Yageo hosted its 3Q25 result call on Oct 30th, with key takeaways including:

(1) Yageo guided a stronger than seasonality 4Q25 revenue outlook at flat QoQ (vs. normal seasonality of down 5-10% QoQ) thanks to the strong AI demand. Moreover, Yageo believes its 3Q25 GM/OPM will go up a bit in 4Q25 with better high margin AI business exposure.

(2) Yageo announced its AI revenue exposure at 10-12%. While the key product is the tantalum capacitor, the company also does some magnetic components / MLCC / R-Chip, but is not the major supplier.

(3) For tantalum capacitor, the company continues to see surging demand resulting in a supply shortage, which leads to a better pricing outlook and the company's expanding investment in new capacity (10-20% capacity expansion in Mexico).

(4) Except for tantalum, the company sees no pricing hike opportunity for rest of its product lines, but believes the demand recovery is happening for all kinds of passive components, which should eventually lead to better revenue outlook.

(5) Company believes China/Asia based distributors' inventory level is at ~3 months only (vs. 10-11 months a year ago), and that the distributors have finished their inventory digestion targets. Moreover, Yageo believes the distributors will start to build up inventory considering better demand outlook, making a much better BB ratio for most of the products.

(6) For automotive demand, the company continues to see solid demand from the China market, despite the weak demand conditions in the European auto market. For industrial market, the company has seen weak demand for the last 12-18 months already, but started to see slowly improving demand from European

industrial customers, and expects demand to see YoY improvement in 2026.

Investment view

We maintain our positive view on Yageo's business outlook in long term, considering the company's on track progress on transformation to a high-end passive component supplier, with multiple product lines for customers to select the best solution for their products. Moreover, we are positive on the company's statement on better demand from the broad-based market, suggesting a much better pricing/utilization rate/profitability outlook for the company. Specifically, Yageo mentioned its AI related business revenue was 10-12% in 3Q25, which is the first time it has surpassed 10%, which could drive the overall revenue momentum more significantly in coming quarters/years, with better pricing momentum outlook.

In the short to mid term, we believe the recovering demand from most electronics and AI related sectors, as well as the improving global channel inventory build up demand, will continue to drive the company's revenue/profitability, and the commodity base passive component has a high pricing elasticity on demand, which could be a key upside risk to the company's product demand in coming quarters.

Maintain Buy on Yageo with a new 12-m TP of NT\$265 (up from NT\$150).

3Q25 overview

Yageo's 3Q25 core business was 7/11% higher than GSe and BBG consensus thanks to the higher AI content demand, with better pricing performance for the key tantalum capacitor business that drove the company's OPM to be 1.7/1.5ppt higher than GSe/BBG consensus. Moreover, 3Q earnings was 12/12% higher than GSe/BBG consensus with NT\$600mn+ non-OP profit and the better than expected core business performance.

Earnings revisions

We revise up our 2025/26/27E earnings estimate by 6/43/53%, considering the much better than expected demand growth rate from all kinds of passive components (revise up 2025/26/27E revenue estimate by <1%/22%/33%), with better pricing outlook for tantalum capacitor and all kinds of commodity passive component, while the operation leverage will continue to suggest better EPS outlook (revise up 2025/26/27E OPM by

0.9/3.8/3.9ppt).

Valuation and risks

We reiterate our Buy rating on Yageo with a new 12m TP of NT\$265 (from NT\$150), based on the new 15.0x 2026 PB/ROE (up from 12.8x 2025-26 average PB/ROE; in-line with the company average multiple during passive component upcycle periods, as we believe the market is now back in an upcycle, during which we should continue to see solid earnings growth in coming quarters/years), after factoring in our earnings revision.

Key downside risks: (1) weaker inventory builds from OEMs; (2) softer IT end-demand; and (3) slower-than-expected integration of Kemet/Chilisin/Telemecanique.

Investment thesis and Valuation & Risks

Yageo, as the third largest MLCC and largest resistor / tantalum capacitor supplier globally, should see a more stable earnings trend in the future, underpinned by its product upgrade and expansion strategy and more diversified product portfolio given the recent Kemet and Chilisin acquisitions. Yageo continues to penetrate into the high-end MLCC market (especially automotive/EV, industrial and high-end computing), which has a better S/D outlook compared to the commoditized market. Also, high-end MLCC market demand visibility is much clearer, with a more stable pricing trend, which suggests a less volatile earnings outlook. We hold a positive view on Yageo, given it is the

supplier with the broadest product portfolio, which should help the company increase its market share by cross-selling and up-selling. Valuation offers attractive risk-reward with shares trading below historical multiples. Key downside risks: (1) weaker inventory builds from OEMs; (2) softer IT end-demand; and (3) slower-than-expected integration of Kemet/Chilisin/Telemecanique.

Our 12m TP of NT\$265 is based on a 15x average 2026E PB/ROE (2x STDV higher than past 10-year industry average of 11.5x; in-line with upcycle average valuation). Key downside risks: (1) weaker inventory builds from OEMs; (2) softer IT end-demand; and (3) slower-than-expected integration of Kemet/Chilisin/Telemecanique.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company neither has a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
