

MediaTek Inc.

Upsizing TPUv9 Humufish expectations; strong messaging on long-term growth at Analyst day; Raise PT to NT\$5300

We raise our Jun-27 SoTP PT on MediaTek to NT\$5300 (12x for core earnings and 40x for Datacenter ASIC, reflecting stronger growth in 2028-29 for v9 Humufish), reflecting stronger growth in 2028 for TPU v9 Humufish after our checks reveal recent changes in product planning from the end customer. We believe that MediaTek's v9 project, Humufish, is now emerging as the primary v9 family project in 2028-29, while Broadcom could continue working on an extension of the Sunfish v8 platform (with 4 N3-based Sunfish compute dies). For TPU v10, we believe that the current RFQ process has Broadcom, MediaTek and two other vendors in the process, but MediaTek's smoother execution with v9 could put it in a stronger position, as Google tries to strike a balance between IP readiness and lower silicon costs. MediaTek's Pre-Computex Analyst day also outlined strong prospects in datacenter solutions, stretching from XPU to interconnect solutions, custom HBM and full-rack level enablement, while also indicating strong engagements on new XPU projects with most hyperscalers. Key catalysts from here on are (1) indications of a larger role with TPU v9 if EMIB-T packaging execution goes on track, (2) announcement of new customers before the end of the year – we believe Meta, Tesla, etc., are key potential candidates, (3) expansion of the datacenter TAM to include interconnect solutions and rack-level implementation for customers beyond the top 4 CSPs.

- TPUv9 opportunity likely to be larger, reflecting changes in Google's roadmap planning:** We raise our TPU v9 revenue estimate to US\$25bn in 2028 from US\$19bn, driven by recent shifts in Google's roadmap. Our supply chain checks suggest that MediaTek's Humufish (4 N2 compute dies, 3 I/O dies, and 12 HBM4e stacks) appears to be emerging as the primary v9 family project in 2028-29, while Broadcom may continue working on an extension of the Sunfish v8 platform (with 4 N3 Sunfish compute dies) and push out its 2nm TPU ramp timeline. Based on our research, Google appears to be becoming more conscious of costs (MediaTek solutions are at least 40-50% cheaper, in our estimate due to lower margins and lack of HBM bundling), and securing more control over design (compute die is designed by Google's in-house team), even though the IP may be slightly inferior (MediaTek v9 should be still on 300G Serdes, while Broadcom PumaFish was originally scheduled to be on 400G Serdes). If MediaTek becomes the primary partner in the v9 generation, this should drive further demand upside and also help cement its position within the Google TPU food chain. We now expect datacenter ASIC revenue to grow 170%+ YoY in 2028, with ASICs likely to account for 59% of MediaTek's total revenue in 2028, up from 36% in 2027, driven primarily by strong v9 shipment growth and higher ASPs.

Summary Investment Thesis and Valuation

Investment Thesis

We are Overweight on MediaTek, given (1) MediaTek's v9 TPU project (Humufish) appearing to emerge as the primary v9 family in 2028-29, (2) MediaTek's smoother execution with v9 positioning it well to maintain its leadership in v10 competition, and (3) solid prospects in datacenter solutions, ranging from XPU's to interconnect solutions, custom HBM and full-rack level enablement, with strong engagement for new XPU projects from most hyperscalers. Key catalysts from here on, in our view, are (1) indications of a larger role with TPU v9 if EMIB-T packaging execution goes on track, (2) the announcement of new customers before the end of the year – we believe Meta, Tesla are key potential customers, (3) the expansion of the datacenter TAM to include interconnect solutions and rack-level implementation beyond the top 4 CSPs.

Valuation

Our Jun-27 PT of NT\$5300 is based on a SoTP valuation (12x 12M fwd core earnings + 40x 12M fwd ASIC-related earnings, reflecting stronger growth in 2028-29 for v9 Humufish), reflecting stronger growth in 2028 for TPU v9 Humufish after our checks reveal recent changes in product planning from the end customer.

- **EMIB-T-based Humufish progressing as Plan A; a final packaging decision likely in 4Q26:** We believe MediaTek is developing both CoWoS-L and EMIB-T packaging solutions for Humufish, which helps mitigate execution risk for TPU v9. That said, EMIB-T remains the primary approach (Plan A), in our view, with a final decision on packaging expected in 4Q26. Given tight CoWoS-L supply at TSMC, there is potential for MediaTek to assume a larger role in TPU v9 and enable a higher-volume ramp, if EMIB-T execution goes on track. Currently, EMIB-T package yields are still low (we believe 90+% for standard EMIB packages with 6-8 silicon bridges), while the Humufish chip is likely to require 25+ silicon bridges.
- **TPU v10 in RFQ stage, the v9 roadmap change and push towards Semi-CoT strengthens MediaTek's hand:** We believe TPU v10 is now at the RFQ stage, with MediaTek, Broadcom, and two other vendors (we believe Alchip and Marvell) in the candidate pool. Meanwhile, the recent v9 roadmap change – positioning MediaTek's Humufish as the primary v9 project – has effectively recognized MediaTek's stronger execution capability, putting the company in a better position for next-generation TPU, in our view. As Google seeks to balance IP readiness with higher control over chip design and lower silicon cost, we see the current semi-COT model (where Google handles compute dies while MediaTek is responsible for I/O dies, SerDes, and back-end design) as a favorable trend for MediaTek.
- **New custom ASIC customers likely to come through in the next 6 months:** We see an increasing probability that MediaTek will win new ASIC projects in the next six months (we believe Meta and Tesla are the primary candidates among large CSP customers) from 3-4 ongoing RFQs for datacenter ASICs. While these projects would be smaller than TPU (a few hundred million vs multi-billion for TPU), we believe they would help MediaTek build a more diversified customer base and validate its IP and execution capabilities beyond a single customer program.
- **Analyst day highlights strength of the Datacenter solutions tech suite and customer interest:** MediaTek held a pre-Computex analyst day on May 29th. Management presented a data center opportunity spanning the full solution stack – from custom XPU to interconnect, custom HBM, and rack-level enablement. Management indicated that MediaTek now sees almost every XPU RFQ and offers more than 10x reticle-size packaging in complex XPU designs, supported by both TSMC CoWoS and Intel EMIB, depending on client preference. The AI ASIC revenue outlook was reiterated at US\$2bn for 2026, scaling to 10-15% of a US\$70-80bn TAM in 2027. Beyond XPU, MediaTek is investing in custom HBM technology for training workloads, custom SRAM libraries and LPDDR expertise for inference, and co-packaged optics (including its Ayar Labs investment and partnership with Microsoft on microLED). The interconnect portfolio spans on-package (UCIe, Mlink), on-board (PCIe SerDes, microLED), and off-board (high-speed Ethernet SerDes, NPC/CPC, co-packaged optics), positioning MediaTek for system-level integration that helps customers balance packaging, thermal, connectivity, and process-node trade-offs to achieve performance and TCO targets. A key strategic angle is a partnership with NVIDIA to provide ASIC templates integrated with NVLink at the rack level, enabling next-tier CSPs (beyond the top-four hyperscalers) to accelerate custom-silicon time to market.
- **Computing may emerge as a new driver, given renewed focus on Datacenter CPUs, growth in Chromebooks and upcoming N1X launch:** MediaTek's compute business (Dimensity CX) crossed US\$1bn in revenue in 2025, growing 80% YoY. The Chromebook franchise is scaling rapidly, with market share rising from 8% in 2023 to 30% in 2025 and likely reaching 50%+ in 2026 – positioning MediaTek as the top Chromebook AI compute supplier. In addition, the company will begin supporting Googlebook, designed for Gemini intelligence. Strong interest was also noted in NVIDIA's DGX Spark running on MediaTek silicon, helping enterprises contain GenAI token costs on-premise. Meanwhile, the IoT business sees over 35% CAGR potential,

with a 5x growth trajectory in US/EU markets; management characterized it as a future billion-dollar business. Management emphasized strong potential for edge devices following the surge in agentic AI demand, and MediaTek expects to benefit from synergies in leveraging smartphone IP – particularly advanced-node expertise and communications technology – into higher-ASP compute products. We also expect NVIDIA to finally launch its N1X Windows notebook CPU at Computex, in partnership with MediaTek, which could act as a new driver for growth. MediaTek's strong expertise with ARM CPUs should also eventually result in a foray into the datacenter CPU market in the medium-term, especially given strong CPU demand from agentic workloads.

- **Automotive remains an important long-term diversification focus:** Management presented Dimensity AX as a comprehensive automotive platform spanning cockpit (including C-series with NVIDIA GPU integration via CoWoS), connectivity (telematics, WiFi-8, Bluetooth, NR-NTN), and components (PMIC, GNSS, DDIC, ISP, etc.). MediaTek has 20+ partnerships with leading automakers and 190+ projects with 35 million+ chips deployed, and is co-designing next-gen ADAS systems with Denso in Japan, while maintaining strong design wins in China, EU, and US. The company frames the shift from software-defined vehicles (SDV) to AI-defined vehicles (AIDV), requiring multimodal sensing, proactive services, and prefill compute – positioning the cockpit as "another important computing platform". Silicon content per vehicle is growing approximately 15-20% annually, and a 2nm cockpit SoC is expected very soon, per management. We believe auto remains a strong long-term driver, despite still-small contribution today (JPMe low-single-digit contribution in 2026)

Please see below for the notes from Pre Computex Analyst Day .

Table 1: Google TPU roadmap

MediaTek Pre-Computex Event

Opening

- **Evolution**
 - 2014: B2C
 - 2018: B2C2E
 - 2025: B2B
- **B2C**
 - Dimensity: Mobile
 - Dimensity CX: Compute
 - Dimensity AX: Auto

Joe Chen, MTK President/ COO

- **Semi TAM**
 - 2026 Semi TAM is very likely to cross \$1tn for the first time and \$1.5tn as per some analyst's estimate for 2027
 - Generative AI (GAI) is the main driver and accounts for 30% of global revenue
- **MTK diverse growth engine: from edge to cloud**
 - 2020: \$60-70bn+ TAM
 - Growing opportunities: \$200bn+ TAM
 - Agentic AI will accelerate the edge product refreshment cycle
 - Auto - increasing number of customers have recognized our solutions - will be another important computing platform in our view
- **Agentic demand**
 - 4G - smartphones were the killer application
 - 5G - IoT was the killer application
 - 6G - GAI token-based traffic will be the killer application
- **Vision – Hyper Computer Architecture**
 - Public cloud providing model training / inference at scale
 - Billions of AI edge devices as access points for end users to reach cloud compute
 - Devices chosen dynamically: use local inference when possible; relay to cloud when model too large
 - Connectivity is the critical link throughout – WiFi 8 and 6G are the last-mile of

AI infrastructure

- Goal: unified agentic AI experience across all daily scenarios (shopping, working, learning)

Vince Hu, MTK SVP, DC & Compute Business Group

- **Business group include**
 - DC solutions
 - Both custom silicon and standard products for not only DC but also networking
 - Compute
 - Dimensity CX
 - The PC market with SoC - incl. SoC for PC monitors, CPU for portable computing like Chromebook/Google book
 - IoT
 - GENIO
- **DC solution**
 - Key pillars
 - Tech Leadership
 - Strong IP portfolio
 - Partnership with global supply chain
 - Strategic engagement model
 - Rev outlook
 - 2026: \$2bn
 - 2027: 10-15% of the \$70-80bn TAM (TAM timeline pulled forward from 2028 to 2027)
 - Innovation in Custom Silicon
 - Started from networking - enterprise switch launched in 2016
 - 2020 developed world largest inFO 91*91 sqm
 - We have a strong SerDes team
 - Launched 224G
 - We have higher rate SerDes product that hasn't been announced yet but has been evaluated by our clients

- **xPU**
 - We are seeing almost every xPU RFQ now
 - We have more than 10x reticle size packaging in the complex xPU we offer
- **Packaging**
 - Support strong CoWoS to clients, and also EMIB on clients' request
 - Near package connectivity, and co-package
 - Now investing in new capability incl. co-package optics
 - STCO (system technology co-optimization): helps customers trade off packaging / thermal / connectivity / advanced process node to hit perf/TCO goals – supports higher gross margins for MTK
- **Memory**
 - Almost 50+% of the BOM and a significant portion of power consumption
 - Training seeing HBM utilize quite a bit, now seeing trend for using custom HBM technology - and we're investing for our own custom HBM technology
 - Inference trend toward SRAM and LPDDR - here we bring a lot of value as we have our own custom SRAM library, and have a lot of LPDDR in our own standard product offering, special value to customers - and we have a decent relationship with memory makers and help clients secure memory
 - Future: investing in compute-near-memory and near-memory compute – aggressive roadmap
- **Interconnect**
 - The group to hold XPU's together
 - On package (die to die)
 - UCIe, die to die, and have own proprietary Mlink for customers
 - On board (chip to chip)
 - SerDes (PCIe)
 - uLED - investing in new technology
 - Off board (board to board)
 - High speed SerDes (Ethernet)
 - NPC / CPC, including connector suppliers and EMS as part of ecosystem
 - And investing in Co-package optics - have an investment with Ayar lab for example

- **Capability of improving compute perf/w**
 - 1st wave of TSMC's latest node (N2v in 2026 and A14 test chip in mid 2026)
 - DTCO (design tech co-optimization)
 - 10-15% improvement
 - Low voltage design for better perf/w
 - Adopting Low power transistors, etc.
- **Partnership**
 - TSMC
 - Capacity or access to AP - it's a differentiate for us
 - Now expanding partnership to advanced packaging (first DC CoWoS project in progress)
 - Have partnership with Intel as well
 - We are one of the few that has both TSMC and Intel partnerships
- **The rack**
 - E.g. NVDA - NVLink Fusion
 - Customer can develop XPU with us and integrate with rack level components from NVDA and get much better time to market
 - We provide ASIC template for XPU - customer throw their design - and we integrate it with Nvlink - and then use Ethernet or Infiniband to scale out
 - Few vendors can provide this end to end service
 - Key target: "next-tier" CSPs beyond top-4 hyperscalers (smaller engineering teams, faster new-gen cadence) – MTK + Nvidia partnership accelerates their custom silicon time to market
 - Ongoing research and development
 - Collaboration with MSFT on micro LED technology - AOC (active optical cable) powered by micro LED light source
- **Compute business**
 - Tablet, Chromebooks, and AI workstations
 - Just cross 1bn USD revenue if include CPUs that go into tablets (grew 80% yoy)
 - Strong interest in NV DGX spark
 - MTK Kompanio ultra SOC - the most advanced processor for Chromebook plus
 - Growing adoption by OEMs, m/s

- 8% in 2023
- 30% in 2025
- 50+% in 2026
- Will be the no.1 supplier in Chromebook
- AI compute
 - Will be empowering Googlebook
 - NV DGX - Running Nemoclaw on DGX spark - helps enterprises contain GenAI token costs on-premise
- **IoT business**
 - See opportunity for over 35% CAGR
 - Strong base in China and now growing 5x in US/EU, and will get into Japan very shortly
 - Partners: solution partners including NVDA
 - Will be one of the future bn dollar business for us

Mike Chang, MTK VP, GM of automotive platform

- **MTK dimensity AX**
 - Cockpit platform
 - C series
 - Work with NVDA with compute die from MTK and GPU die from NVDA - use interconnect tech in AI and use CoWoS
 - S series
 - Dimensity AI development kit
 - Dual AI engine cockpit
 - Can experience the TOPS needed
 - Connect platform
 - Telematics
 - WiFi
 - Bluetooth
 - Need to connect to cloud, and in car devices
 - Components
 - PMIC, GNSS, DDIC, ISP, etc.
- **AX cockpit flagship platform**

- First cockpit with built-in NV GPU
- Support CUDA, and AAA games
- **AX connect platform**
 - NR-NTN
 - MTK proving the world's first NR-NTN
 - 5G-A R18
 - 5G advanced technology
 - 3Tx uplink speed and provide dual SIM dual active (DSDA)
 - And telematic platform
 - WiFi-8
 - For device connectivity
 - More reliable, stable, high speed
 - Bluetooth
 - MTK is the first to provide integration of WiFi and 2 Bluetooth in a single chip
- **Products and partners**
 - 20+ partnership of leading auto makers and 190+ more projects
 - 35M+ chips in the mkt with MTK chip already
- **AIDV (AI-defined vehicles)**
 - SDV (software-defined vehicles) > AIDV (AI-defined vehicles)
 - Multimodal experience - beyond voice input (sight, sounds, emotions, health, environment sensing, etc.)
 - Proactive service - no longer passive, always on sensing, anticipates your needs
 - Executes tasks concurrently
 - Edge to cloud integration - beyond local compute, seamless edge to cloud integration
- **End to end solution**
 - Not just SoC
 - Application layer: MDAP (MTK Dimensity application platform)
 - Model layers: Dimensity AI development Kit
 - Quickly implement new models
 - Platform layers: dimensity AX platform

- **AIDV platform - computing is the key**
 - Refill and decode
 - Prefill need more TOPs - so we provide 400 TOPs
 - Decode - reduce up to 90% of the bandwidth requirement
- **Connectivity**
 - Ground to space connection - world's first telematics chip with 3GPP NR-NTN support
 - Full coverage - seamless TN/NTN switching
 - Immediate assistance
 - Streaming data - broadband data streaming
 - 24/7 back up for OTA upgrades
 - WiFi with 2 Bluetooth
 - WiFi 8 2x data throughput
 - 25% lower networking lag
 - 50% less power consumption
- **2nm SoC for cockpit coming very soon**

Panel discussion

- **Strong smartphone performance**
 - Result from our early deployment of the 5G and expansion in flagships
 - 2nm flagship SoC coming in Q3
- **Samsung and MTK**
 - Have long collaboration business starting from TV, optical storage - more than 20, or even 25Y history
 - And expanding TV, smart device, tablet (Samsung galaxy tablet) and smartphone as well
- **WiFi 8**
 - WiFi 6/7 to 8 - MTK continuously pursuing leading position
 - Have confidence to say WiFi is at forefront stage
 - Our WiFi 8 silicon demonstrated in CES show and upcoming Computex - probably early adoption launch in next year.
 - Certification will end in 2028 so 2028 is the time WiFi 8 starts to boom

- **Rack level solutions**
 - We're not announcing rack level product, and we don't have rack-level solution
 - Just that we're providing xPU, and adjacent components - retimer for example, and cable (to solve cable problem in between component and the rack)
 - It's about leveraging NV rack solutions and make sure we work better with NV and when there's next tier CSP rushing to mkt solutions, we can make that faster
- **From edge to cloud**
 - Identify a good and core technology is the key
 - Cloud
 - Compute part, memory part, connection part
 - Without good connectivity, data can't be sent to compute part - continue investing in SiPh
 - Memory - think customize HBM will be important for DC
 - Edge
 - Will put a very power important NPU inside the edge
 - Another part important is the sensing technology
- **Resource allocation from edge to cloud**
 - If over simplify it, it's compute and communication
 - Computing, or say AI processing (turning electronic to token)
 - User cases - will be switching between edge and cloud as well
- **Synergy**
 - To leverage smartphone tech/ IP to diff product lines
 - Esp. advanced process node (as smartphone has been always on the most leading edge), and communication technology (WiFi integrated solution, Modem for cars, etc.)
- **Higher ASP for next gen?**
 - Bigger reticle size, higher TCO, etc. - with all of this combined, there is no way selling lower ASP products
 - Will be the new norm - pushing everything to the limit, even JEDEC - unlike consumer products asking for slight improvements in performance every year but lower ASP
- **Auto partnership in China, JP, EU, and US?**
 - While unit growth in smartphone and auto not increasing meaningfully - we

expand on higher silicon content

- Tech development in auto can be used in other physical products in the future
- Good progress in China, given their design cycle is much shorter, but we also have good design wins in EU and US
- Also work with JP - Denso - co-design the next gen ADAS system - good cooperation with MTK tech in AI etc. while Denso good at reliability
- Silicon content per vehicle growing ~15-20% per year even as unit volumes are flat
- **TSMC relationship**
 - TSMC is an important partner - from 12nm to 6/7/5/3/2/14A - we're all working closely with TSMC
 - DTCO - upscale to STCO (system technology co-optimization) - all working with TSMC
 - Now enlarging partnership to advanced packaging
- **AI momentum**
 - All these happens fast in DC, then mobile, and later to auto
 - Next year 3bn dollar opportunity
- **AI in edge and challenges**
 - Now already many killer applications, but challenges still some tech need to be overcome for enhancing user experience
 - One is the extreme low power consumption - e.g. for AI glass
 - Extremely small form factor - more stylish
 - AI features to sense the environment proactively
- **AI challenges**
 - Technology - everything is pushed to its physical limits
 - Supply chain - gives us an advantage - being in Taiwan
 - Engineering resource - TAM expanding to 1tn next year, 1.2-1.5tn in 2028 - even with same share MTK is continue growing. But hiring the right person is still key to driving growth

Investment Thesis, Valuation and Risks

MediaTek Inc. *(Overweight; Price Target: NT\$5,300.00)*

Investment Thesis

We are Overweight on MediaTek, given (1) MediaTek's v9 TPU project (Humufish) appearing to emerge as the primary v9 family in 2028-29, (2) MediaTek's smoother execution with v9 positioning it well to maintain its leadership in v10 competition, and (3) solid prospects in datacenter solutions, ranging from XPUs to interconnect solutions, custom HBM and full-rack level enablement, with strong engagement for new XPU projects from most hyperscalers. Key catalysts from here on, in our view, are (1) indications of a larger role with TPU v9 if EMIB-T packaging execution goes on track, (2) the announcement of new customers before the end of the year – we believe Meta, Tesla are key potential customers, (3) the expansion of the datacenter TAM to include interconnect solutions and rack-level implementation beyond the top 4 CSPs.

Valuation

Our Jun-27 PT of NT\$5300 is based on a SoTP valuation (12x 12M fwd core earnings + 40x 12M fwd ASIC-related earnings, reflecting stronger growth in 2028-29 for v9 Humufish), reflecting stronger growth in 2028 for TPU v9 Humufish after our checks reveal recent changes in product planning from the end customer.

Risks to Rating and Price Target

Key downside risks include: (1) further pressure on Smartphone SoC GMs due to cost escalations and increased competition; and (2) slower progress on the NVDA partnership, given NVDA's expanded engagement with Intel and other chip makers.

MediaTek Inc.: Summary of Financials

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to MediaTek Inc. or related entities.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: MediaTek Inc. or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: MediaTek Inc. or related entities.
- **Client/Non-Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-securities-related: MediaTek Inc. or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from MediaTek Inc. or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from MediaTek Inc. or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of MediaTek Inc. or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

MediaTek Inc. (2454.TW, 2454 TT) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Jul 22, 2001. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Hariharan, Gokul : ASE Technology Holding Co Ltd (3711.TW), ASMPT Ltd (0522) (0522.HK), Alchip Technologies (3661.TW), Chipbond Technology (6147.TWO), GDS Holdings (GDS), GUC (3443.TW), Hon Hai Precision (2317.TW), MediaTek Inc. (2454.TW), Novatek Microelectronics Corp. (3034.TW), Powerchip Semiconductor Manufacturing Corp. (6770.TWO), SMIC (0981) (0981.HK), Silicon Motion (SIMO), TSMC (2330.TW), UMC (2303.TW), Vanguard International Semiconductor Corp. (5347.TWO), Xiaomi (1810) (1810.HK)

J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	83%	79%	74%
JPMS Equity Research Coverage*	49%	39%	13%
IB clients**	94%	93%	85%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Markets Limited ("JPMML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such

opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
