially before the targeted end-2027 completion date. On the other hand, we believe CPO testing equipment will start shipping to clients, recognising revenue in 4Q26 (some may defer to 1Q27). Therefore, we forecast total revenue to increase from TWD13.4bn in 2025 to TWD61.5bn in 2028E, representing 2026-28E top-line CAGR of 62%.

Source: Company, Daiwa forecasts

**Structural AI ASIC demand, CPO testing adoption, and greater vertical integration are expected to support further margin expansion**

## Gross margin growth over 2026-28E

MPI's gross margin significantly improved from 47.8% in 2024 to all-time high of 59.5% in 1Q26, driven by structural demand from AI ASICs. Although gross margin slightly fell to 58.4% in 2Q26, management expects it to recover to 59.5% in 3Q26, with better product mix and price hikes. We forecast MPI's gross margin to expand steadily from 59.7% in 2026E to 63% in 2028E, underpinned by structural product-mix upgrades and enhanced vertical integration. In our view, primary tailwinds include rising penetration of high-ASP MEMS probe cards, the commercial ramp-up in shipments of automated CPO test systems, and 2027 commissioning of MPI's dedicated Hsinchu PCB facility, which targets an internal self-sufficiency rate above 50% to eliminate third-party substrate mark-ups.

### MPI: gross margin

Source: Company, Daiwa forecasts

## Operating leverage profile

We forecast top-line revenue to expand several-fold over 2026-28E, but operating expense ratios (SG&A ratio: 59%/44% in 2025/2028E; R&D ratio: 26%/31% in 2025/2028E) to decline sharply, triggering a steep expansion in operating margin from 36.8% in 2026E to 46.1% by 2028E. In addition, as the internal self-sufficiency rate improves, we believe this operating leverage will allow operating profit growth (82% CAGR in 2026-28E) to significantly outpace top-line revenue growth over our forecast period.

### MPI: operating margin trend and forecasts

Source: Company, Daiwa forecasts

## Balance sheet and cash flow

As top-tier CSPs accelerate AI ASIC deployments, we expect MPI's operating cash inflows to expand multi-fold, providing substantial financial flexibility to fund aggressive expansion without straining liquidity. We note that working capital cycles remained healthy; despite revenue scaling rapidly over the past few years, inventory turnover days are well managed due to MPI's high vertical integration and precise supply-chain control over core probe card raw materials and substrates.

**MPI: inventory and days of inventory trend and forecasts**

Source: Company, Daiwa forecasts

To support unprecedented order visibility, MPI is executing the largest capital expenditure plan in its history. Despite elevated capital outlays during the company's proposed 2026-27 capex peak, we believe net profit growth (with a 2026-28E EPS CAGR of 78%) will generate powerful operating cash flows. This would lead to free cash flow rapidly expanding, covering capex requirements while maintaining a sustainable dividend payout ratio of c.66% and an attractive ROE of 60%+ over 2027-2028E.

## Valuation and recommendation

### Initiating coverage with a Buy (1) rating

**We initiate coverage of MPI with a Buy (1) rating on AI ASIC projects ramp-up**

Given the structural shift in MEMS probe card and the potential of CPO testing equipment, we initiate coverage of MPI with a Buy (1) rating and 12-month TP of TWD8,415. Our TP is based on a target PER of 65x applied to our 4-quarter-forward EPS. Our valuation is supported by our 2026-28E EPS CAGR of 78%.

Following the company's 2Q26 earnings call, the market experienced a short-term pullback primarily triggered by management's relatively conservative 2H26 guidance. However, we view this as an attractive entry window for long-term investors. In our view, the muted outlook reflects management's customary prudence and capacity lead-time constraints rather than softening end-demand. With more AI/HPC probe card pull-ins and capacity coming online, we see clear upside potential to beat management guidance by year-end. We believe MPI's structural story remains intact.

### Risks to our call

- Competitive and pricing pressure – primary risk:** Continued investment by global and regional probe card suppliers could intensify competition for key design wins, constrain MPI's market-share expansion and place pressure on pricing and margins in high-end applications.
- AI/HPC demand concentration – secondary risk:** MPI's growth remains highly exposed to hyperscaler capex and AI chip roadmaps. Any moderation in infrastructure spending or platform delays could slow project ramp-ups, defer revenue recognition and reduce earnings visibility.
- CPO commercialisation risk – secondary risk:** CPO testing remains at an early stage, with significant technical, qualification and ecosystem coordination requirements. Slower-than-expected industry adoption could delay MPI's anticipated revenue contribution and weaken its medium-term growth outlook.

## Appendix

**MPI is a leading global probe card supplier with a vertically integrated model and broad exposure to AI, HPC and emerging CPO testing applications**

### Company introduction

Founded in Hsinchu in 1995, MPI initially focused on cantilever probe cards before broadening its portfolio through organic development and acquisitions. It became Taiwan's first publicly listed probe card company in 2003 and has since established itself as one of the world's leading probe card suppliers.

MPI offers a full spectrum of CPC, VPC and MEMS probe cards. Its equipment businesses also provide photonics automation, advanced semiconductor testing and extreme-temperature thermal solutions. The company serves a diversified customer base spanning leading IC design vendors, as well as major foundries and OSATs.

MPI's key competitive advantage lies in its vertically integrated manufacturing model, with probes and substrates produced in-house and high-layer PCB capacity currently being expanded. This structure enhances design flexibility, strengthens supply-chain control and shortens delivery lead. Combined with its proximity to Taiwan's semiconductor ecosystem and early customer engagement, these capabilities position MPI to capture rising demand for AI/HPC probe cards and emerging CPO testing solutions.

### Shareholder structure

MPI's shareholder base is relatively diversified, with no single shareholder holding a controlling stake. The largest shareholder, Wang Hsi Investment Co., Ltd., owns c.8.5%, while other major holders include domestic pension funds and global institutional investors such as Vanguard, BlackRock, JPMorgan and Dresdner Bank. Notably, MPI has a high free float of c.73.6%, supporting strong trading liquidity and broad institutional participation.

## ESG analysis

### ESG risks

| Risks                                  | Management | Analyst comments                                                                                                                                                                                                                                                |
|----------------------------------------|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Executive/board quality                | 2          | MPI maintains a robust governance framework with an independent board, specialized committees, and regular ESG oversight to strengthen transparency, accountability, and long-term sustainability.                                                              |
| <b>G</b> Capital management            | 2          | The company follows a prudent financial strategy, balancing growth investments, R&D spending, and cash flow management to enhance long-term shareholder value.                                                                                                  |
| Related party & transaction            | 2          | MPI enforces strict conflict-of-interest and related-party transaction controls through board oversight, audit committee review, disclosure requirements, and recusal mechanisms to ensure transparency, fairness, and the protection of shareholder interests. |
| <b>S</b> Supply chain management       | 1          | MPI promotes responsible supply chain management through supplier assessments, ESG integration, sustainability audits, and ongoing engagement to enhance supply chain resilience.                                                                               |
| <b>E</b> Water & wastewater management | 2          | MPI implements water conservation and wastewater control measures, focusing on efficient resource utilization, pollution prevention, and sustainable water management practices.                                                                                |

*Note: Management score represents a company's ability to manage/benefit from certain ESG topics. The scores range from 1 to 3, with 1 being the strongest.*

Recipients of this research including non-customer recipients of this research shall not provide it to others or engage in any activities in connection with this research which may involve conflicts of interests. Neither Daiwa-Cathay Capital Markets Co., Ltd. nor its personnel who writes or reviews the research report has any conflict of interest in this research. Since Daiwa-Cathay Capital Markets Co., Ltd. does not operate brokerage trading business in foreign markets, **this research is prepared on a "without recommendation" to any foreign securities basis** and Daiwa-Cathay Capital Markets Co., Ltd. does not accept orders from customers to trade in such foreign securities. Recipients of this research shall carefully judge their own investment risk and take full responsibility for the results of any resulting investments in the companies and/or sectors featured in this research. Without the prior written permission of Daiwa-Cathay Capital Markets Co., Ltd., recipients of this research are prohibited from disclosing the research to the media, reprinting the research, or quoting from the research to other parties. Recipients of this research in Taiwan may contact Daiwa-Cathay Capital Markets Co., Ltd. in respect of any matter arising from or in connection with the research.

### **Thailand**

This research is distributed to only institutional investors in Thailand. This report is provided to you for informational purposes only. Information contained herein is not intended to be, and shall not be construed as, an offer or an invitation for subscription or purchase of securities in Thailand. This document has not been and will not be registered with, or approved by, the Office of the Securities and Exchange Commission of Thailand. As neither Daiwa Securities Group Inc. nor any of its subsidiaries or affiliates, nor any of the foregoing entities' respective directors, officers, servants and employees are licensed to carry on any securities business in Thailand, this document is intended to be read by the addressee who is an institutional investor only and may not be circulated or distributed, whether directly or indirectly, to the public or any members of the public in Thailand, unless to the extent permitted by applicable laws and regulations.

This report is prepared by analysts who are employed by Daiwa Securities Group Inc. and/or its non-U.S. affiliates. Neither Daiwa Securities Group Inc. nor any of its subsidiaries or affiliates, nor any of the foregoing entities' respective directors, officers, servants and employees accept any liability whatsoever for any direct or consequential loss arising from any use of this research or its contents.

The information and opinions contained herein have been compiled or arrived at from sources believed to be reliable. However, neither Daiwa Securities Group Inc. nor any of its subsidiaries or affiliates, nor any of the foregoing entities' respective directors, officers, servants and employees make any representation or warranty, express or implied, as to their accuracy or completeness. Expressions of opinion herein are subject to change without notice. The use of any information, forecasts and opinions contained in this report shall be at the sole discretion and risk of the user.

Daiwa Securities Group Inc., its subsidiaries and affiliates and their respective directors, officers, servants and employees may have positions and financial interest in securities mentioned in this research. Daiwa Securities Group Inc. and its subsidiaries and affiliates may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any entity mentioned in this research. Therefore, investors should be aware of conflict of interest that may affect the objectivity of this research.

### **United Kingdom**

These materials constitute independent research for the purposes of the Financial Conduct Authority ("FCA") Conduct of Business Rules. These materials have been produced by Daiwa Securities Co. Ltd ("DSCL") and/or its affiliates and are distributed by Daiwa Capital Markets Europe Limited ("DCME") to persons classified as (i) eligible counterparties; and (ii) professional clients for the purposes of the Conduct of Business Rules of the FCA. These materials should not be disseminated to any retail clients in the United Kingdom. DCME is authorised and regulated by the FCA and is a member of the London Stock Exchange. DCME's FCA registration number is 124490 and the FCA's registered address is 25 The North Colonnade, London, E14 5HS.

DCME makes no representation as to the completeness, accuracy or timeliness of any of the materials produced by DSCL, and does not accept any liability for any losses, costs, liabilities or expenses which may arise directly or indirectly from any use of, or reliance on the materials.

DCME and/or its affiliates may, from time to time, to the extent permitted by law, participate or invest in, or be mandated in respect of transactions with the issuer(s) referred to in the materials prepared by DSCL, perform services for or solicit business from such issuers, and/or have a position or effect transactions in a particular issuer's securities and/or may have acted as an underwriter during the past twelve months in respect of a particular issuer of its securities. DCME does not review DSCL's materials prior to publication on DCME's platforms and has no influence over its content. DCME has in place organisational arrangements for the prevention and avoidance of conflicts of interest, including information barriers to control the flow of information between the private

and public sides of the firm. A summary of DCME's conflict management policies are available at <http://www.uk.daiwacm.com/about-us/corporate-governance-regulatory>.

DSCL's materials are distributed by DCME only as permitted by law. The materials are not directed to, or intended for distribution to or use by, any person or entity located in any jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject DCME to any regulation or licensing requirement within such jurisdiction.

#### Germany

Research reports are produced by Daiwa Securities Co. Ltd. and/or its affiliates and are distributed by Daiwa Capital Markets Deutschland GmbH in the European Union. Daiwa Capital Markets Deutschland GmbH is authorised and regulated by Bundesanstalt für Finanzdienstleistungsaufsicht ("BaFin") under the reference number 149361. Daiwa Capital Markets Deutschland GmbH and its affiliates may, from time to time, to the extent permitted by law, participate or invest in, or be mandated in respect of, other financing transactions with the issuer(s) of the securities referred to herein (the "Securities"), perform services for or solicit business from such issuers, and/or have a position or effect transactions in the Securities or options thereof.

This publication is intended for investors who are Professional Clients or Eligible Counterparties in the European Union within the meaning of Directive 2014/65/EU ("MiFID II") and should therefore not be distributed to Retail Clients in the European Union.

Daiwa Capital Markets Deutschland GmbH has in place organisational arrangements for the identification, prevention and management of conflicts of interest. Information regarding our conflict management are available at: <https://www.de.daiwacm.com/policies/>

Additional disclosures regarding specific company names and related financial instruments are available at: <https://daiwa3.bluematrix.com/sellside/Disclosures.action>.

#### Bahrain

This research material is distributed in Bahrain by Daiwa Capital Markets Europe Limited, Bahrain Branch, regulated by The Central Bank of Bahrain and holds Investment Business Firm – Category 2 license and having its official place of business at the Bahrain World Trade Centre, South Tower, 7th floor, P.O. Box 30069, Manama, Kingdom of Bahrain. Tel No. +973 17534452 Fax No. +973 535113

#### United States

This research is distributed into the United States directly by Daiwa Capital Markets Hong Kong Limited (DCMHK) and in certain cases indirectly by Daiwa Capital Markets America Inc. (DCMA), a U.S. Securities and Exchange Commission registered broker-dealer and FINRA member firm, exclusively to "major U.S. institutional investors", as defined under Rule 15a-6 promulgated under the U.S. Securities Exchange Act of 1934, as amended, and as interpreted by the staff of the U.S. Securities and Exchange Commission (SEC). Where this is co-branded research published by Daiwa's partners in collaboration with other parties not affiliated with Daiwa, this research is distributed in the United States by DCMHK only. This report is not an offer to sell or the solicitation of any offer to buy securities. U.S. customers wishing to effect transactions in any designated investment discussed in this report should do so through a qualified salesperson of DCMA. Non-U.S. customers wishing to effect transactions in any designated investment discussed in this report should contact a Daiwa entity in their local jurisdiction. The securities or other investment products discussed in this report may not be eligible for sale in some jurisdictions.

Analysts employed outside the U.S., as specifically indicated elsewhere in this report, are not registered as research analysts with FINRA. These analysts may not be associated persons of DCMA, and therefore may not be subject to FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

#### Japan - Notification items pursuant to Article 37 of the Financial Instruments and Exchange Law

(This Notification is only applicable to where report is distributed by Daiwa Securities Co. Ltd.)

If you decide to enter into a business arrangement with our company based on the information described in this report, we ask you to pay close attention to the following items.

- In addition to the purchase price of a financial instrument, our company will collect a trading commission\* for each transaction as agreed beforehand with you. Since commissions may be included in the purchase price or may not be charged for certain transactions, we recommend that you confirm the commission for each transaction. In some cases, our company also may charge a maximum of ¥2 million per year as a standing proxy fee for our deposit of your securities, if you are a non-resident.
- For derivative and margin transactions etc., our company may require collateral or margin requirements in accordance with an agreement made beforehand with you. Ordinarily in such cases, the amount of the transaction will be in excess of the required collateral or margin requirements\*\*.
- There is a risk that you will incur losses on your transactions due to changes in the market price of financial instruments based on fluctuations in interest rates, exchange rates, stock prices, real estate prices, commodity prices, and others. In addition, depending on the content of the transaction, the loss could exceed the amount of the collateral or margin requirements.
- There may be a difference between bid price etc. and ask price etc. of OTC derivatives handled by our company.
- Before engaging in any trading, please thoroughly confirm accounting and tax treatments regarding your trading in financial instruments with such experts as certified public accountants.

\* The amount of the trading commission cannot be stated here in advance because it will be determined between our company and you based on current market conditions and the content of each transaction etc.

\*\* The ratio of margin requirements etc. to the amount of the transaction cannot be stated here in advance because it will be determined between our company and you based on current market conditions and the content of each transaction etc.

When making an actual transaction, please be sure to carefully read the materials presented to you prior to the execution of agreement, and to take responsibility for your own decisions regarding the signing of the agreement with our company.
