

ASMedia Technology Inc.

Near-term outlook still suffering from end demand weakness

ASMedia reported 2Q26 results, with a GM miss but EPS supported by higher non-op investment income from the WT Micro contribution. Looking into 2H26, the revenue outlook will continue to suffer from weakening PC and DIY motherboard market demand, offsetting the initial contribution from its new PC chipset, PCIe and robotic projects, while GM will also be pressured by higher costs from the supply chain. As for the next chipset project (expected in 2H27), ASMedia remains confident about maintaining its dominant supply position, especially in high-end DIY motherboard applications. Despite the near-term fundamental downturn, we still like the company's longer-term growth potential, with more meaningful contributions from its high-margin new businesses and continued technology/product enhancement.

- 2Q26 review.** Reported 2Q26 core earnings missed consensus by 4%, given a weaker GM and bigger revenue decline, while EPS was a beat thanks to stronger-than-expected investment income from WT Micro. GM of 50.3% was below both JPMe and consensus of 51.3%, owing to higher costs across the supply chain.
- 2H26 outlook.** We revise down our 2H26 estimates and model the 3Q26 and 4Q26 revenue to be -9% QoQ and flat QoQ, respectively, mainly given weaker motherboard chipset demand, despite initial contribution from its new PC and AI projects. In terms of GM, we reduce both our 3Q and 4Q26 estimates to the 50-52% level to reflect higher pressure from increasing supply chain costs (especially from OSAT cost increases). However, the non-op investment income from WT Micro should continue to support ASMedia's bottom-line earnings.
- Implications.** We reduce our 2026 and 2027 operating income estimates to reflect the weaker MB demand outlook and higher GM pressure from supply chain cost hikes. Nevertheless, our 2026 EPS estimate is largely unchanged, while 2027E EPS is 8% higher, after factoring in WT Micro's stronger investment income contribution. Our Dec-26 PT remains at NT\$2,100, based on an unchanged sum-of-the-parts (SOTP) valuation methodology, reflecting 30x 2027E EPS for the core business (largely in line with the historical average) plus a 10x P/E for its non-operating investment income from WT Micro.

ASMedia Technology Inc. (5269.TW, 5269 TT) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Dec 08, 2017. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
