Another top-line acceleration to +32% and a major raise to the FY26 outlook are clear evidence that AI is invigorating the core business while the company continues to win among AI-natives. We think shares have room to run as DDOG gets valued as an outright AI beneficiary vs. an Observability leader

Key Takeaways

- Revenue growth accelerated once again to +32% in Q4 (~5% above cons.) reflecting the strongest usage growth since 1Q22 and record qtr in net-new ARR
- The outlook was more impressive with high end of Q2 guide coming in at +31% vs cons of +20% and high end of FY26 guide coming in at +27% ahead of cons of +20%
- Core business (ex AI-natives) accelerated for 3rd quarter in a row to mid-20% as AI initiatives fuel cloud migrations and digital transformation initiatives
- Strong momentum among AI-natives continues with large customers ramping usage and the company announcing 2 large deal with research labs
- Stay OW and raise PT \$225 as we believe DDOG status is elevating to an outright AI winner from an Observability leader

The AI Tailwind Becomes Abundantly Clear. The trigger for our January upgrade to Overweight (**Key Pillars of Demand on the Upswing**) was the acceleration in the core business (ex AI-natives) fueled by the return of cloud migrations and digital transformation initiatives. This theme continued into Q1 as the core business accelerated for the 3rd quarter in a row to mid 20% YoY from +23% in 4Q25 and from +20% in 3Q25. This core business strength is being further amplified by a growing roster of AI-natives including a large AI-native signed in 4Q25 that began ramping in Q1. This twin combination of a steadily improving core and a hyper-growth AI-native business resulted in the best quarter we have seen from Datadog

in many years, evidenced by: 1) revenue growth accelerating to +32% from +29% in 4Q25; 2) the highest QoQ growth for a Q1 since 1Q22 (+6%); 3) the strongest QoQ usage growth since 1Q22; 4) an all-time record for net-new ARR added in a quarter; and 5) a record for new logo average deal size. Furthermore, momentum with AI-natives continues as the company landed two large deals – a seven-figure and an eight-figure annualized deal – with the AI research divisions at two of the world's largest technology companies. We believe these customer did not contribute materially to Q1 results but should be a driver of sequential dollar growth for the balance of 2026.

Biggest Raise in Top-Line Guidance in Years That Still Screens Conservative. The context heading into Q2 is that ARR growth accelerated in each month of Q1 and this trend continued into April. Given strong starting ARR balanced heading into Q2, management guided revenue to \$1.07-\$1.08 billion implying YoY growth of +29-31% well ahead of consensus looking for growth of +20%. The midpoint of Q2 revenue guidance implies QoQ growth +6.9% – more than double the 4-year average of +3.3%. Looking to the full year, 2026 revenue guidance was raised to \$4,300-\$4,340 million from \$4,060-\$4,100 million and implies growth of +25-27% from +18-20% prior. Despite a \$240 million raise to FY26, guidance implies 2H26 growth slowing to +23% YoY from more than 30%+ in 1H26 – an assumption that we believe will prove conservative given the momentum in the core business, continued ramping of existing AI-natives and contribution from recently signed AI research labs

Estimates Move Higher on Strong Q1 Beat and Large Raise to 2026. We raise our 2026/2027/2028 revenue estimates by +6-7% to \$4.34/\$5.28/\$6.51 billion implying YoY growth of +27%/+22%/+23% compared to +19%/+21%/+23% prior. Our 2026/2027/2028 non-gaap operating margin estimates now stand at 22.6%/23.4%/24.6% from 21.1%/22.1%/24.6%. Lastly our 2026/2027/2028 FCF estimates increase to \$1.06/\$1.36/\$1.73 billion from \$0.94/\$1.21/\$1.62 billion, previously.

Remain OW and Raise PT to \$225 from \$180. On the back of these results, we are raising our estimates and applying a higher valuation multiple to arrive at our updated price target. Specifically, we apply a 53x CY28 FCF/share multiple, or 2.2x growth-adjusted, to our CY28 FCF/share estimate of \$4.41 and discount back one year. Our price target implies 15x CY27 Sales (0.6x growth-adj), representing a premium to the large-cap mean of 8x (0.4x growth-adj). We believe this premium is warranted as Datadog status is elevating to an outright AI winner from an Observability leader.

Risk Reward – Datadog, Inc. (DDOG.O)

Core Growth Improves as Digital & Cloud Migration Initiatives Return

PRICE TARGET \$225.00

Apply a 53x multiple (2.2x growth-adjusted) to our CY28 FCF/share estimate of \$4.41 (\$1.7 billion FCF, 27% margin), and discount back 1yr. Our PT implies 15x CY27 Sales (0.6x growth-adj), which represents a premium to Large-cap mean 8x (0.4x). We believe a premium is warranted given it's the leading share gainer in a large category, its highly efficient business model, and status as an outright AI winner.

OVERWEIGHT THESIS

Leading Product in a Growing Market Supports Continued Rapid Growth. Datadog has positioned itself as the leading observability platform for the most modern cloud environments. Strong secular tailwinds towards modern performance monitoring with the re-platforming to the cloud creates an underpenetrated TAM that we estimate at \$90+ billion today

BULL CASE

\$300.00

61x CY28e FCF/sh of \$5.21, discounted back 1yr.

Datadog Becomes The Consolidation Vendor in The Observability Market, While Security and ITSM Expansion Ramps. We assume that Datadog grows total revenue at a ~28% 3-yr revenue CAGR through CY28 to \$7.1B while operating margins improve to 27%, yielding \$2B of FCF (29% margin) or \$5.21/share. Applying 61x multiple to CY28 FCF/sh and discounting back 1yr at ~11% WACC yields \$300

BASE CASE

\$225.00

53x CY28e FCF/sh of \$4.41, discounted back 1yr

Continued Leading Position in Observability Combined with Superior Unit Economics Drive Strong FCF. We assume that Datadog grows total revenue at a ~24% 3-yr revenue CAGR through CY28 to \$6.5B while operating margins improves from 22% in CY25 to 25%, yielding \$1.7B of FCF (27% margin) or \$4.41/share. Applying 53x multiple to CY28 FCF/sh (2.2x growth-adjusted) and discounting back 1yr at ~11% WACC yields our price target of \$225

BEAR CASE

\$100.00

27x CY27e FCF/sh of \$3.55, discounted back 1yr.

Intensifying Competition Weighs on Growth and Margins. We assume that Datadog grows total revenue at a ~18% 3-yr revenue CAGR through CY28 to \$5.6B while operating margins deteriorates to 23%, yielding \$1.4B of FCF (25% margin) or \$3.55/share. Applying 27x multiple to CY28 FCF/sh and discounting back 1yr at ~11% WACC yields \$100

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution
