Good afternoon. **QQQs +60bps** trying to make up some gains after yesterday. Fed expects stayed steady with market pricing in 25bps worth of hikes through the rest of the year. It's been a slow August week so far. The good news is everyone's P&L has had fewer opportunities to hurt them. No major news or earnings as investors wait for the big events later this week (NVDA & Jackson Hole). We also have DB conference beginning tomorrow with **ORCL** CEO and **INTEL** CFO the main presentations tomorrow.

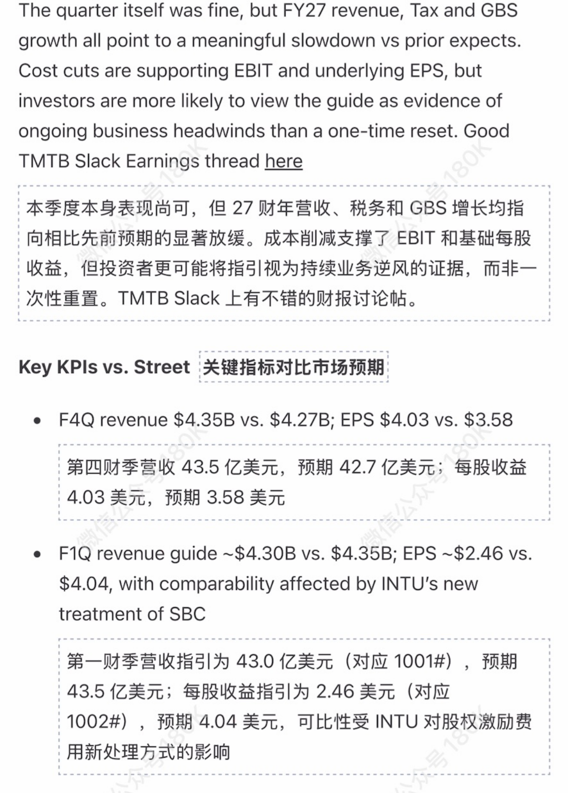
下午好。QQQs 上涨 60 个基点，试图在昨日之后收复部分失地。美联储预期保持稳定，市场定价今年剩余时间内将加息 25 个基点。到目前为止，八月这一周行情较为平淡。好消息是，大家的盈亏表上造成损失的机会减少了。没有重大新闻或财报，投资者在等待本周晚些时候的大事件（NVDA 和杰克逊霍尔）。此外，德意志银行会议明天开始，ORCL 首席执行官和 INTEL 首席财务官将是明天的主要演讲者。

Post-close Earnings: 盘后财报：

INTU -9%: FY27 top-line reset overwhelms better margins and growth worries should feed bears

INTU -9%：27 财年营收预期重置压过了更好的利润率，增长担忧应会助长空头气焰

微信公众号180K



The quarter itself was fine, but FY27 revenue, Tax and GBS growth all point to a meaningful slowdown vs prior expects. Cost cuts are supporting EBIT and underlying EPS, but investors are more likely to view the guide as evidence of ongoing business headwinds than a one-time reset. Good TMTB Slack Earnings thread here

本季度本身表现尚可，但 27 财年营收、税务和 GBS 增长均指向相比先前预期的显著放缓。成本削减支撑了 EBIT 和基础每股收益，但投资者更可能将指引视为持续业务逆风的证据，而非一次性重置。TMTB Slack 上有不错的财报讨论帖。

Key KPIs vs. Street 关键指标对比市场预期

- F4Q revenue $4.35B vs. $4.27B; EPS $4.03 vs. $3.58

  第四财季营收 43.5 亿美元，预期 42.7 亿美元；每股收益 4.03 美元，预期 3.58 美元

- F1Q revenue guide ~$4.30B vs. $4.35B; EPS ~$2.46 vs. $4.04, with comparability affected by INTU’s new treatment of SBC

  第一财季营收指引为 43.0 亿美元（对应 1001#），预期 43.5 亿美元；每股收益指引为 2.46 美元（对应 1002#），预期 4.04 美元，可比性受 INTU 对股权激励费用新处理方式的影响

微信公众号 180K

- FY27 revenue growth 9–10% vs. Street just over 11%; Tax +2–3% vs. buyside at 5–6%; GBS +13–14%

  > 2027 财年营收增长 9%至 10%，市场预期略高于 11%；税务业务增长 2%至 3%，买方预期为 5%至 6%；全球业务服务增长 13%至 14

- FY27 GAAP EBIT $7.4B vs. $7.04B

  > FY27 GAAP 息税前利润 74 亿美元，对比 70.4 亿美元

ZM -5%: Ok quarter with better FCF, but not enough growth upside to change the core debate

> **ZM 下跌 5%：季度业绩尚可，自由现金流改善，但增长上行空间不足以改变核心争论**

Revenue upside was narrower than usual and Q3 guidance came in slightly light, while the full-year revenue raise was smaller than the quarterly upside. Enterprise growth improved to its best level in roughly three years and online churn declined, but NDER remains stuck below 100% and online growth is barely positive. FCF the clearest positive.

微信公众号 180K

营收上行幅度较往常收窄，第三季度指引略低于预期，而全年营收上调幅度小于季度上行幅度。企业业务增长提升至约三年来的最佳水平，在线流失率下降，但 NDER 仍停留在 100%以下，在线增长勉强为正。自由现金流是最明显的积极因素。

Key KPIs vs. Street **关键 KPI 对比市场预期**

- Q2 revenue $1.277B vs. $1.269B; EPS $1.53 vs. $1.47

  第二季度营收 12.77 亿美元，预期 12.69 亿美元；每股收益 1.53 美元，预期 1.47 美元

- FCF $472M vs. $453M 自由现金流 4.72 亿美元，预期 4.53 亿美元
- Q3 revenue guide $1.275B vs. $1.282B; EPS $1.47 vs. $1.50

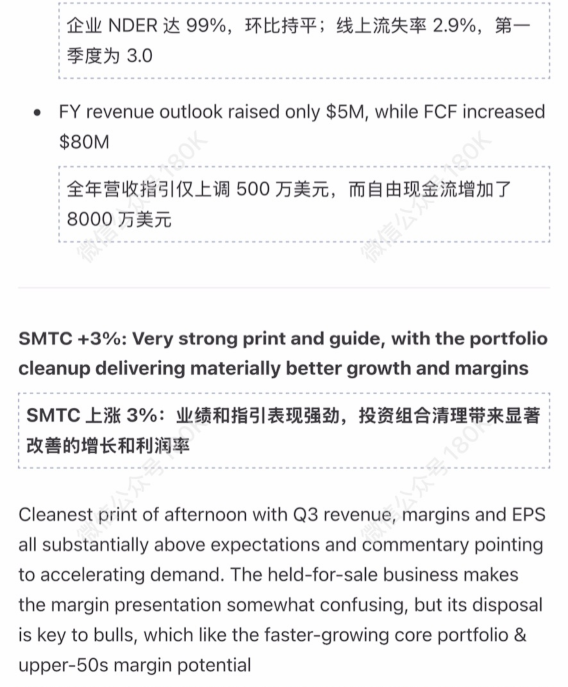
  第三季度营收指引 12.75 亿美元，预期 12.82 亿美元；每股收益 1.47 美元，预期 1.50 美元

- Enterprise revenue +7.8% y/y; Online revenue +0.6%

  企业业务营收同比增长 7.8%；在线业务营收同比增长 0.6

- Enterprise NDER 99%, flat q/q; Online churn 2.9% vs. 3.0% in Q1

微信公众号180K



> 企业 NDER 达 99%，环比持平；线上流失率 2.9%，第一季度为 3.0

- FY revenue outlook raised only $5M, while FCF increased $80M

  > 全年营收指引仅上调 500 万美元，而自由现金流增加了 8000 万美元

微信公众号 180K

SMTC +3%: Very strong print and guide, with the portfolio cleanup delivering materially better growth and margins

> **SMTC 上涨 3%：业绩和指引表现强劲，投资组合清理带来显著改善的增长和利润率**

Cleanest print of afternoon with Q3 revenue, margins and EPS all substantially above expectations and commentary pointing to accelerating demand. The held-for-sale business makes the margin presentation somewhat confusing, but its disposal is key to bulls, which like the faster-growing core portfolio & upper-50s margin potential

这是下午最亮眼的业绩报告，第三季度营收、利润率和每股收益均大幅超出预期，且评论指出需求正在加速。持有待售业务使利润率呈现方式略显复杂，但其处置对看多者至关重要，他们看好增长更快的核心业务组合及接近 60%的利润率潜力

Key KPIs vs. Street 关键绩效指标与市场预期对比

- Q2 revenue $342M vs. $329M

  第二季度营收 3.42 亿美元，预期为 3.29 亿美元

- Gross margin 54.5% vs. 54.0%

  毛利率 54.5%，预期为 54.0

- EPS $0.71 vs. $0.61 每股收益 0.71 美元，预期为 0.61 美元
- Q3 revenue guide $410M vs. $360M

  第三季度营收指引为 4.1 亿美元，而此前为 3.6 亿美元

- Gross-margin guide 58.3% vs. 54.6%, or 63.9% excluding the held-for-sale business

  毛利率指引为 58.3%，而此前为 54.6%；若剔除持有待售业务，则为 63.9

- EPS guide $1.05 vs. $0.73

微信公众号180K

每股收益指引为 1.05 美元，而此前为 0.73 美元

- **BE +6.5%** following through on Pelosi's buy yesterday

BE 上涨 6.5%，延续了昨日佩洛西的买入势头

微信公众号 180K

- **NVDA +2%** ahead of earnings tomorrow as Clev was out positive saying they see CY27 ASPs ~+30%+ and potl'l for higher shipments given memory/BOM changes. Semianalysis also had a note talking up Open AI's Jalapeno's performance, saying it's already highly competitive with B200/B300/GB300 across multiple models, delivering ~1.5–1.9x better peak perf/watt and materially better latency/interactivity They called out **AVGO -50bps** as clear winner with with Jalapeño validating its networking, physical-design, packaging and supply-chain capabilities and potentially creating a meaningful new ASIC revenue stream. For NVDA, SA said the read-through is incrementally negative: OpenAI is no longer clearly GPU-locked, the CUDA moat looks weaker, and even getting close to Nvidia shifts negotiating leverage and could pressure long-term margins, though Rubin remains the real benchmark. Expectations have crept up into the print but consensus seems to be that the three debates holding the multiple back aren't going to change as they are 2027 issues rather than 2026: share loss to TPU and AMD, circular financing, and the gross margin trajectory beyond this year. Lots of debate on that latter point given headwinds from memory and recent de-spec'ing. In terms of timing on Rubin, checks have pointed to the first sample out about three weeks before the call with yields not that high yet & the sampling schedule held to late last month, and module mass production remains unchanged for the next months. At rack level, standard version should be out around October. Bogeys here ~$4bn beat on the $91bn guide to ~$95bn, then another $10-12bn of sequential growth guided into October, so $105-107bn. After the print, we can all do the traditional NVDA EPS ritual: take an absurdly large number and complain it isn’t larger.

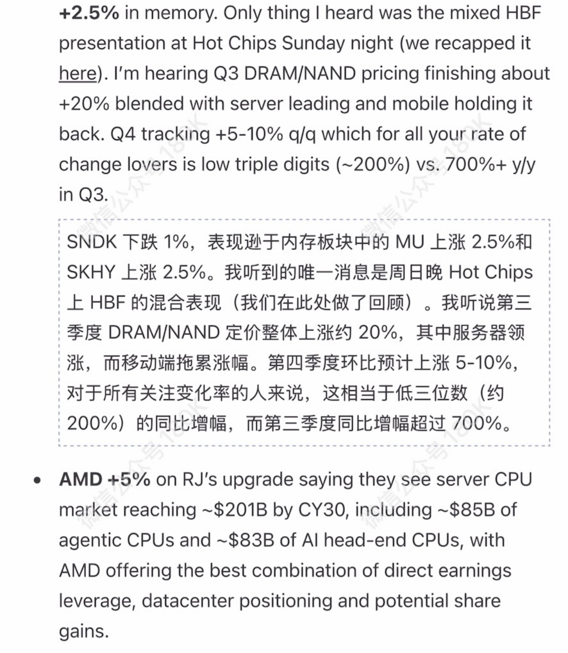
NVDA 明日财报前上涨 2%，因 Clev 发布乐观报告，认为 CY27 ASP 在 1001#基础上增长 30%以上，且由于内存/BOM 变化，出货量可能更高。Semianalysis 也发布报告看好 Open AI 的 Jalapeno 性能，称其在多个模型上已与 B200/B300/GB300 高度竞争，在 1002#上实现 1.5–1.9 倍的峰值性能/功耗优势，并在延迟/交互性方面显著更优。他们指出 AVGO -50bps 是明确赢家，Jalapeño 验证了其在网络、物理设计、封装和供应链方面的能力，并可能创造可观的新 ASIC 收入流。对于 NVDA，SA 认为该消息的传导效应逐渐偏负面：OpenAI 不再明确锁定 GPU，CUDA 护城河看似减弱，即便只是接近 Nvidia 也会改变议价杠杆，并可能施压长期利润率，尽管 Rubin 仍是真正的基准。市场预期已随财报临近而升温，但共识似乎是制约估值的三大争论不会改变，因为它们是 2027 年问题而非 2026 年问题：TPU 和 AMD 的市场份额流失、循环融资，以及今年之后的毛利率轨迹。 关于后一点，鉴于内存方面的阻

力以及近期的去规格化，存在大量争论。就 Rubin 的时间安排而言，检查显示首块样品大约在电话会议前三周流出，良率尚不高，采样计划维持至上月末，而模组量产在未来几个月内保持不变。在机架层面，标准版本应于十月左右推出。此处预测为~40 亿美元，超出~910 亿美元的指引，达到 950 亿美元，随后十月指引再环比增长 100 至 120 亿美元，即 1050 至 1070 亿美元。财报公布后，我们都可以进行传统的 NVDA 每股收益仪式：取一个荒谬巨大的数字，然后抱怨它还不够大。

- Optical strong: **LITE +7%** (CEO at DB on Thursday); **COHR +5%; CIEN +4%.** Mizuho flagged upside to **CRDO +1.7%** and **LITE** as AI rack connectivity scales. They see stronger 2027 AEC copper demand, accelerating NPO/SiPho/InP adoption, and noted potential 800V delays could extend the 400V architecture cycle, supporting near-term connectivity content.

  光学板块表现强劲：LITE 上涨 7%（CEO 周四出席德意志银行会议）；COHR 上涨 5%；CIEN 上涨 4%。瑞穗证券指出，随着 AI 机架连接规模扩大，CRDO 上涨 1.7%及 LITE 存在上行空间。该机构预计 2027 年 AEC 铜缆需求将更加强劲，NPO/硅光/磷化铟采用率将加速提升，并指出潜在的 800V 延迟可能延长 400V 架构周期，从而支撑近期连接器内容需求。

- **SNDK -1%** underperforming **MU +2.5%** and **SKHY**



+2.5% in memory. Only thing I heard was the mixed HBF presentation at Hot Chips Sunday night (we recapped it here). I'm hearing Q3 DRAM/NAND pricing finishing about +20% blended with server leading and mobile holding it back. Q4 tracking +5-10% q/q which for all your rate of change lovers is low triple digits (~200%) vs. 700%+ y/y in Q3.

> SNDK 下跌 1%，表现逊于内存板块中的 MU 上涨 2.5%和 SKHY 上涨 2.5%。我听到的唯一消息是周日晚 Hot Chips 上 HBF 的混合表现（我们在此处做了回顾）。我听说第三季度 DRAM/NAND 定价整体上涨约 20%，其中服务器领涨，而移动端拖累涨幅。第四季度环比预计上涨 5-10%，对于所有关注变化率的人来说，这相当于低三位数（约 200%）的同比增幅，而第三季度同比增幅超过 700%。

- **AMD +5%** on RJ's upgrade saying they see server CPU market reaching ~$201B by CY30, including ~$85B of agentic CPUs and ~$83B of AI head-end CPUs, with AMD offering the best combination of direct earnings leverage, datacenter positioning and potential share gains.

> AMD 上涨 5%，得益于 RJ 的评级上调，他们预计服务器 CPU 市场到 2030 年将达到约 1001#$201B，其中包括约 1002#$85B 的智能体 CPU 和约 1003#$83B 的 AI 前端 CPU，而 AMD 在直接盈利杠杆、数据中心定位和潜在市场份额增长方面提供了最佳组合。

- **STX/WDC +3**% finally getting a little love.

> STX/WDC +3% 终于得到了一点关注。

- **NBIS +5%** continues to act a lot better than **CRWV +2%** post-earnings. The latter has filled its earnings gap completely while NBIS still way above it.

> NBIS +5% 的表现继续远好于财报后的 CRWV +2%。后者已完全回补其财报跳空缺口，而 NBIS 仍远高于该缺口。

- **CLS +4% n**ice follow through from UBS upgrade yesterday

> CLS +4% 昨日瑞银上调评级后，今日表现良好，延续涨势。

- **SPCX +2%** as bulls hope for the most important KPI tomorrow: a complimentary Jensen reference ♡♡♡ to Elon .

微信公众号 180K

SPCX +2% 多头寄望于明天最重要的关键指标：Jensen 对 Elon 的一句免费赞美 ♡♡♡。

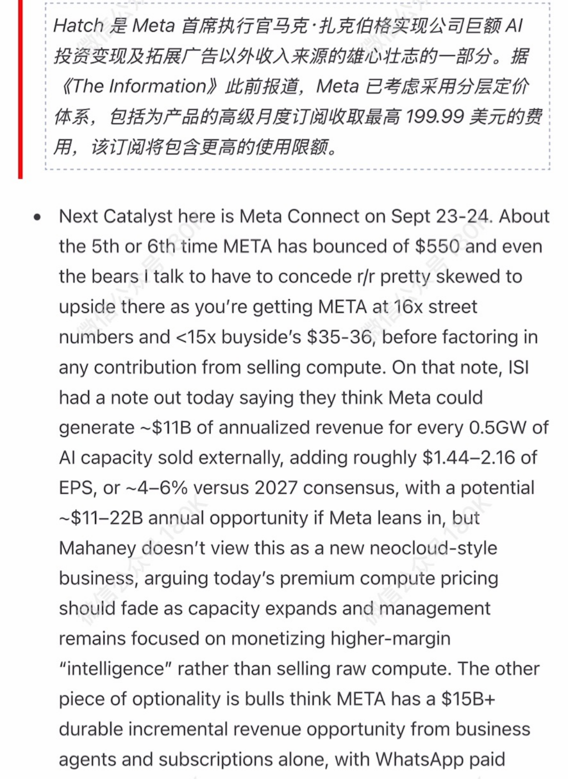
INTERNET 互联网

- **META +2%** outperforming other hypers as TheInformation reported META reportedly setting up to launch consumer AI agent called Hatch (similar to GrokBot & OpenClaw, with its next major AI frontier model Watermelon now coming out in October.

META 上涨 2%，跑赢其他超大规模科技股，据 TheInformation 报道，META 据悉正筹备推出名为 Hatch 的消费级 AI 代理（类似于 GrokBot 和 OpenClaw），其下一个重大 AI 前沿模型 Watermelon 将于 10 月发布。

> *Hatch is part of Meta Chief Executive Mark Zuckerberg's ambitions to monetize the company's enormous AI investments and diversify its revenue streams beyond advertising. Meta has considered a tiered pricing system, as The Information previously reported, including charging up to $199.99 for a premium monthly subscription for the product that would include higher usage limits.*

微信公众号 180K



> *Hatch 是 Meta 首席执行官马克·扎克伯格实现公司巨额 AI 投资变现及拓展广告以外收入来源的雄心壮志的一部分。据《The Information》此前报道，Meta 已考虑采用分层定价体系，包括为产品的高级月度订阅收取最高 199.99 美元的费用，该订阅将包含更高的使用限额。*

- Next Catalyst here is Meta Connect on Sept 23-24. About the 5th or 6th time META has bounced of $550 and even the bears I talk to have to concede r/r pretty skewed to upside there as you're getting META at 16x street numbers and <15x buyside's $35-36, before factoring in any contribution from selling compute. On that note, ISI had a note out today saying they think Meta could generate ~$11B of annualized revenue for every 0.5GW of AI capacity sold externally, adding roughly $1.44–2.16 of EPS, or ~4–6% versus 2027 consensus, with a potential ~$11–22B annual opportunity if Meta leans in, but Mahaney doesn't view this as a new neocloud-style business, arguing today's premium compute pricing should fade as capacity expands and management remains focused on monetizing higher-margin "intelligence" rather than selling raw compute. The other piece of optionality is bulls think META has a $15B+ durable incremental revenue opportunity from business agents and subscriptions alone, with WhatsApp paid penetration still only ~2.5% & Cloud/API monetization would be additional upside.

> 下一个催化剂是 9 月 23-24 日的 Meta Connect。这大约是 META 第五或第六次在 550 美元附近反弹，即使是我交流过的空头也不得不承认，风险回报比在那里相当偏向上涨，因为你以 16 倍街边预期和不到 15 倍买方预期的 35-36 美元价格买入 META，这还没算上出售算力可能带来的任何贡献。关于这一点，ISI 今天发布了一份报告，称他们认为 Meta 每对外出售 0.5GW 的 AI 算力，就能产生约 11 亿美元的年化收入，每股收益增加约 1.44 至 2.16 美元，相对于 2027 年共识预期增长约 4%至 6%，如果 Meta 全力推进，潜在年机会可达 110 亿至 220 亿美元，但 Mahaney 并不认为这是一个新的类 Neocloud 业务，他认为当前溢价算力定价应随产能扩张而消退，管理层仍专注于将更高利润率的“智能”变现，而非出售原始算力。另一个可选性因素是，多头认为 META 仅从商业代理和订阅中就有 150 亿美元以上的持久增量收入机会，WhatsApp 付费渗透率仍仅为 2.5%，而 Cloud/API 变现将是额外的上行空间。

- **AMZN/GOOGL -35bps** continue to lag. Nowak at MS had a note out on TPUs raising its first-party TPU pricing assumption to ~$27B/GW from $20B and now sees ~$84B/$108B of TPU-related Cloud revenue in 2027/28, lifting total Google Cloud revenue estimates by ~6%/~7%. Nowak now expects Cloud to reach ~48% of company EBIT by 2028, although lower-margin TPU sales

微信公众号 180K

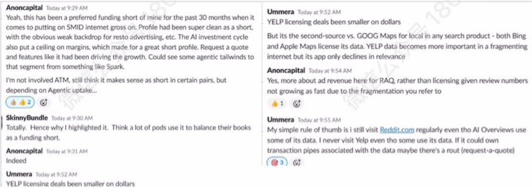
keep Cloud margins around ~37–40%. On AMZN, Trn checks continue to sound strong - hearing original expectation around 1M for 2H which is being revised up and Trn 2 + Trn 3 now around close to 2.7M.

> AMZN/GOOGL 下跌 35 个基点，继续落后。摩根士丹利的诺瓦克发布了一份关于 TPU 的研报，将其第一方 TPU 定价假设从 200 亿美元上调至~270 亿美元/GW，并预计 2027/28 年 TPU 相关云收入将达到~840 亿/1080 亿美元，将谷歌云整体收入预期上调~6%/~7%。诺瓦克目前预计，到 2028 年，云业务将占公司 EBIT 的~48%，尽管利润率较低的 TPU 销售使云业务利润率保持在~37–40%左右。在 AMZN 方面，Trainium 的渠道检查持续表现强劲——听闻下半年最初预期约为 100 万，目前正在上调，而 Trainium 2 和 Trainium 3 现在合计接近 270 万。

- **RDDT +6%** as TI called it out as part of a broader group Hatch is trained to access, including **DASH, ETSY, & YELP**. Jefferies was out saying **RDDT** data mixed: app growth is accelerating, but web DAUs slowed to +5% as AI Overview/referral headwinds persist, which is fodder for the bears. Some interesting back and forth on **YELP** and **RDDT** in TMTB Slack:

微信公众号180K

RDDT 上涨 6%，因为 TI 将其列为 Hatch 可访问的更广泛股票组的一部分，包括 DASH、ETSY 和 YELP。Jefferies 发表观点称 RDDT 数据喜忧参半：应用增长正在加速，但网页日活跃用户增速放缓至 5%，因 AI 概览和推荐流量逆风持续，这为看空者提供了素材。TMTB Slack 频道中就 YELP 和 RDDT 展开了一些有趣的来回讨论：



Anoncapital Today at 9:29 AM

Yeah, this has been a preferred funding short of mine for the past 30 months when it comes to putting on SMID internet gross on. Profile had been super clean as a short, with the obvious weak backdrop for resto advertising, etc. The AI investment cycle also put a ceiling on margins, which made for a great short profile. Request a quote and features like it had been driving the growth. Could see some agentic tailwinds to that segment from something like Spark.

I'm not involved ATM, still think it makes sense as short in certain pairs, but depending on Agentic uptake...

👍 👍 2

SkinnyBundle Today at 9:30 AM

Totally. Hence why I highlighted it. Think a lot of pods use it to balance their books as a funding short.

Anoncapital Today at 9:31 AM

Indeed

Ummera Today at 9:52 AM

YELP licensing deals been smaller on dollars

Ummera Today at 9:52 AM

YELP licensing deals been smaller on dollars

But its the second-source vs. GOOG Maps for local in any search product - both Bing and Apple Maps license its data. YELP data becomes more important in a fragmenting internet but its app only declines in relevance

Anoncapital Today at 9:54 AM

Yes, more about ad revenue here for RAQ, rather than licensing given review numbers not growing as fast due to the fragmentation you refer to

👍 1

Ummera Today at 9:55 AM

My simple rule of thumb is i still visit Reddit.com regularly even tho AI Overviews use some of its data. I never visit Yelp even tho some use its data. If it could own transaction pipes associated with the data maybe there's a rout (request-a-quote)

3

TMTB Slack

- **SHOP +2.5%:** Liked this quote from Sam Altman yesterday on Tobi:

SHOP +2.5%：喜欢昨天 Sam Altman 关于 Tobi 的这段话：

> *One of the things that struck me the most about Toby is in the very early days of AI, and then at every moment along the curve [as] it's developed, he has been the most forward-leaning CEO. He's in there, like writing the software himself. He is experimenting with it. He, like, sends us extremely detailed feedback on the product offering, on the capabilities of the models. He was before anybody else [was] saying this, he was like, we are not an NPC company, and thus we are going to adopt agents. Otherwise, you know, we're totally screwed. We're going to build it ourselves. Every time I talk to him, he is at the edge of what anyone, CEO or not, is doing.* ***He builds himself, he understands, he has like a great deep feel, and he is always six, eight months ahead of like any other CEO.***
>
> *最让我印象深刻的一点是，在人工智能的早期阶段，以及随后发展的每一个节点上，Tobi 始终是最具前瞻性的 CEO。他亲自参与其中，甚至自己编写软件，亲自进行实验。他会给我们发送极其详细的产品反馈，涵盖产品功能和模型能力。他比任何人都更早地提出：我们不是一家 NPC 公司，因此我们将采用智能体。否则，你知道的，我们彻底完蛋了。我们要自己构建这一切。每次我和他交谈，他都站在所有人——无论是不是 CEO——所做事情的最前沿。他亲自构建，他理解透彻，他有着极其深刻的感知力，而且他总是比其他任何 CEO 领先六到八个月。*

- **NFLX +3%** as Wolfe said Q weakness was largely driven by a light release slate rather than deteriorating underlying demand, with 3Q content looking materially stronger and supporting better 2H engagement/subscriber trends (they raised PT to $95 from $84)

  > Wolfe 表示，奈飞（NFLX）上涨 3%，其季度疲软主要源于发布内容较少，而非潜在需求恶化，且第三季度内容明显更强劲，有望支撑下半年更好的用户参与度和订阅趋势（他们将目标价从 84 美元上调至 95 美元）

SOFTWARE 软件

- **DT +2%** as MS upgraded saying they are next in line to reaccelerate in a much healthier observability market, with a FY27 renewal cohort ~50% larger than FY26 and ~70% weighted to 2H, while underlying usage is already growing >20%. MS thinks this can push net-new ARR and total ARR back above 20% growth, with platform expansion across logs, AI and autonomous operations adding wallet-share upside.

> DT 上涨 2%，因摩根士丹利上调评级，称其将在健康得多的可观测性市场中成为下一家重新加速增长的公司，其中 FY27 续约客户群~比 FY26 大 50%，~70%集中在 2H，而底层使用量已增长超过 20%。摩根士丹利认为，这有望推动净新增 ARR 和总 ARR 重回 20%以上的增长，同时平台向日志、AI 和自主运维扩展，将增加钱包份额的上行空间。

- **SNOW -2%:** more positive checks from sell side as expectations creeping up into earnings on possibly most loved stock in sw. Early bogies of roughly 36–37% for the July quarter, ~38% for October and 40% exiting in the January quarter.

> SNOW 下跌 2%：卖方传来更多积极反馈，市场对这只可能是软件板块最受青睐的股票的财报预期正在升温。7 月季度的早期预期约为 36-37%，10 月季度为 38%，1 月季度结束时预期达到 40%。

- **U -2.5%** doing a little digest around $45 Intra q checks still look good and should get a better read near beginning of Sept.

> U -2.5% 在 45 美元附近小幅消化，盘中检查仍表现良好，预计 9 月初会有更清晰的信号。

- Cyber weaker **PANW -3%/ CRWD -3%** as have heard

微信公众号 180K

some investors express concern Anthropic will be on the road promoting its own cybersecurity products given the security talent Anthropic has hired both to build products and to sell into cyber peer plays.

> 网络安全板块走弱，PANW -3% / CRWD -3%，有投资者担心 Anthropic 将开始推广自家网络安全产品，因其已聘请安全领域人才，既用于产品开发，也用于向网络安全同行销售。

- **MSFT +1%** hanging in there better than the other hyperscalers

> MSFT +1% 表现相对坚挺，优于其他超大规模云厂商。
