Our thoughts on the China AI GPU foundry opportunity; keep OW

The China AI GPU foundry opportunity, if any, would present upside to our TSMC forecasts. But we do not plan to put into our base case forecasts until US and China policy both confirm this business development. Reiterate TSMC as Top Pick.

What's new? After our recent Asia field trip, investors are asking two questions about TSMC's opportunity to serve China's AI accelerators market: 1) Is recent news about the US administration's consideration for allowing H200 also a bid to improve trade ties with China ([link](#))? 2) Can TSMC serve China's AI chip design companies if the design is focused on inference (see Reuters: [Exclusive: Chinese AI chip firms downgrading designs to secure TSMC production](#))?

First off, what has TSMC been saying about its AI and China opportunities? In its recent [3Q25 earnings call](#), management stated that, "although there could be some restriction on foreign AI GPUs from servicing China's AI market, [we are] confident that a 5-year CAGR can be mid-40% or higher, even if opportunities from China are limited". We therefore think if TSMC can serve more China AI semi demand, there could be additional upside to our TSMC forecasts.

Our recent supply chain checks and our thoughts: In our recent AI supply chain field trip report ([link](#)), we see NVIDIA B40 production tracking below forecast. This could reflect that the B40's price performance is not that attractive for Chinese customers. Our field trip feedback suggests that China's AI inference computing still depends largely on 5090 gaming graphics chips, previously improved Hopper chips, and some local chips. In Taiwan's AI semi supply chain, we do see ongoing production of Hopper chips (which can be repurposed for H200 or H20). On Chinese local chips, we have seen some Chinese chip design houses, such as Enflame, designing lower performance AI inference chips by using TSMC's 6nm/7nm. Our memory supply chain also suggests that Chinese AI inference chips can use LPDDR instead of HBM, and hence it can focus on inference demand.

What could it mean to our China Foundry coverage? In our [Greater China Semiconductors: China Foundry: Upgrade SMIC to OW on Strong Domestic AI GPU Demand \(21 Oct 2025\)](#), we presented a scenario analysis on China local GPU demand: if Chinese CSPs were allowed to adopt some US designed chips, or Chinese locally designed chips based on TSMC's technology, it would reduce some local foundry demand. But between SMIC (OW) and Hua Hong (UW), we would still prefer SMIC. We believe if foundry localization demand is diluted, it would impact Hua Hong's affiliated company HLMC's 7nm business first.

Scenario Analysis of China AI GPU Demand – Driven by AI Applications x Import Policy

Our scenario analysis on China's domestic AI GPU demand

Below content is from Greater China Semiconductors: China Foundry: Upgrade SMIC to OW on Strong Domestic AI GPU Demand (21 Oct 2025).

Our updated China AI GPU revenue base case relies on two key assumptions:

- 1. Chinese government ban on purchasing lower-performance NVIDIA AI processors remains in force ([link](#)).
- 2. Domestic AI compute demand remains structurally robust, with the supply gap now filled by local vendors, such as Huawei, Cambricon, etc.

Therefore, for our base case, we lift our 2026-27 China AI GPU revenue forecasts to Rmb113bn and Rmb180bn, respectively, from Rmb94bn and Rmb136bn.

Our bull case assumes Chinese CSPs cannot purchase NVIDIA or AMD chips, even for overseas data centers, while domestic AI computing demand remains strong.

In the bear case, we assume Chinese CSPs are permitted by both the US and Chinese governments to import foreign AI chips, and are willing to use NVIDIA or AMD products. There could also be more efficient GPU utilization by Chinese AI LLM developers (e.g., Alibaba Cloud claimed that it can cut NVIDIA GPU use by 82% with a new computing pool solution ([link](#))), tempering demand and, by extension, China advanced node foundry loadings.

Valuation Methodology and Risks

SMIC (0981.HK)

Base case, residual income model. Key assumptions: cost of equity 8.6% (beta 1.2, risk-free rate 2% and risk premium 5.5%), intermediate growth rate 16%, terminal growth rate 5% and cash dividend payout ratio 80% (was 83%).

Risks to Upside

- Global and Chinese semi demand strengthens.
- Pricing competition eases, helping margins.
- Technological breakthroughs come faster than expected, shortening transition period.
- Utilization rate, product mix and ASP are better than expected.

Risks to Downside

- Global and Chinese semi demand weakens.
- Pricing competition intensifies, eroding margins.
- Utilization rate, product mix and ASP trend are worse than expected.

Hua Hong Semiconductor Ltd (1347.HK)

Base case, residual income (RI) analysis. Our RI model is based on the following assumptions: cost of equity of 9.2% (2.0% risk-free rate, 6% risk premium and 1.20 beta), 15.5% medium-term growth rate and 5.0% terminal growth rate.

Risks to Upside

- Fab utilization and wafer ASP are healthier than expected.
- Local customers gain share faster, continue to work with Hua Hong.
- Electric vehicle penetration is faster.

Risks to Downside

- Potential price hike does not materialize.
- Other Chinese players build 8-inch capacity aggressively.
- Applications migrate to 12-inch faster than expected.
- Wuxi fab scales up slowly or struggles to get new customers.

TSMC (2330.TW)

Base case, residual income model. Key assumptions: a cost of equity of 9.2% (beta of 1.2, risk-free rate of 2.0% and risk premium of 6.0%), an intermediate growth rate of 10.5%, and a terminal growth rate of 4.0%.

Risks to Upside

- TSMC charges large customers more to keep its gross margin above 53% in the long term.
- AI semi demand grows more significantly than expected, while TSMC maintains high market share in leading edge foundry business.
- Outsourcing from Intel CPU increases in 2025-27.

Risks to Downside

- Inventory correction into 4Q25.
- Demand for leading edge technologies weakens.
- Costs of overseas fabs grow significantly.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of November 30, 2025)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below. Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
