2026 DASH Takeaways: Becoming The De-Facto Observability Platform For The Agentic Era

We attended Datadog's DASH user conference in New York City, where we spoke to many of the company's partners and customers. While there were no financial updates, the company presented a slew of intriguing product innovations. Mgmt. spoke at length about autonomous operations (its Bits AI agent suite) and observing and securing the AI stack, emphasizing that AI has accelerated system complexity and that Datadog's AI-infused platform provides coverage up and down the AI stack. The most interesting innovations that are now GA include Bits Code and Bits Chat, Infinite Cardinality Metrics, and Agent Console, and products worth highlighting that are not yet GA include Federated Logs, multiple autonomous Bits AI Agents, Patterns in Agent Observability, AI Guard for Coding Agents and AI Guard Agent Discovery, among several others. We also heard some intriguing points from partners and customers that reinforced our view on Datadog's observability-security integration advantage, though the company still has some work to do to gain mindshare with security-focused buyers.

Bottom line: We came away from the conference feeling confident in Datadog's market-leading position and ability to sustain >30% revenue growth for the foreseeable future. DASH 2026 once again highlighted Datadog's R&D prowess, which has created a high bar of innovation and product velocity that competitors have not yet been able to match – and the company's impressive product depth and breadth make it a strong option for enterprises and AI-native companies alike in an agentic world. While DDOG has ripped higher YTD, we maintain our Outperform rating and raise our PT to \$265 (from \$225) based on an ~19x CY27 EV/Sales multiple (from 16x). Feel free to reach out if you would like to discuss our partner color in more detail and see inside for an overview of the key product announcements and our partner checks.

Takeaways From Datadog DASH 2026

Product Announcements Highlight Rapid Pace of Innovation

Datadog unveiled 100+ new capabilities at DASH 2026 that underscore the company's accelerating pace of product innovation. The company doubled down on autonomous operations (its Bits AI agent suite), shored up its underlying metrics and logging platform with new log and metrics innovations, announced new solutions leveraging Datadog's capacity to overlay observability with security data, and broadened its coverage up and down the AI Agent stack. We highlight the key announcements below:

Key Themes:

- 1) **Bits AI Is Gaining Significant Depth and Breadth:** Datadog's Bits AI agent suite expanded well beyond root-cause investigation to cover detection, diagnosis, remediation, code, release and testing — addressing many more use cases and serving multiple personas (SREs, developers, security analysts, and data and business teams), all within user-defined guardrails. **Bits AI is already used by 3,000+ organizations (including Nasdaq), and Bits Chat is used by thousands of organizations.**
- 2) **A Two-Way AI Strategy: "AI For Datadog" vs. "Datadog For AI":** "AI for Datadog" uses Bits to enhance Datadog's own platform for its users (Bits Chat, Detection, Memories, Remediation, Infrastructure Operations, Code, Release, Testing and Database Optimization) and "Datadog for AI" points outward, helping customers observe and secure their own AI stacks (models, agents, GPUs and data; products include Bits Data Analysis, Bits Evals and the Bits AI Security Analyst, alongside AI Guard and Agent Observability). **Demand for the latter is rising fast, with LLM spans sent to Datadog up more than 30x over the past year (May 2025–May 2026).**
- 3) **Data Foundation, Sovereignty and Cost:** Datadog is shoring up logs/metrics with Federated Logs, BYOC Logs and Infinite Cardinality Metrics. These products let Datadog handle petabyte-scale log volumes and very high-cardinality metrics while keeping costs predictable and ensuring data-residency and compliance needs are met. **We believe handling petabyte and high-cardinality environments is precisely what rival Chronosphere was built for and a key reason Palo Alto acquired it, so these launches directly shore up a perceived investor concern.**
- 4) **Observability and Security Are Converging:** Runtime context (live application traces and infrastructure signals) is positioned as the differentiator behind Datadog's security and AI-agent protection products — for example AI Guard and a Runtime Prioritization Engine can cut vulnerability noise by more than 95%.
- 5) **Platform Breadth Reinforces The Consolidation Thesis:** Announcements spanned apps, infrastructure, networks, databases, data lakes, AI agents and security on one platform (33,000+ customers, 62% of the F500, and "10 of 10" top AI companies cited as proof points), which we believe sets Datadog apart from competitors and makes it a unique asset. Datadog's product compounding story was evident — product leaders discussed several products that became GA in 2025 or early 2026, including BYOC Logs, Flex Logs, Bits AI SRE, Data Observability, and AI Guard (core), and many of the new products outlined below that are becoming GA now or are in preview build on top of or complement these recent innovations to address a wider variety of use cases.

Partner and Customer Takeaways Reinforce Datadog's Platform Advantage

We spoke with multiple Datadog partners and customers on the floor. Overall, we came away positive on product uptake and Datadog's market-leading position, though customers flagged a few watch-items around log management, AI focus and feature discoverability. We highlight the following:

- 1) **Integrated Observability And Security Is The Core Differentiator:** A partner who leads global managed-security and managed-Datadog services said Datadog's edge is the seamless interplay between observability and security on a single platform: "I don't think that anybody does observability as robustly as Datadog." Cloud SIEM is the typical entry point,

and value compounds as customers pivot between observability and security data. He contrasted this with point leaders: “CrowdStrike’s a security company. Datadog is a good observability company... if you’re looking for one place where you can overlay everything, it’s not going to be CrowdStrike.”

- 2) **Brand And Security Mindshare — Not Product — Is The Gating Factor:** A second expert on security buying dynamics said the product is strong but trust lags: “The product itself holds up very well. It’s the brand recognition, the name, security experience that’s still not there.” Datadog must build credibility with security leaders (CISOs) to win larger, strategic security deals.
- 3) **Engineers Drive The Buying Decision And Consolidation Is A Tailwind:** Buying splits across CIOs (budget), CISOs (sign-off) and engineers (product evaluation), but engineers carry outsized influence — so the winning motion targets them: “You got to bring the context to the engineers, not force the engineers to come to you.” AI is broadening tooling decisions and accelerating vendor consolidation as costs rise (“the thing that’s made it more intertwined is AI... it’s leveled up the conversation into a much broader conversation”), a dynamic that favors integrated platform players like Datadog.
- 4) **Rapid Feature Cadence And Roadmap Transparency Build Conviction:** A partner highlighted an unusually fast release cycle since DASH 2025 and praised Datadog’s candor about the gaps it is still closing: “they’re kind of aware of the gaps... they’re like, yeah, we know we don’t do this, but we have a plan to get there.”
- 5) **Customers Are Excited By AI Observability and Tighter Integration of Acquired Tech (Cross-Sell):** A customer using Datadog Real User Monitoring (RUM) and session-replay was most enthusiastic about the new AI observability: “I think the AI observability... is very interesting.” The customer also noted that Datadog has now fully integrated Eppo — the feature-flag and A/B-testing company it acquired in 2025 — into the core platform: “right now everything integrates together so that opens up a lot of opportunities.”
- 6) **But Customers Flagged Discoverability:** Customers cited feature discoverability as a point for improvement: “one of the problems I have is that it’s very hard to discover all the features they have.”

Products Now Generally Available (GA)

Logs and Metrics

- 1) **Infinite Cardinality Metrics:** Lets customers track metrics in far more detail (for example, broken down by individual customer, user, AI model or region) without the usual cost blow-up, because pricing is based on the number of metrics and the data volume rather than how many unique combinations are tracked. This matters as AI workloads generate an explosion of detail.

Bits AI Autonomous Operations

- 1) **Bits Code:** This is a coding agent that turns any problem Datadog finds — errors, performance issues or security flaws — into a proposed code fix, grounded in real production data rather than guesswork. It is built into the tools engineers already use and works across most of the platform.
- 2) **Bits Chat:** This is a plain-English assistant for asking questions about dashboards, getting insights and triaging incidents; **Bits Chat is already used by thousands of organizations.**

Database And Networking

- 1) **Bits Database Optimization:** Finds slow database queries, tests a faster version against a copy of the customer’s data to prove it addresses the issue, then proposes the fix — this is essentially database tuning without needing a specialist (part of Database Monitoring).
- 2) **Network Path Comparison View:** Shows the route network traffic takes and compares it before versus after a problem, so teams can quickly see where a slowdown started.
- 3) **Network Device Health:** Continuously checks the health of network equipment, flags the issues that matter most by business impact before they spread, and points to the exact change to undo.
- 4) **Network Configuration Management:** When a network problem starts, it identifies the exact equipment-setting change that caused it and lets teams reverse it with one click.

Observe The AI Stack

- 1) **Agent Console:** Gives engineering leaders one view of how AI coding tools (Claude Code, Cursor, Copilot) are used across the company — who uses them, where they help, and how much they cost versus the output they produce.

Secure The AI Stack

- 1) **AI Guard for Custom Agents:** Protects a company's own AI agents in real time, blocking attacks that trick an agent into leaking sensitive data or misusing its access.
- 2) **Bits AI Security Analyst:** An AI security analyst that investigates alerts on its own by gathering evidence and reasoning across signals. It was already generally available with Datadog's security monitoring product (Cloud SIEM) and now, it can work on top of SIEMs from other vendors.

Products In Preview or In Limited Availability**Logs**

- 1) **Federated Logs:** Lets teams search log data stored in other systems (Databricks, ClickHouse, Amazon S3) directly from Datadog using one common search, instead of jumping between tools.

Bits AI Autonomous Operations — Ops

- 1) **Bits Detection:** Automatically sets up and maintains monitoring for new or changed services, learning what "normal" looks like instead of relying on manually set thresholds.
- 2) **Bits Memories:** Remembers a team's past incidents, fixes and notes (from runbooks, postmortems and Slack) so the AI can apply knowledge gained in the past to new problems.
- 3) **Bits Remediation:** Carries out the fix after diagnosing a problem — running scripts or proposing code changes — but only within the limits a team sets.
- 4) **Bits Infrastructure Operations:** Automatically resolves common infrastructure problems (for example, servers running out of memory or expiring security certificates) before they cause outages, and flags risky changes before they ship.

Bits AI Autonomous Operations — Devs

- 1) **Bits Release:** Checks every code change from start to production — testing it and watching the rollout — to confirm it works as intended and catch problems early. This matters as more and more code is written by AI.
- 2) **Bits Testing:** Automatically creates and maintains the tests that verify an app works, exploring the app on its own so the tests don't break every time the interface changes.

Bits AI Data and Observability

- 1) **Bits Data Analysis:** Answers plain-English business questions — revenue, churn, sales pipeline — from a company's data and can explain why a number changed (for example, tracing a revenue dip to a specific software release). It draws on Data Observability (Datadog's data-quality and lineage product, already generally available) and Product Analytics for context.
- 2) **Patterns in Agent Observability:** Automatically groups how people are using a company's AI app in production and highlights how certain usage patterns are driving errors or pushing costs higher.
- 3) **Bits Evals:** Automates the tedious work of testing and improving AI agents — spotting failures and suggesting fixes — so engineers spend less time digging through logs.

Secure The AI Stack

- 1) **Runtime Prioritization Engine:** Cuts security-alert overload by about 95% by ranking vulnerabilities on real risk and routing only the few that matter to the right team.
- 2) **AI Guard for Coding Agents:** Extends AI Guard protection from custom agents to the AI coding assistants developers use (Claude Code, Cursor, Codex). For example, this product could block a malicious add-on that tries to steal a developer's credentials.

- 3) **AI Guard Agent Discovery:** Automatically finds every AI agent running in a company's environment and flags any that are unprotected or connecting to unapproved AI services.
- 4) **Bits Threat Hunting, API Testing for AAP, and AI-Native SAST:** Additional security tools including automated threat hunting, security testing for APIs, and AI-based scanning of source code for vulnerabilities.

User Experience and Networking

- 1) **Journey Monitoring:** Tracks complete user journeys (for example, login through checkout) and flag drop-offs or failures even when standard dashboards look healthy — bridging the gap between the business and engineering views.
- 2) **Network Remediation with Bits (L7 to L1 Visibility in APM Traces):** AI-assisted network troubleshooting that traces a problem from the app all the way down to the specific piece of network equipment, explains it in plain English, and lets teams undo the bad change in a single click.

VALUATION METHODOLOGY

Our PT is based on an EV / revenue multiple

RISKS

Near-term macro headwinds can pressure quarterly revenue growth; DDOG's success with Infrastructure Monitoring may be difficult to translate into other categories including APM, network monitoring, and cloud security; DDOG must continue innovating rapidly in the space given the high level of fragmentation within the Observability category; Continued increase in interest rates could weigh on valuation

ANALYST CERTIFICATION

The analyst, Kirk Materne, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: <https://evercoreisi.mediasterling.com/disclosure>.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.

In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.

Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.

Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*

Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

GENERAL DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA") and by International Strategy & Investment Group (UK) Limited ("ISI UK"), which is authorized and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Inc.

This report is provided for informational purposes only and subject to additional restrictions contained in this disclosure. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by employees of affiliates of Evercore. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information.

Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore or its affiliates and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates.

Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel. Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research.

Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Evercore ISI does not provide individually tailored investment advice in research reports. The financial instruments discussed in this report are not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. This report has been prepared without regard to the particular investment strategies or financial, tax or other personal circumstances of the recipient. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to the recipient's individual circumstances, or otherwise constitutes a personal recommendation to the recipient. None of Evercore Group or its affiliates will treat any recipient of this report as its customer by virtue of the recipient having received this report.

Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Please note that this report was prepared for and distributed by Evercore ISI to its institutional investor and market professional customers.

Recipients who are not institutional investor or market professional customers of Evercore ISI should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Electronic research is simultaneously distributed to all clients. This report is provided to Evercore ISI clients only and may not be, in whole or in part, or in any form or manner (i) copied, forwarded, distributed, shared, or made available to third parties, including as input to, or in connection with, any artificial intelligence or machine learning model; (ii) modified or otherwise used to create derivative works; or (iv) used to train or otherwise develop a generative artificial intelligence or machine learning model, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement with the aforementioned limitations in use.

This report is not intended for distribution to or use by any person or entity in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Evercore Group or its affiliates to any registration or licensing requirement within such jurisdiction. If this report is being distributed by a financial institution other than Evercore ISI or its affiliates, that financial institution is solely responsible for such distribution and for compliance with the laws, rules and regulations of any jurisdiction where this report is distributed. Clients of that financial institution should contact that institution to effect any transaction in the securities mentioned in this report or if such clients require further information. This report does not constitute investment advice by Evercore ISI to the clients of the distributing financial institution, and neither Evercore ISI nor its affiliates, nor their respective officers, directors or employees, accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

Evercore is not authorized to act as a financial entity, securities intermediary, investment advisor or as any other regulated entity under Mexican law, and no actions, applications or filings have been undertaken in Mexico, whether before the National Banking and Securities Commission (Comisión Nacional Bancaria y de Valores "CNBV") or any other authority, in order for Evercore to carry out activities or render services that would otherwise require a license, registration or any other authorization for such purposes; neither is it regulated by the CNBV or any other Mexican authority. This document, nor its content, constitutes an offer, invitation or request to purchase or subscribe for securities or other instruments or to make or cancel investments, nor may it serve as the basis for any contract, commitment or decision of any kind.

For persons in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This report must not be acted on or relied on by persons who are not relevant persons.

For persons in Switzerland: The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

For persons in Australia: Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

For persons in New Zealand: This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisors and wholesale clients only and has not been prepared for use by retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 ("FMCA")). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: <https://evercoreisi.mediasterling.com/disclosure>.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: <https://evercoreisi.mediasterling.com/disclosure>.
