

Mid-Year Prospects

Technology, Media and Telecommunications - Key Investor Feedback

This report forms part of the J.P. Morgan Australia Mid-Year Prospects series as we take stock at the mid-point of 2026 and addresses the key questions posed by investors following the release of our report highlighting Top Picks and Least Preferred stocks for the remainder of the year.

Top Pick – Megaport (MP1 AU, OW)

- **MP1's compute business carries higher counterparty risk vs. global peers.** MP1's compute customer-base is aligned to end-user adoption of AI applications. While global AI compute peers can skew to serve the frontier AI Labs, MP1's customers are predominantly AI application providers that will scale as a variable cost with end-user adoption. Importantly, the emergence of open-weight model development is also supportive of compute as a service demand. MP1's low-duration compute contract structures also de-risk any longer-term customer exposure.
- **2H26 guidance was soft, and GTM re-investment implies weaker margins into FY27.** At the 1H26 result, MP1 flagged re-investment into the GTM function driving margin compression into 2H. Management at the time cautioned against extrapolating core networking H2 margins into FY27. We would consider the GTM function re-investment to be a necessary up-front operating expense to drive longer-term growth in both the core networking and compute business. Ultimately, however, we would also expect the growth in the compute business to dilute the impact of FY27 guidance on the stock price.
- **The compute business is more capital intensive, and MP1 will be constrained on financing and access to hardware.** The Latitude.sh acquisition does make MP1 a much more capital intensive business. However, hardware is purchased on a short-duration payback period (for both contracted capacity and the GPU Pool), and priced to a rate of return informed by the cost/supply of hardware. On financing, funding is in place post-raise to finance the announced contracts and on-demand GPU pool. Going forward, MP1 will likely lean more heavily on debt financing, which we expect will be able to de-lever quickly given the EBITDA cash payback period of investment.

Least Preferred – Wisetech Global (WTC AU, N)

- **The stock has already sold off and will not de-rate further.** WTC's stock has de-rated materially to ~18x PE and ~11x EBITDA on an FY28 (post cost-out) basis. We are Neutral rated on the stock, and do not see material downside to the multiple at these levels. However, we also expect the softer revenue growth outlook and corporate governance overhang will remain a headwind to a re-rate in the stock.

- **The company has taken steps to refresh the board, which reduces the governance risk of the stock.** We agree that WTC has taken steps to refresh the board of directors given risk from a governance perspective. Richard White has stepped-down as Executive Chairman, and the board is now majority independent. However, Richard White still owns ~34% of shares, and our feedback would suggest that the marginal investor still remains cautious given the overhang that remains on the stock from a governance perspective.
- **The Cargowise Value Pack (CVP) transition will re-accelerate revenue growth.** Over 95% of WTC's customers have transitioned over to the new CVP commercial model, albeit with some remaining on the prior model under 'transitional pricing protection' (TPP). Large customers on multi-year contracts will remain on the prior Seat Plus Transaction (STL) model until contract expiry. Market feedback would suggest a material (10-30% on average) like-for-like pricing increase, although that varies materially subject to the customer's prior use of Cargowise. We therefore do anticipate the transition will contribute to Cargowise revenue growth, although 1) DSV comments would indicate revenue loss as the company transitions away from Cargowise, which we estimate could reflect a 5-10% revenue loss, and 2) we do not expect CVP alone will be sufficient to see revenue growth recover to >20% over the medium-term, given a historical ~11ppt contribution from LGFF seat roll-out, ~6ppts from product enhancements reflected in price, and ~4ppt from new product releases. We believe near-term upside on Cargowise revenue growth would be driven by large customers transitioning onto the CVP ahead of expectations, which we would consider to be unlikely given the like-for-like price increase that the CVP model would imply.

Investment Thesis, Valuation and Risks

Megaport Ltd (Overweight; Price Target: A\$28.00)

Investment Thesis

Megaport (MP1) is a global Software Defined Network (SDN) provider with an emphasis on cloud connectivity. The company acquired Latitude.sh in late 2025 to enter the on-demand compute market. The combined business is now rapidly scaling into CPU and GPU compute to become a globally distributed inferencing cloud to service the rapidly growing demand from AI. MP1's distributed architecture and focus on smaller but highly accretive compute deployments differentiates the platform from 'neoclouds' by accelerating deployment. We are constructive on the stock and have an OW recommendation, as we expect further earnings upside from additional AI-related contract wins.

Valuation

We set our Jun-27 price target of A\$28 broadly in-line with our SOTP EV/EBITDA valuation.

Risks to Rating and Price Target

Key upside catalysts and downside risks include:

- **Sales momentum:** MP1 is highly leveraged to the pace of top-line growth, with the company targeting sustainable 20%+ growth from FY30 onwards.
- **Supplier (i.e., data centre) neutrality:** MP1 relies on increasing its data centre footprint to add more services and cloud on-ramps into its network. However, MP1's offering also competes against data centres. There is a risk that more operators will see MP1 as a threat and limit MP1's ability to build scale.
- **Technology:** Cloud and SDN are rapidly evolving technology sectors. MP1's offering is predicated on leveraging the growth of cloud adoption and keeping ahead of industry trends. There is a risk of future changes to how businesses connect and utilise the cloud.
- **Competition:** MP1's offering disrupts traditional interconnection businesses (telcos, data centre operators) and competes with a number of similar startups. Changes in the competitive environment could have an impact on pricing and revenues for MP1.
- **M&A execution risk:** MP1 has made its largest acquisition with Latitude.sh, which significantly increases the TAM, but also shifts the business into the competitive compute-as-a-service segment, which increases its capital intensity. Execution on integration and achieving revenue growth targets remain key risks.
- **CPU and GPU demand:** MP1 is highly leveraged to the demand for CPU and

increasingly GPUs as the company transitions into a globally distributed inferencing cloud business. This market is highly sensitive to supply vs demand of CPUs and GPUs which could positively or negatively impact rental rates and ultimately ROIC.

Investment Thesis, Valuation and Risks

WiseTech Global *(Neutral; Price Target: A\$40.00)*

Investment Thesis

WTC is a global leader in logistics services software. The company develops, sells and implements software solutions that allow logistics services providers to efficiently facilitate their operations. WTC has demonstrated an ability to grow profitably and is building a cloud-based SaaS platform that has high barriers to entry and a long runway for growth.

- **Building a global logistics platform that has high barriers to entry** – International trade and logistics typically involve numerous counterparties and occur over various jurisdictions. WTC's CargoWise One platform is being adopted by logistics operators to solve the issue of sharing data both internally and externally. WTC has 10 of the world's 25 largest freight forwarders on global rollouts, whilst the remainder are already customers. Over time, we believe the platform will have a network effect that will lead CWO to become a "standard" for the industry.
- **Increasing TAM on the back of new product launches** – Additional growth will come from WTC's new product launches. WTC has historically been strong in the supply chain execution market (TAM US\$4.7bn in 2019), and we believe there is an opportunity for WTC to expand into the broader supply chain software management segment (TAM US\$15bn+), which would significantly increase WTC's TAM.
- **Aligned to growth in global trade e-commerce** – WTC's revenue model is aligned to the growth of its customers, and we believe WTC will benefit from the ongoing growth in international trade and e-commerce, which is expected to support long-term market growth rates of ~4-5% p.a.

Valuation

Our Dec-26 PT of A\$40 is set equal to our DCF-based valuation. We use a three-stage DCF in which we forecast explicit cash flows to FY35, followed by a five-year horizon where FCF fades to our terminal growth rate of 3.5%. Key inputs: Beta 1.2, WACC 9.2%, TGR 3.5%.

Risks to Rating and Price Target

Key upside catalysts/downside risks include:

- Major client contract wins/losses, leading to increased/reduced churn.
- A slowdown/acceleration in global trade and shipping/freight volumes.
- Regulatory changes that require a significant re-write of code, leading to write-offs and impairment to existing intangibles.
- CWO cloud platform outages.
- Changes to the competitive environment from other logistics specialists.
- Slower-/better-than-expected take-up of new modules.
- Key person risk, with Richard White a key driver of business strategy.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
