Meaningful upside from Google TPU projects ahead

MediaTek's share price hit limit-up today. We believe the market is starting to recognise that concerns about Google TPU delays were unfounded and is shifting focus to the potential upside in 2027. Previously, discussions around MediaTek's TPU project largely centered on strong 2027 demand, with the key bottleneck being TSMC's capacity support. With TSMC now accelerating CoWoS expansion, we believe MediaTek and TSMC are likely to reach an agreement to secure 2027 3nm and CoWoS capacity, which could provide meaningful upside to MediaTek's 2027 TPU revenue. Our base case assumes NT\$9-10bn in TPU revenue contribution in 2027, which already makes our EPS forecast 17% above consensus. If finalised, we see TPU revenue reaching US\$16bn, driving EPS to NT\$150 and likely prompting another round of upward revisions. We reiterate our High Conviction Outperform rating with a TP of NT\$2,454.

- ❑ **TPU Zebrafish schedule remains unchanged with US\$2bn revenue contribution in 2027.** As mentioned in our *Backloaded year* report, there will be minimal metal-layer modifications to improve compute performance and address signal integrity issues, with tape-out likely in the coming weeks. If executed as planned, the revised design could still align with the original mass-production schedule. We forecast MediaTek's TPU revenue to reach US\$1.5-2bn in 2026, beating the guidance of US\$1bn.
- ❑ **More upside to 2027 TPU sales.** We believe MediaTek is currently in negotiations with TSMC to secure advanced-node and advanced packaging capacity for TPU in 2027. Our base case assumes TPU revenue reaches NT\$9-10bn in 2027, translating into EPS of NT\$112, already 17% above consensus. If these negotiations are finalised - which we view as highly likely given TSMC's recent acceleration in CoWoS capacity expansion - we see meaningful upside. In this scenario, TPU contribution could reach US\$16bn in 2027, driving EPS to NT\$150.
- ❑ **Next-generation TPU Humufish provides further upside.** We believe the market is underestimating the contribution from Humufish. Given its more complex design and larger die size, we estimate Humufish ASP could be about 3x that of Zebrafish, with revenue contribution potentially reaching around US\$20bn in 2028.
- ❑ **Maintain High Conviction Outperform.** We see further upside to 2027 EPS, supported by strong TPU demand and potentially increased wafer and CoWoS supply. Even in our base case, our 2027 EPS forecast is 17% above consensus. Following the recent reset in smartphone expectations, we expect the market to gradually lift TPU forecasts as visibility improves and attention shifts towards 2027. We reiterate a High Conviction Outperform rating with a TP of NT\$2,454, based on 22x 2027 PE.

Valuation details

We use PE as our valuation methodology as IC design fabless companies typically deliver higher growth, and we believe the market will focus primarily on its earnings outlook. We have previously used a historical PE range to value MediaTek based on our evaluation of the company's product cycle at the time. Our valuation is about +1sd of its five-year average to reflect decent EPS growth driven by new segments and market share upside in high-end smartphones.

Investment risks

1) Worse-than-expected smartphone demand globally; 2) a greater-than-expected impact from share loss in the smartphone SoC market; 3) higher wafer prices.
