Semiconductors | North America

Takeaways from public company meetings on our bus tour

We summarize positive meetings with CEOs of ALAB, MRVL, INTC.

Key Takeaways

- ALAB remains confident in the scale-up opportunity both short and long term
- Marvell showing new levels of confidence about everything, especially scale-up
- Intel CEO shows commitment to foundry, positive on microprocessors
- Private company writeups coming later this week – focus on scale-up and low-latency inference

ALAB

Management expects content per XPU to continue growing from roughly ~\$1,000 today as AI infrastructure becomes more interconnect-intensive. The company is investing across optical, UAL, and NVL, and highlighted that customers are increasingly describing Astera's large PCIe switch as an "NVSwitch for the open ecosystem."

While some workloads and protocols will move elsewhere, PCIe is expected to continue growing for at least the next several years. PCIe remains particularly important in China, where many AI systems are add-in-card-based and therefore PCIe-native. Management sees China as a meaningful opportunity because less powerful GPUs require more interconnect, though it does not expect China to be larger than the U.S. in PCIe scale-up.

For the emerging UAL opportunity, management is confident in its competitive position but does not think the switch opportunity will be winner takes all. First deployments expected next year, with a bigger ramp in 2028.

CXL and memory pooling are still nascent, but management sees growing relevance as inference drives KV-cache offload demand. CXL has not lived up to expectations so far, but management expects revenue in 2027, with both smaller AI platform providers and hyperscalers qualifying systems. Management also noted demand from customers wanting to use DDR4 via CXL to extend server memory lifespans as new CPUs do not support DDR4 directly.

On CPO / NPO, management argued that the most important factor is owning a switch product that optics can attach to. Astera demonstrated PCIe 6 over LPO at Computex and expects NPO deployments first in 2027. If NPO works, it may push out CPO for some customers, while NVDA can move directly to CPO. Astera's

Industry View

Attractive

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

aiXscale acquisition is expected to generate qualifying revenues in 2027, while CPO for scale-up is more likely a 2028 opportunity at minimum, with perhaps one customer earlier. The company sees an advantage from having electrical IC, PIC, and aiXscale capabilities to produce a full optical engine.

Despite optical enthusiasm, management expects copper to remain relevant inside the rack. Many scale-up links are passive today and may only add retimers, while rack-to-rack connectivity will move to optical because 400G rack-to-rack cannot be copper. This transition should be positive for revenues: even if retimer content is lost when links move to NPO, as the new optical link is materially more valuable. Astera believes its incumbent position in copper links, Cosmos software, and broad suite of standard-specific products reduce the risk of share loss.

Strategically, management contrasted Astera's focus with companies that "invest in everything." Astera is focused on areas where it believes it can win, including a ~\$10bn UAL TAM and NVL Fusion content. The company could build scale-up Ethernet switches, but customers are currently asking it to focus on PCIe. Management framed the 2030 market as roughly \$10bn PCIe TAM and \$10bn Ethernet TAM, with NVL and ICI solutions likely among the largest parts of a broader >\$100bn market, though not quantified.

On custom silicon, management sees opportunities from new XPUs and NVL Fusion. The company wants solutions for all major architectures and is willing to do custom I/O. NVL Fusion is its first custom engagement in this category, but management noted many more requests. ASIC vendors like AVGO will still have influence, through COT programs the hyperscaler can enforce their preferred scale-up architecture.

In-house SerDes development intended to intercept the optical inflection. Management wants to be selective about where it invests in custom SERDES, but sees a need around optical, and has the internal team in place. The company's philosophy is to buy IP off the shelf where available to improve opex efficiency, but build internally when required.

Our take: We are OW the stock, and remain very positive heading into the Amazon Trainium 3 scale-up ramp in 2h, and see positive prospects to migrate that to UALink/NVLink Fusion/optical opportunities longer term, though conceding that the strong run-up in the stock price creates a high bar.

Marvell

Marvell framed the AI opportunity as increasingly interconnect-driven, today most growth is coming from scale-out but there is a significant scale-up / scale-across opportunity still ahead. The company's model contemplates custom growing from ~\$4bn to ~\$10bn, legacy segments starting at a ~\$2.5bn base growing roughly with GDP, and ~\$10bn of connectivity growing ~70% with no near-term slowdown. Management also noted that none of the potential agentic-AI CPU uplift is included in current numbers; more agentic workloads could drive additional NICs, CXL, and switches.

The core message was that Marvell's breadth is becoming a competitive advantage. The company positioned itself as one of the few vendors spanning DCI, die-to-die IP, scale-out switching, scale-up switching, optics, SerDes, CXL, NICs, and custom silicon. Management argued this full-stack position matters more as customers confront constrained supply chains and the complexity of integrating switches, optics, third-party IP, and XPU.

On scale-up, Marvell sees multiple optionality vectors across UAL, ESUN, and NVL Fusion. Management framed scale-up switching as still up for grabs, but scale-up optics as an area where Marvell expects to be number one in merchant solutions. The company also argued that customer preference for non-AVGO alternatives should support Marvell's position, particularly where software, silicon, and optical integration matter.

On XPU, management sees the potential for upside to its medium-term targets, cautioned investors on over-extrapolating supply-chain datapoints. It continues to focus on higher-margin custom opportunities and believes inference creates more shots on goal.

On supply chain, Marvell says it runs five-year rolling forecasts with suppliers and is getting upside, with interconnect providing more flexibility than custom compute.

Our take: The enthusiasm and confidence both short and long term are very clear, and seem justified to us; however we struggle with the valuation at 2.5x NVDA multiple for a company that has not outgrown NVDA in a long while.

Intel

For new CEO Lip-Bu Tan, the initial priority was cultural now that focus has shifted toward finding ways to grow the business and executing on the product roadmap.

In CPUs, management highlighted the hiring of Alex Katouzian as important for improving low-power competitiveness and deepening Arm-related expertise.

There were definite changes to be made to the server roadmap, such as bringing back SMT and the P-core / E-core distinction. But management is more confident in the roadmap today, emphasizing that execution is the key variable; if Intel executes, management believes the company can stop losing share in roughly nine months. Agentic AI should be a long-term driver of CPU demand, suggesting that CPU/GPU ratios could reach 4:1 in some contexts.

The x86 ecosystem remains an area of strength Intel is leaning into, where there is potential in vertical markets where x86 customization creates differentiation, which is not something Intel has considered historically.

Lip-Bu has also made the decision to do double down on foundry, believing that the internal product engine and external foundry business should reinforce each other, while external manufacturing remains part of the model where appropriate. Intel wants to remain a top-10 TSMC customer, but believes having both internal and external options create healthy competitive tension and improve customer confidence.

14A is the critical foundry milestone. Management said all Intel-designed products will move to 14A, and early process indicators are improving. Intel is seeing roughly 0.5 defect density and ~40% yield, with a goal of reaching 0.1-0.2 defect density by Q1 next year. Customer conversations are improving and PDF/KLA support was highlighted as part of the effort to accelerate foundry readiness. The 14A 0.5 PDK is out and 0.9 is expected in October. Risk production is framed around 2028 and volume around 2029, broadly comparable to TSMC timing. As an IDM, Intel expects to run internal test chips in 2027, which should give the company a proving ground before external customer volume ramps.

Given the shortage at the leading edge, Lip-Bu said the board is now asking Intel to invest more in capex and that the message has been received. The board is more confident than before, but Intel still needs to prove that incremental spend can translate into customer wins, volume, and margin recovery. Initially, management suggested volume is more important than margin, particularly in foundry, where scale and customer confidence are prerequisites.

On capacity, Intel said Oregon and Arizona have room to expand, and Ohio will be accelerated. Germany has been shut down, but management is now concerned Intel may not have enough capacity if demand continues to improve. TerraFab was discussed as a potential additional platform, though nothing has been announced.

Management also described EMIB as a “secret weapon” with strong technology and large customer potential, but also meaningful complexity and reliability questions. Individual customer opportunities could be worth billions, but execution depends on building the right team, improving automation, and proving reliability at scale.

Management sees advanced packaging as a potential bottleneck across the AI infrastructure ecosystem, which could create an opening for Intel if it can execute. Intel also noted substrate constraints, including the need to prepay in some cases.

We note that our recent Asia checks were a bit mixed on EMIB, and some of the current wins being reported have yet to be completely secured.

The memory shortage is also a focus area for Intel and its partners. Intel does not have the balance sheet of a company like NVDA to secure DRAM, but management said the company needs to be more aggressive in this area.

Our take: We have missed the move in Intel's stock, largely because of concerns on the roadmap, which we still have; we think expectations of share gains vs. AMD seem premature, given AMD's stated ability to procure more wafers for its leadership Venice product. That said, shortages of advanced process nodes, and shortages of CPUs, are certainly a positive backdrop for near-term earnings.

Valuation Methodology and Risks

Astera Labs Inc (ALAB.O)

We use 0.53x CY27 EV/sales/growth (~21x ev/sales), assuming a 40% revenue CAGR. This is a premium to AI peers

Risks to Upside

- Increase AI spend to propel data center revenue
- Quicker upgrade of underlying technology driving content growth
- New product launches increasing TAM

Risks to Downside

- Increased competition reduces Astera's market share meaningfully
- Pause in AI spend and data center investment halts future revenue growth
- CXL servers and 1.6T port speeds are significantly delayed, preventing new products from gaining traction

Intel Corporation (INTC.O)

~42x EPS CY2027 EPS of \$1.73, 42x is above the high end of the large cap logic semi peer group, reflecting high leverage potential on numbers that are still depressed, and foundry optionality, despite our longer term skepticism

Risks to Upside

- Foundry partnerships de-risk the story and further improve the multiple
- The company regains lost share in desktop and server following CPU shortages

Risks to Downside

- AMD competition increasingly becomes more significant, which could lead to further share losses in processors and pressure on ASPs
- Minimal success in foundry leads to an inflated cost structure

Marvell Technology Group Ltd (MRVL.O)

~40X CY27e Base Case MW EPS \$4.98, in-line with high growth AI semis

Risks to Upside

- AI opportunities (Inphi optical businesses) realize earlier than expected
- Cloud custom silicon projects are larger than expected
- The storage market recovers

Risks to Downside

- AI opportunities are smaller than expected
- The strength we estimate for Storage and Networking surprise to the downside
- Enterprise DC and Networking continue to weigh on results

Important Regulatory Disclosures on Subject Companies

As of May 29, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Advanced Micro Devices, Aeva Technologies Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Aeva Technologies Inc, Analog Devices Inc., Broadcom Inc., Cerebras Systems, GlobalFoundries Inc, Intel Corporation, NXP Semiconductor NV, ON Semiconductor Corp., Semtech Corp.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cerebras Systems, Intel Corporation, IonQ Inc, Micron Technology Inc., NXP Semiconductor NV, ON Semiconductor Corp., Semtech Corp., Texas Instruments.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Advanced Micro Devices, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Advanced Micro Devices, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc, Cerebras Systems, Silicon Laboratories Inc..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of May 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1542	42%	465	51%	30%	707	43%
Equal-weight/Hold	1571	43%	369	40%	23%	723	44%
Not-Rated/Hold	3	0%	0	0%	0%	1	0%
Underweight/Sell	551	15%	86	9%	16%	201	12%
Total	3,667		920			1632	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Micron Technology Inc., NVIDIA Corp.. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited (https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf) and the following link to review the audit report (<https://ny.matrix.ms.com/eqr/research/webapp/researchdocs/>

[MSICPL_Morgan_Stanley_Research_Audit_Report.pdf](#).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
