Good afternoon. **QQQs +1.4%,** helped by **NVDA +9%** after a stellar print, while **software +5%** had a night to remember with across-the-board goodness from OKTA, CRM, CRWD & VEEV earnings lifting the whole space. Sentiment hasn't done a full 180 from six months ago, but maybe a 120, with software investors slowly remembering they're allowed to be bullish. Dario's appearance on CRM's earnings call was also telling. Some investors had worried the eventual Anthropic roadshow in Sept/Oct would feature Dario & Co. explaining how they planned to swallow the entire enterprise software stack; instead, his presence alongside Benioff reinforced a much more collaborative, partner-not-predator stance.

下午好。QQQ 上涨 1.4%，得益于 NVDA 在财报表现亮眼后大涨 9%；而软件板块则迎来了一个值得铭记的夜晚，OKTA、CRM、CRWD 和 VEEV 的财报全线向好，带动整个板块上扬。市场情绪虽未像六个月前那样彻底反转 180 度，但或许已转向 120 度，软件投资者正逐渐重拾看涨信心。Dario 出席 CRM 财报电话会议也颇具深意。部分投资者曾担心，Anthropic 定于 9 月或 10 月举行的路演会让 Dario 及其团队解释他们如何计划吞并整个企业软件栈；然而，他与 Benioff 同台亮相，反而强化了更为协作、是合作伙伴而非掠夺者的立场。

Software outperformed semis by ~5%, though there was still plenty of green across semis. NVDA was notably bid, with positioning short into the print and the name widely used as a funding short, so some of the strength looked like covering while investors sold down other longs, although our sense is longs left the print feeling a lot better. Overall, volumes pretty thin across the board so tough to read too much into the tape.

软件板块表现优于半导体板块约 5%，尽管半导体板块整体仍普遍收涨。英伟达（NVDA）获显著买盘支撑，由于财报发布前市场对其建立大量空头头寸，且该股被广泛用作融资做空标的，因此部分涨幅看似源于空头回补，与此同时投资者减持了其他多头持仓；不过我们认为，多头在财报发布后整体信心明显增强。总体而言，各板块成交量均较为清淡，因此难以从盘面走势中解读出过多信号。

Post-close earnings: 盘后财报：

ESTC +17%: Better cloud trends and margin leverage will put bears on the backfoot

ESTC 上涨 17%：云业务趋势向好及利润率杠杆效应将令空头陷入被动

Takeaway not just top line upside, but evidence that cloud and sales-led subscription trends are stabilizing while cRPO remains healthy. Positioning/sentiment here had become increasingly cautious around competition — doesn't take much these days to squeeze SMID software name... The FY raise more than covered the quarterly upside.

关键要点不仅在于营收超预期，更在于云业务和以销售为主导的订阅趋势正在企稳，同时剩余履约义务（cRPO）保持健康。此前市场对该股的定位和情绪因竞争担忧而日趋谨慎——如今要打压中小盘软件股无需太多理由……此次全年指引的上调幅度已完全覆盖季度超预期部分。

Print | Revenue $478M vs. ~$469M; EPS $0.70 vs. $0.58; subscription revenue $449M vs. $442M; Elastic Cloud $235M vs. $231M.

财报数据 | 营收 4.78 亿美元 vs. ~4.69 亿美元；每股收益 0.70 美元 vs. 0.58 美元；订阅收入 4.49 亿美元 vs. 4.42 亿美元；Elastic Cloud 收入 2.35 亿美元 vs. 2.31 亿美元。

Guide | Q2 revenue $486-487M vs. $484M; EPS $0.80-0.82 vs. $0.79. FY revenue $2.00-2.01B vs. $2.00B; EPS $3.29-3.37 vs. $3.24; operating margin raised to 19.4% from 19.0%.

业绩指引 | 第二季度营收 4.86-4.87 亿美元，对比预期 4.84 亿美元；每股收益 0.80-0.82 美元，对比预期 0.79 美元。全年营收 20.0-20.1 亿美元，对比预期 20.0 亿美元；每股收益 3.29-3.37 美元，对比预期 3.24 美元；运营利润率从 19.0% 上调至 19.4%。

微信公众号180K

MRVL -5%: Ok q but GM missed

MRVL 下跌 5%：季度表现尚可，但毛利率未达预期

#s just barely above street and slightly below bogeys, with the Q3 gross-margin midpoint below street and down sequentially. Raising FY27 revenue to $12B and FY28 to $18B, while taking FY28 data-center growth to 60%.

营收数据仅略高于华尔街预期，但稍低于内部目标，其中第三季度毛利率中点低于华尔街预期且环比下降。公司将 2027 财年营收指引上调至 120 亿美元，2028 财年上调至 180 亿美元，同时将 2028 财年数据中心业务增速预期提升至 60%。

Print | Revenue $2.74B vs. $2.72B; EPS $0.94 vs. $0.93; gross margin 58.9% vs. 58.8%; data center $2.17B vs. $2.16B.

财报数据 | 营收 27.4 亿美元 vs. 27.2 亿美元；每股收益 0.94 美元 vs. 0.93 美元；毛利率 58.9% vs. 58.8%；数据中心业务 21.7 亿美元 vs. 21.6 亿美元。

Q3 | Revenue $3.15B vs. ~$3.03B; EPS $1.10 vs. ~$1.08; gross margin 58.0% midpoint vs. 58.5%.

第三季度 | 营收 31.5 亿美元 vs. ~30.3 亿美元；每股收益 1.10 美元 vs. ~1.08 美元；毛利率中值 58.0% vs. 58.5%。

微信公众号180K

Call | FY27 revenue $12B vs. $11.5B prior; FY28 revenue $18B vs. $16.5B prior; FY28 data-center growth 60% vs. 55% prior.

电话会议 | 2027 财年营收 120 亿美元 vs. 此前预期的 115 亿美元；2028 财年营收 180 亿美元 vs. 此前预期的 165 亿美元；2028 财年数据中心业务增长 60% vs. 此前预期的 55%。

WDAY +1%: A margin beat wrapped around an otherwise very ordinary print

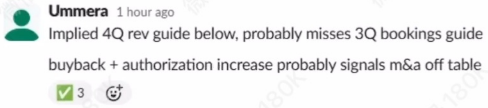
WDAY 上涨 1%：在整体表现平平的财报中，运营利润率超出预期成为亮点

Subscription revenue and cRPO were essentially where expected, Q3 subscription guidance was fractionally light, and the FY raise was smaller than the Q2 upside. Management said AI drove more than 25% of new ACV...stock has rallied from down 6% to +1% over the last 10 minutes post market, but not on the call so now sure what they are saying right now

订阅收入和剩余履约义务（cRPO）基本符合预期，第三季度订阅收入指引略低于预期，而全年上调幅度小于第二季度的超预期

微信公众号 180K

部分。管理层表示，人工智能驱动的新增年度合同价值（ACV）占比超过 25%……该股在盘后十分钟内从下跌 6% 反弹至上涨 1%，但电话会议尚未开始，因此目前尚不清楚他们具体说了什么。



Ummera 1 hour ago

Implied 4Q rev guide below, probably misses 3Q bookings guide

buyback + authorization increase probably signals m&a off table

✅ 3

Print | Revenue $2.65B vs. $2.64B; subscription revenue $2.47B vs. $2.46B; EPS $2.75 vs. $2.61; operating margin 31.1% vs. 30.1%; cRPO +14.2%; RPO $27.4B vs. roughly $28.5B.

实际数据 | 营收 26.5 亿美元 vs. 26.4 亿美元；订阅营收 24.7 亿美元 vs. 24.6 亿美元；每股收益 2.75 美元 vs. 2.61 美元；运营利润率 31.1% vs. 30.1%；合同剩余绩效义务（cRPO）增长 14.2%；剩余绩效义务（RPO）274 亿美元 vs. 约 285 亿美元。

Guide | Q3 subscription revenue $2.515B vs. ~$2.52B; operating margin 30% vs. ~29.5%. FY subscription revenue $9.94-9.95B vs. prior $9.925-9.95B; operating margin raised to 31% from 30.5%.

微信公众号180K

业绩指引 | 第三季度订阅收入为 25.15 亿美元，对比预期~25.2 亿美元；运营利润率为 30%，对比预期~29.5%。全年订阅收入指引为 99.4 亿至 99.5 亿美元，此前为 99.25 亿至 99.5 亿美元；运营利润率从 30.5% 上调至 31%。

ADSK -5%: Strong margins, but the guide raise looks less exciting once MaintainX is included

ADSK 下跌 5%：利润率强劲，但一旦将 MaintainX 纳入考量，营收指引的上调就显得不那么令人兴奋。

The quarter itself was solid, with a clear EPS/margin upside and a modest billings outperformance. The issue is the guide: Q3 EPS is below Street, the FY top-line raise includes MaintainX, and the implied organic billings trajectory does not point to much of an inflection.

本季度业绩稳健，每股收益（EPS）和利润率明显超预期，账单收入也略有超出。问题在于指引：第三季度 EPS 低于华尔街预期，全年营收上调包含了 MaintainX 的贡献，而隐含的有机账单增长轨迹并未显示出明显的拐点。

微信公众号 180K

Print | Revenue $2.05B vs. $2.01B; EPS $3.30 vs. $3.12; billings $1.85B vs. $1.82B; operating margin 41.0%, roughly 170bps above plan.

业绩数据 | 营收 20.5 亿美元 vs. 20.1 亿美元；每股收益 3.30 美元 vs. 3.12 美元；账单收入 18.5 亿美元 vs. 18.2 亿美元；营业利润率 41.0%，较计划高出约 170 个基点。

Guide | Q3 revenue $2.13-2.14B vs. $2.08B, but EPS $3.04-3.09 vs. $3.14. FY revenue $8.30-8.35B vs. $8.21B; billings $8.575-8.65B vs. $8.55B; operating margin held at ~39%.

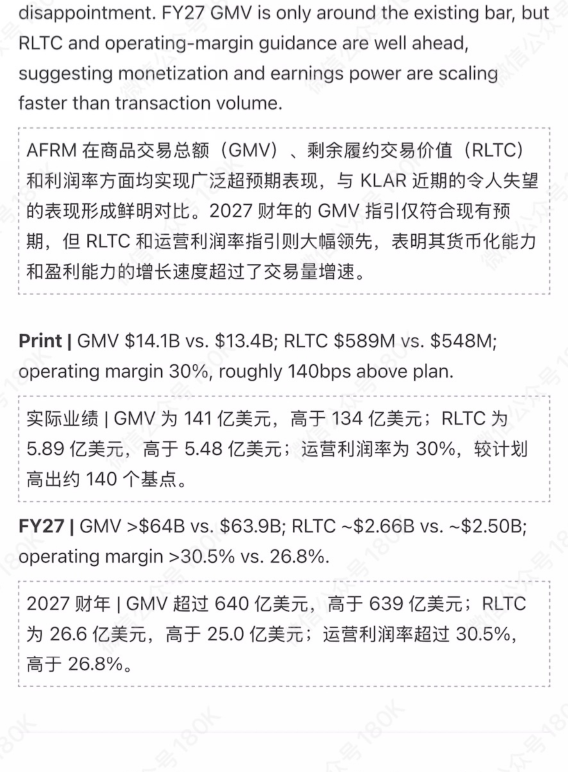
指引 | 第三季度营收 21.3–21.4 亿美元 vs. 20.8 亿美元，但每股收益 3.04–3.09 美元 vs. 3.14 美元。全年营收 83.0–83.5 亿美元 vs. 82.1 亿美元；账单收入 85.75–86.5 亿美元 vs. 85.5 亿美元；营业利润率维持在 39%。

AFRM +11%: Strong quarter, with the real upside coming from margins rather than volume

AFRM +11%：季度表现强劲，真正上行空间来自利润率提升而非交易量增长

AFRM delivered broad upside across GMV, RLTC and margins, providing a favorable contrast with KLAR’s recent

微信公众号 180K



disappointment. FY27 GMV is only around the existing bar, but RLTC and operating-margin guidance are well ahead, suggesting monetization and earnings power are scaling faster than transaction volume.

AFRM 在商品交易总额（GMV）、剩余履约交易价值（RLTC）和利润率方面均实现广泛超预期表现，与 KLAR 近期的令人失望的表现形成鲜明对比。2027 财年的 GMV 指引仅符合现有预期，但 RLTC 和运营利润率指引则大幅领先，表明其货币化能力和盈利能力的增长速度超过了交易量增速。

Print | GMV $14.1B vs. $13.4B; RLTC $589M vs. $548M; operating margin 30%, roughly 140bps above plan.

实际业绩 | GMV 为 141 亿美元，高于 134 亿美元；RLTC 为 5.89 亿美元，高于 5.48 亿美元；运营利润率为 30%，较计划高出约 140 个基点。

FY27 | GMV >$64B vs. $63.9B; RLTC ~$2.66B vs. ~$2.50B; operating margin >30.5% vs. 26.8%.

2027 财年 | GMV 超过 640 亿美元，高于 639 亿美元；RLTC 为 26.6 亿美元，高于 25.0 亿美元；运营利润率超过 30.5%，高于 26.8%。

微信公众号 180K

RBRK -10%: Strong across the board, but pretty tough to clear raised bars after CRWD/OKTA

RBRK 下跌 10%：各方面表现强劲，但在 CRWD/OKTA 之后，要超越被抬高的预期相当困难。

Revenue, NNARR and especially operating margin all cleared expectations, while the full-year outlook moved meaningfully higher.

营收、净新增年度经常性收入（NNARR），尤其是运营利润率均超出预期，同时全年展望也显著上调。

Print | Revenue $427M vs. $396M; EPS $0.20 vs. $0.04; operating margin 7.8% vs. negative 2%; subscription ARR $1.666B vs. $1.64B; NNARR ~$96M vs. buy-side in the mid-$90Ms.

业绩数据 | 营收 4.27 亿美元 vs. 3.96 亿美元；每股收益（EPS）0.20 美元 vs. 0.04 美元；运营利润率 7.8% vs. -2%；订阅制年度经常性收入（ARR）16.66 亿美元 vs. 16.4 亿美元；NNARR 为 9600 万美元 vs. 买方预期的 9000 多万美元中段。

Guide | Q3 revenue $429-431M vs. $418M; EPS $0.07-0.09 vs. $0.06. FY EPS $0.47-0.53 vs. $0.31; subscription ARR

微信公众号 180K

raised to $1.88-1.885B from $1.854-1.862B.

指引 | 第三季度营收 4.29 亿至 4.31 亿美元 vs. 4.18 亿美元；每股收益 0.07 至 0.09 美元 vs. 0.06 美元。全年每股收益 0.47 至 0.53 美元 vs. 0.31 美元；订阅制 ARR 指引从 18.54 亿至 18.62 亿美元上调至 18.8 亿至 18.85 亿美元。

S -3%: Solid, but not good enough for the post-CRWD tape

股价下跌 3%：表现稳健，但不足以匹配 CrowdStrike（CRWD）财报发布后的市场情绪。

NNARR came in above the buy-side bogey and revenue plus operating-income guidance moved higher. However, billings and deferred revenue were light, Q3 EPS fell below Street, and the FY EPS reduction, even though driven by share count, gave investors an easy reason to sell. Looks more like an expectations and positioning miss vs anything materially wrong.

NNARR 超出买方预期，营收与营业利润指引均上调。然而，账

微信公众号 180K

单收入和递延收入表现疲软，第三季度每股收益低于华尔街预期，且尽管全年每股收益下调主要由股本数量变化驱动，仍为投资者提供了轻易抛售的理由。整体来看，这更像是预期与持仓层面的落差，而非基本面出现实质性问题。

Print | Revenue $292M vs. $290M; EPS $0.08 vs. $0.07; ending ARR $1.222B vs. $1.21B; NNARR ~$55M vs. buy-side $52-53M; operating margin 10.5% vs. 8.3%.

业绩 | 营收 2.92 亿美元 vs. 2.90 亿美元；每股收益 0.08 美元 vs. 0.07 美元；期末年度经常性收入（ARR）12.22 亿美元 vs. 12.1 亿美元；净新增 ARR 为 5500 万美元 vs. 买方预期的 5200-5300 万美元；运营利润率 10.5% vs. 8.3%。

Guide | Q3 revenue $309-311M vs. $309M, but EPS $0.08-0.09 vs. $0.11. FY revenue $1.20-1.21B vs. $1.20B; EPS $0.30-0.32 vs. $0.35.

指引 | 第三季度营收 3.09-3.11 亿美元 vs. 3.09 亿美元，但每股收益 0.08-0.09 美元 vs. 0.11 美元。全年营收 12.0-12.1 亿美元 vs. 12.0 亿美元；每股收益 0.30-0.32 美元 vs. 0.35 美元。

AI/SEMIS 人工智能/半导体

- **NVDA +9%** stole the show in semis last night. Our take from morning wrap:

英伟达（NVDA）昨晚大涨 9%，成为半导体板块的焦点。我们晨间总结的观点如下：

> Bulls will say you are getting NVDA at 10x C28 earnings for the marquee AI factory platform which means you aren't paying for any growth past '28. Bears will say some of the debates heading in still aren't solved (TPU/AMD competition, GM pressure, SPCX/OAI/neocloud concentration in F28, etc.). We generally side with the bulls as think a lot of the bear debates are what have kept the

> stock in the penalty box as a funding short for a while coming in (stock has been flat for 9 months). While some of those debates remain and will remain likely keeping some in the funding short camp, we think stock is too cheap and has too many tailwinds going for it not to own in LT book.
>
> 多方观点认为，当前股价相当于以 10 倍 2028 年盈利买入英伟达（NVDA）这一旗舰级 AI 工厂平台，意味着并未为 2028 年之后的增长支付溢价。空方则认为，此前存在的一些争议尚未解决（例如 TPU/AMD 竞争、毛利率压力、2028 财年 SPCX/OAI/新兴云厂商的客户集中度等）。我们总体倾向于多方观点，因为正是这些空方争议导致该股长期以来被资金面压制（股价已横盘 9 个月）。尽管部分争议仍将持续，并可能使部分投资者继续看空，但我们认为该股估值过低，且具备过多有利因素，长期投资组合中不应缺席。

- Large cap names up in sympathy with NVDA: **TSM +2.3%** and **AVGO +4.5%**

  大型股受英伟达带动同步上涨：台积电（TSM）+2.3%，博通（AVGO）+4.5%

- **LITE +2%** as CEO sounded good at DB conf. Full recap in TMTB Slack here Here's a few snippets:

LITE 上涨 2%，其 CEO 在德银会议上的表现令人满意。完整回顾请见 TMTB Slack 此处。以下是部分摘录：

> Mgmt put a **new fiscal 2028 target of $40 of earnings power** on the table, and CEO Michael Hurlston tied it directly to order flow: **"our largest customer has taken up their orders very significantly ... really since our last earnings call. We have seen a huge uptick in our order book and the order rate, which actually gives us confidence to ... give a new guidance." He called it "a very, very significant number and a take up ... against all the sell side analysts."** That is a step beyond the Aug 11 Q4 call, where mgmt said new financial targets would be set at the next OFC; the earnings-power number arrived early, with refreshed TAM numbers still promised for OFC in March — the $8B TAM given at OFC last year "looks like it is significantly undercalled." On OCS, mgmt pushed back on the single-customer framing: Google's deployment is growing ("the number of OCS per torus is growing"), but "we actually have customers that were much more substantial than Google in our early rounds of shipments," and the most interesting emerging use case is one OCS per rack to route around failed or overloaded GPUs — "the compute model is $20 million, $30 million, $40 million of compute time, and you have something that gives out, that

微信公众号 180K

is a problem." DB's John Marco Conti noted OCS shipments doubled sequentially and are expected to cross $100 million in revenue next quarter, both consistent with the Q4 call.

管理层提出了新的 2028 财年目标，即实现 40 美元的盈利实力，首席执行官 Michael Hurlston 将其直接与订单流挂钩：“我们最大的客户自上次财报电话会议以来，大幅增加了订单……我们目睹了订单簿和订单率的显著跃升，这实际上让我们有信心……提供新的指引。”他称这是“一个非常、非常重要的数字，也是对所有卖方分析师预期的超越”。这比 8 月 11 日第四季度电话会议更进一步，当时管理层表示新的财务目标将在下一次 OFC（甲骨文云大会）上制定；而盈利实力目标提前出炉，刷新后的 TAM（可寻址市场总额）数据仍承诺将于明年三月的 OFC 公布——去年 OFC 给出的 80 亿美元 TAM“看起来被显著低估了”。在 OCS 方面，管理层对“单一客户”的表述提出了异议：谷歌的部署正在增长（“每个环面配置的 OCS 数量正在增加”），但“在我们早期的出货轮次中，实际上有比谷歌规模大得多的客户”，而最有趣的新兴用例是每个机架配置一个 OCS，用于绕过故障或过载的 GPU——“计算模型的投入高达 2000 万、3000 万乃至 4000 万美元的计算时长，若其中某个环节出现故障，那就是个大问题。德意志银行的 John Marco Conti 指出，OCS 出货量环比翻了一番，预计下季度收入将突破 1 亿美元，这与第四季度电话会议的内容一致。

On architecture, the incremental message was NPO is bigger and sooner than CPO: "we see at least in the near term, a larger opportunity with the NPO customers than we do with the CPO customer," and the timing has pulled in — **"prior to our last earnings call, we probably thought that it was going to be a late 2028 into early 2029 event ... It seems like now it is a late 2027 into early 2028 event,"** with NPO having "surprised us with both the timing and the magnitude."

关于架构，新增的信息是 NPO 的规模和落地时间均优于 CPO：“至少在近期，我们看到 NPO 客户带来的机会大于 CPO 客户”，且时间表已提前——“在上一次财报电话会议之前，我们原本认为这将是 2028 年末至 2029 年初的事件......现在看来，它已变为 2027 年末至 2028 年初的事件”，NPO“在时间和规模上都令我们感到意外”。

On capacity, the Greensboro fab (acquired from Qorvo in early calendar 2026) reaches production in early 2028 — backed by NVIDIA's "multibillion-dollar" long-term agreement and fab investment — and mgmt said the CPO customer alone "could take all of that capacity" if it chose; the goal now is locking up similar deals with NPO customers, which may force a search for capacity beyond Greensboro. The binding constraint is "more than anything else ... time" — a full year to qualify lasers at NVIDIA — plus

> substrates (a second supply deal signed on top of the Japanese agreement and "still, that might not be enough") and tool lead times, which mgmt frames as the moat.
>
> 在产能方面，格林斯博罗晶圆厂（于 2026 年初从 Qorvo 收购）将在 2028 年初投产——此举由英伟达的“数十亿美元”长期协议及晶圆厂投资提供支持——管理层表示，仅 CPO 客户若有意愿，“便可消化全部产能”；目前的目标是与 NPO 客户锁定类似协议，这可能迫使公司寻求格林斯博罗以外的产能。制约因素“归根结底......是时间”——在英伟达完成激光器认证需整整一年——此外还有基板（在已有日本协议基础上又签署了一份第二供应协议，“但即便如此，可能仍不足够”）以及设备交付周期，管理层将此视为护城河。

- AI networking strong: **CRDO +6% / ALAB +4%**

  AI 网络表现强劲：CRDO +6% / ALAB +4%

- Memory mixed: **SKHY +4%; SNDK -1%** continues to underperform recently; **MU flat**

  存储板块表现不一：SKHY +4%；SNDK -1%，近期持续跑输大盘；MU 持平

Otherwise slow day as space was sold in favor of sw and NVDA today

今日市场表现平淡，资金从航天板块流出，转而流向软件板块和英伟达（NVDA）。

SOFTWARE 软件

- **OKTA +29%** as bulls loved another q of acceleration even without any meaningful AI revenue yet (althugh agentic AI is also widening the funnel for legacy migrations) as the strength was broad across large enterprise, both identity platforms, partners and new products, and the FY revenue raise exceeded the quarterly upside.

  OKTA 上涨 29%，多头青睐其连续一个季度的加速增长，尽管目前尚未产生有意义的 AI 收入（尽管代理式 AI 也在拓宽传统迁移的漏斗），因为增长势头广泛覆盖大型企业、两大身份平台、合作伙伴及新产品，且全年营收上调幅度超过了季度超预期部分。

- **CRM +22%** with the magnitude of the move surprising many. The quarter was good, not 22%-good on the numbers alone, but 14% cRPO which was slightly better

微信公众号 180K

than buyside, the strongest NNAOV growth in four years, near-record-low attrition and a better forward guide detonated an extremely bearish setup. The bigger narrative change is what we call the Dario "Halo." Sharp move by Benioff inviting Dario on the earnings call. Anthropic effectively validated CRM's data, workflow, permissions and governance layer and Dario said Anthropic is big users of Salesforce. We imagine other enterprise vendors who own distribution and customer relationships will follow suit by partnering with models and will try to book Dario for joint appearances. Here's CFO at DB later in the day today:

> CRM 上涨 22%，涨幅之大令许多人感到意外。该季度表现良好，但仅凭数据本身并不足以支撑 22% 的涨幅；其 cRPO 增长 14%，略高于买方预期，净新增年度订阅收入（NNAOV）增速创下四年来新高，客户流失率接近历史最低水平，加之前瞻指引向好，共同引爆了原本极度悲观的市场预期。更大的叙事转变是我们所称的"Dario 光环效应"：Benioff 果断邀请 Dario 参加财报电话会议。Anthropic 实际上验证了 CRM 在数据、工作流、权限及治理层面的能力，Dario 亦表示 Anthropic 是 Salesforce 的重要用户。我们预计，其他拥有分销渠道和客户关系的企业软件供应商将效仿此举，通过与大模型厂商合作，并尝试邀请 Dario 进行联合亮相。以下是德银（DB）首席财务官稍后在今日的发言：

微信公众号180K

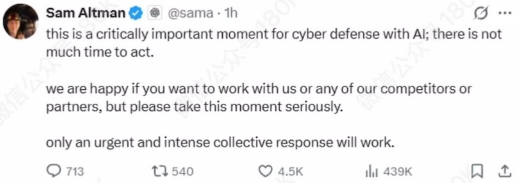
> “The metric that sticks out the most, at least from my vantage point, is the CRPO, and by way of that, the net new AOV" which "exceeded all our expectations by a long shot." The genuinely incremental color was the stress-test he described on the H2 re-acceleration: "we have pivoted that number every which way to Sunday… excluding licenses, fully excluding Informatica, taking obviously out Contentful and Fin… **we are accelerating in every single scenario**."…
>
> “最突出的指标，至少从我的角度来看，是 CRPO，进而体现为净新增 AOV"，该指标”远超我们的预期"。真正具有增量意义的信息是他对下半年重新加速所进行的压力测试描述：“我们从各个角度反复验证了这一数字……排除许可证收入、完全排除 Informatica，并显然剔除 Contentful 和 Fin……在每一种情境下，我们都在加速。”…
>
> On Slack he stopped short of repeating Benioff's best-acquisition framing from the call but described sentiment going from "as negative as it could possibly be" five years ago to momentum "off the charts right now," with Teams shops opening doors — helped, he said plainly, by "antitrust pressure on Microsoft, and they are doing some breakup, especially in Europe, in standalone sales of Teams."

微信公众号180K

> 在 Slack 上，他虽未复述贝尼奥夫在电话会议中关于“最佳收购”的表述，但指出市场情绪已从五年前的“极度负面”转变为当前“势头迅猛”， Teams 业务部门正纷纷打开合作之门；他直言，这得益于“针对微软的反垄断压力，促使该公司进行某些拆分，尤其是在欧洲地区独立销售 Teams"。

- **CRWD +20%** quarter strengthened the bull case by answering the near-term demand question with a NNARR number much better than buyside had it in the low $300Ms. Mythos is now showing up in ARR; endpoint acceleration continued; AIDR monetization is separate and incremental; Flex economics were stronger than previously disclosed; retention improved; and the FY raise exceeded the Q2 upside. **PANW +12%** and **ZS +10%** in sympathy

  > CRWD 股价上涨 20%，其季度表现通过以远高于买方预期的低 3 亿美元区间的净新增年度经常性收入（NNARR）数据回应了近期需求疑虑，从而强化了看涨逻辑。品牌效应如今已体现在年度经常性收入（ARR）中；终端加速趋势持续；人工智能驱动的安全（AIDR）变现独立且带来增量贡献；灵活消费模式的经济效益优于此前披露水平；客户留存率改善；且全年业绩指引上调幅度超过了第二季度的超预期部分。PANW 跟涨 12%，ZS 跟涨 10%。



Sam Altman @sama · 1h

this is a critically important moment for cyber defense with AI; there is not much time to act.

we are happy if you want to work with us or any of our competitors or partners, but please take this moment seriously.

only an urgent and intense collective response will work.

- **U -2%** been getting some questions on the weakness this week. The main thing I've heard making the rounds is that 1–2 new world models could be released in September, with ByteDance potentially having the strongest one. Longs here still have some PTSD from the Genie release in January, so there's likely been some trimming/hedging ahead of those launches.

> U 下跌 2%，本周收到一些关于其走弱的询问。目前流传的主要消息是，9 月可能发布 1–2 个新的世界模型，其中字节跳动的模型或许最强。该股的长线投资者仍对 1 月 Genie 的发布心有余悸，因此在这些产品发布前可能出现部分减仓或对冲操作。

The backdrop for "AI disintermediation" is obviously very different from the Claude Bombs in early January, and with U now a favored long and intra-q checks still strong, it's unclear how much impact any of this would actually have on the stock. Still, worth keeping in mind as 'world

微信公众号180K

model' remains something of a trigger word for U longs after January.

> “人工智能去中介化”的背景显然与 1 月初的"Claude Bombs"事件截然不同；鉴于 U 目前仍是受青睐的多头标的，且季度内核查依然强劲，尚不清楚此类事件究竟会对股价产生多大影响。不过，鉴于“世界模型”在 1 月之后已成为 U 多头的一个敏感触发词，此事仍值得留意。

- **MDB +9%** Hedgeye was out initiating on MDB saying the market is pricing it like a decelerating database story, while Atlas is reaccelerating and AI workloads should structurally favor MongoDB’s operational data layer. Atlas growth has held ≥29% for four straight quarters, $100K+ customer platform attach rose to 45% from 37%, and net ARR expansion recovered to 121%. They also see the Street baking in an overly sharp 2H slowdown despite MDB’s long history of upside to guidance, with a $579 12–18 month target, ~30% upside. Jefferies spec sales was out saying bogey beginning to settle in around ~30% while guiding to something in 26-27% range for the guide.

MDB 上涨 9%。Hedgeye 发布了对 MDB 的初始评级报告，指出市场正将其定价为增长放缓的数据库故事，而实际上 Atlas 正在重新加速，且 AI 工作负载在结构上应有利于 MongoDB 的运营数据层。Atlas 增速已连续四个季度保持在 29% 以上，10 万美元以上客户平台附加率从 37% 升至 45%，净年度经常性收入（ARR）扩张率回升至 121%。他们还认为，尽管 MDB 长期以来指引屡有超预期表现，但华尔街却计入了过于剧烈的下半年放缓预期；其给出的 12–18 个月目标价为 579 美元，对应约 30% 的上行空间。Jefferies 的销售团队也指出，市场基准开始稳定在约 30% 左右，而公司指引则落在 26%-27% 区间。

- **MSFT +1.8%** underperformed software but outperformed other hyperscalers. CFO sounded solid at DB. Full recap in Slack here . A few snippets:

  微软股价上涨 1.8%，表现不及软件板块但优于其他超大规模云厂商。其首席财务官在德意志银行会议上的发言稳健。完整回顾请见 Slack 此处。部分内容摘录如下：

> Most market-relevant: mgmt doubled down on the breadth of Azure AI demand. Bill Duff said the backlog build disclosed on the Q4 call — “we saw an increase in our backlog of... a little bit more than $50 billion” — “was all outside of OpenAI and Anthropic. So it was all non-frontier labs,” and called out “a real broadening of demand” that he

微信公众号180K

said is not concentrated in any geo or segment, with Foundry the best proxy: "over 100,000 customers who have doubled revenue year over year." On capacity he held exactly to the line he attributed to Amy Hood from the July 29 print: "we expect that demand will continue to be greater than supply through the remainder of this calendar year." Asked by DB's Brad Zelnick how MSFT prioritizes scarce capacity across segments, Duff put customer commitments first ("where they are making commitments… we are committed to delivering that") and leaned on the fungibility of a common architecture — first-party Copilots, Azure AI services and internal R&D all run on "the exact same infrastructure" — with the efficiency push framed as both a margin lever and a growth driver. No new capacity or capex numbers beyond the print, which had guided FY27 capex up y/y with more than $50B in Q1.

最与市场相关的要点：管理层再次强调了 Azure AI 需求的广泛性。Bill Duff 表示，第四季度电话会议中披露的积压订单增长——"我们的积压订单增加了……略高于 500 亿美元"——"全部来自 OpenAI 和 Anthropic 之外，即全部来自非前沿实验室"，并指出需求正在"真正拓宽"，他强调这种需求并未集中在任何地理区域或细分领域，其中 Foundry 是最佳佐证："超过 10 万家客户实现了收入同比翻倍"。关于产能，他完全

微信公众号 180K

重申了他在 7 月 29 日报告中归因于 Amy Hood 的表述：“我们预计，在本日历年的剩余时间里，需求将继续超过供应。”当德意志银行的 Brad Zelnick 询问微软如何在各细分领域之间优先分配稀缺产能时，Duff 将客户承诺置于首位（“在他们做出承诺的地方……我们致力于交付”），并依托于通用架构的可互换性——第一方 Copilots、Azure AI 服务和内部研发均运行在“完全相同的基础设施”上——同时将提升效率定位为既是利润率杠杆，也是增长驱动力。 除已公布数据外，无新增产能或资本支出数字；此前指引显示，2027 财年资本支出将同比提升，其中第一季度超过 500 亿美元。

The most incremental color was on M365 Copilot monetization. The seat acceleration reported over the past two quarters (30M+ paid seats at Q4, net adds more than doubling sequentially) is, per Duff, **expansion-driven**: customers who ran limited departmental pilots in H2 last year are now doing “wall to wall deployments, where basically all information workers in a company receive a Copilot license, just like they receive an M365 license... just like they receive a Windows PC,” with engagement “on par with what we see with Teams and Outlook, which are some of our most heavily used products.” On the new Co-work consumption billing, Zelnick pressed on customers burning through commitments faster than expected; Duff conceded “it is a big issue” and drew the pricing line sharply: chat stays in the per-seat license, but “the consumption model is right for these longer running agentic tasks that are really doing work on your behalf," with the Q4-launched offering adding an M365 admin center so customers can see and manage usage.

最具边际变化的信息集中在 M365 Copilot 的货币化方面。过去两个季度报告的席位加速增长（第四季度付费席位超过 3000 万，净增数量环比翻倍）据 Duff 称是由扩展驱动的：去年下半年进行有限部门试点的客户，如今正开展“全覆盖部署”，即公司内几乎所有信息工作者都会获得 Copilot 许可证，就像他们获得 M365 许可证一样……就像他们获得 Windows PC 一样；其参与度“与我们在 Teams 和 Outlook 上观察到的水平相当，而这两款产品是我们使用最频繁的产品之一”。关于新的 Co-work 消耗计费模式，Zelnick 追问客户为何比预期更快地耗尽承诺额度；Duff 承认“这是一个重大问题”，并明确划定了定价界限：聊天功能仍包含在按席位计费的许可证中，但“消耗模式适用于这些持续时间更长、真正代表您执行工作的代理任务”；第四季度推出的该服务还增加了 M365 管理中心，以便客户查看和管理使用情况。

On Frontier Co (the $2.5B initiative embedding 6,000 engineers with customers, announced this summer), Duff pushed back on comparisons to peers' forward-deployed-engineer programs: "we are thinking about this as a business," organized around customer business outcomes and industry expertise rather than tech-support FTEs, with

> partners expected to amplify it with their own IP and relationships rather than be disintermediated.
>
> 关于 Frontier Co（今年夏季宣布的一项耗资 25 亿美元的计划，旨在将 6,000 名工程师嵌入客户团队），Duff 反驳了将其与同行“前置部署工程师”项目相提并论的观点：“我们将此视为一项业务”，其组织核心是客户业务成果和行业专业知识，而非技术支持全职员工；合作伙伴应利用自身的知识产权和客户关系来放大该计划的价值，而非被取代。

- **SNOW +4%:** Clev was out positive raising numbers on CoCo effect and ramping AI usage

  SNOW +4%：Clev 发布积极观点，上调了 CoCo 效应相关数据并指出 AI 使用量正在攀升

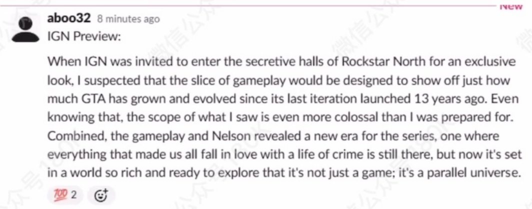
- **TTWO +30bps** as trailer launched on Netflix and graphics were much better than expected vs. leaks. So far, feedback has been overwhelmingly positive by viewers. Here’s IGN;

微信公众号180K

TTWO 上涨 30 个基点，因其在 Netflix 发布的预告片画面质量远超此前泄露版本。目前观众反馈极为积极。以下是 IGN 的报道；



aboo32 8 minutes ago

IGN Preview:

When IGN was invited to enter the secretive halls of Rockstar North for an exclusive look, I suspected that the slice of gameplay would be designed to show off just how much GTA has grown and evolved since its last iteration launched 13 years ago. Even knowing that, the scope of what I saw is even more colossal than I was prepared for. Combined, the gameplay and Nelson revealed a new era for the series, one where everything that made us all fall in love with a life of crime is still there, but now it's set in a world so rich and ready to explore that it's not just a game; it's a parallel universe.
