With the overhang of margin concerns removed, the market should focus more on the 2H26 outlook. Stay OW.

2Q26 operating profit in line: Off revenue of NT\$23,281mn (+12% QoQ/+37% YoY), GM expanded by 2.0ppt to 30.7% (largely in line with MSe at 29.9% and consensus at 31.0%), which management attributed to higher utilization, better efficiency and a more favorable revenue mix. Opex of NT\$3,144mn (opex ratio of 13.5%) was roughly in line, leading to operating profit of NT\$4,010mn (OPM 17.2%), 7% higher than MSe at NT\$3,743mn (OPM 16.4%) but in line with consensus at NT\$4,012mn (OPM 17.4%). With a non-op loss of NT\$113mn, net profit came in at NT\$2,982mn (EPS of NT\$15.28), 8% above MSe and 2% above consensus (NT\$2,752mn and NT\$2,912mn, respectively).

2H26 growth driven by HPC: Although there is no official guidance on 3Q26, we estimate revenue could grow 23% QoQ and 55% YoY considering July monthly sales (NT\$9,630mn,+13% MoM/+60% YoY) and normal seasonality in August/September. We believe HPC should be the major driver, as power interconnects should continue to see momentum from AI/general servers; meanwhile, data interconnects could grow along with new ASIC model ramp and GPU sever demand. Besides HPC, its semi cap revenue should see sustained momentum (+28% QoQ/+52% YoY for 14% revenue mix in 2Q26). We expect GM to continue expanding on a sequential basis as scale grows larger and efficiency improves. Management indicated that it will maintain good capex discipline and is willing to give up potential business opportunities if the expected return can't justify the investment. We think this demonstrates a mindset of prioritizing profitability over pure top-line growth.

Stay OW: Although GM of 30.7% in 2Q26 was largely in line with the consensus, we think this should remove an overhang among at least some investors that GM might continue to hover below 30% for an extended period of time. The focus should now be directed toward the outlook for 2H26, which we think remains solid. For the longer term, we believe Bizlink should ride AI capex tailwinds through its offerings in the power (power whips, busbars, etc.) and data (both copper and optical) interconnects for volume growth and spec upgrades, as well as the business model shift in the semi cap equipment segment. We remain OW and maintain our PT at NT \$3,665 (30x 2027 P/E, implying a PEG of 0.7).

Valuation Methodology

We maintain our price target (base case scenario value) at NT\$3,665, derived from 30x 2027e P/E (unchanged): We use price/earnings as our valuation methodology because we believe it appropriately captures Bizlink's earnings growth potential. We believe our target P/E multiple of 30x is justified by an earnings CAGR of 46% over 2025-28, which implies a PEG of 0.7. This is similar to the average of 0.7 in 2019-24, when the stock was trading at an average P/E of 13x for a 19% earnings CAGR.

Bull case scenario value – NT\$4,800 (unchanged): We apply a 40x P/E multiple (unchanged) to our base case estimate for 2027. This scenario assumes stronger AEC demand owing to broader adoption within AI servers along with spec upgrades.

Bear case scenario value – NT\$1,760 (unchanged): We apply a 15x P/E multiple (unchanged) to our base case estimate for 2027. This scenario assumes lukewarm data center demand amid softening IT capex budgets and pricing pressure for low-barrier products in other business segments.

PRICE TARGET NT\$3,665.00

Base case, derived from 30x 2027e P/E. We think our target P/E multiple is justified by an earnings CAGR of 46% seen over 2025-28e, which implies a PEG of around 0.7. This is in line with the average of 0.7 in 2019-24, when the stock was trading at an average 13x P/E for a 19% earnings CAGR.

OVERWEIGHT THESIS

- For power interconnects, Bizlink should benefit from GB server rack shipment growth in 2026, and see meaningful dollar content uptick in the VR generation on higher TDPs and the HVDC design in 2027-28.
- For data interconnects, AEC is to expand its adoption in both scale out and scale up networks among multiple hyperscalers in the coming years.
- Moreover, it should have more revenue in optical interconnect offerings, and we believe these initiatives could help with its lack of diversity in data cables.
- We remain OW with a PT of NT\$3,665 (30x 2027e P/E).
