

Datadog

AI innovations look useful

Key Points

- We attended the DASH user conference in NYC. Customers and partners were enthusiastic about the usefulness of DDOG's AI innovations.
 - DDOG announced new Bits AI capabilities for autonomous operations, development, and security, as well as new capabilities for securing the AI stack.
 - We maintain our Outperform rating but may look for pullbacks to accumulate more aggressively.
-
- At its DASH conference this week, DDOG expanded on last year's introduction of AI agents and LLM observability to now span the DevOps lifecycle more broadly and extend into security further. The company is focused on enabling autonomy across development, operations, and security workflows as AI-driven productivity gains are driving a significant increase in complexity.
 - Bits AI was a key focus, with new capabilities designed to accelerate the operations loop from detection and investigation through to remediation, while also expanding the development loop across coding, delivery, and evaluation (i.e., "AI for Datadog"), reducing manual effort and accelerating time-to-resolution. New AI capabilities for detection, memories, release, and testing are in preview mode and not yet priced.
 - Also, DDOG introduced broader platform enhancements and expanded capabilities for customers' AI stack (i.e., "Datadog for AI"), including new observability and control layers spanning infrastructure, data, models, and agents. Also, new security capabilities are aimed at protecting AI agents, prioritizing vulnerabilities, and defending against AI-scale threats.
 - With the run-up in DDOG shares since May 1 (+72% vs. +4% for the QQQ), DDOG is now trading at a 25% premium to our predicted "Rule of X" EV/NTM revenue multiple. We think continued outperformance by DDOG can continue to re-rate shares higher over the next 12 months, but we may look for pullbacks to accumulate more aggressively.

Earnings changes: No change.

Valuation: We maintain our TP of \$230; see Figure 6.

Catalysts: 2Q earnings results expected in early August.

Investment Thesis and Recommendation

We reiterate Outperform. We like DDOG's positive market dynamics, share gain prospects, stable revenue model, integral AI positioning, multi-product adoption, and strong FCF generation.

Keynote Recap

CEO Olivier Pomet opened the keynote by underscoring that AI is driving a significant increase in developer productivity but also accelerating complexity beyond human-scale management and expanding the attack surface for malicious actors. Against this backdrop, DDOG’s mission is focused on enabling autonomy across development, operations, and security workflows, positioning customers to manage and ultimately win the race against rising complexity.

CTO Alexis Lê-Quôc spoke about “AI for Datadog,” outlining how Bits AI is evolving from a set of domain-specific agents (spanning SRE investigation, code assistance, and security investigation) introduced at last year’s DASH into a more autonomous platform across the full DevOps lifecycle, with a series of new product announcements at this year’s event. DDOG highlighted a broad expansion of Bits AI to accelerate the operations loop, from detection and investigation through to remediation (see Figure 1), while also extending automation into the development loop (see Figure 2), spanning coding, delivery, and evaluation. In addition, the company introduced enhancements across the broader Datadog platform (see Figure 3), including Network Monitoring, Database Operations, Logs, and Digital Experience Monitoring. Bits AI is designed to accelerate both the development and operations loops, enabling teams to move faster from development to production and from idea to outcome and to manage increasing complexity.

Figure 1 - DDOG: Major product announcements in Operations

Category	Product	Availability	Description
Bits for SRE	Bits Detection	Preview	Identify system health issues and highlight when they matter as environments evolve.
Bits for SRE	Bits Memories	Preview	Retain key operational insights and automatically identify and store important details for future use.
Bits for SRE	Bits Remediation	Preview	Execute remediation actions across services and infrastructure while following pre-defined guardrails.
Bits for SRE	Bits Infrastructure Operations	Preview	Detect, investigate, and remediate recurring infrastructure issues while flagging risky changes in pull requests.
Bits for SRE	Bits Guardrails	Preview	Fix issues within defined guardrails, enabling teams to start with approval-based workflows and expand autonomy over time.

Source: Company Presentation, June 2026

Figure 2 - DDOG: Major product announcements in Development

Category	Product	Availability	Description
Bits for Developers	Bits Release	Preview	Track and validate changes from pull requests to production.
Bits for Developers	Bits Testing	Preview	Automate synthetic test generation and maintenance.
Bits for Developers	Bits Code	Generally Available	Generate code fixes as a platform-wide coding agent.

Source: Company Presentation, June 2026

Figure 3 - DDOG: Major product announcements across the Datadog platform

Category	Product	Availability	Description
Infrastructure Monitoring	Network Monitoring	Generally Available	Unify network visibility across clouds, applications, and devices.
Network Monitoring	Network Path Comparison View	Generally Available	Compare routing paths side by side to analyze how traffic flows differ.
Network Monitoring	Network Remediation with Bits	Preview	Summarize the evidence and recommended next steps.
Network Monitoring	Network Configuration Management	Generally Available	Automatically correlate device performance degradation to the exact configuration change that caused it.
Network Monitoring	L7 to L1: APM Trace to Networks	Preview	Trace from the application layer through the network flows to pinpoint problems down to the exact infrastructure hop or device.
Database Monitoring	Bits Database Optimization	Generally Available	Detect underperforming queries, identify optimizations via simulated environment, and deliver fixes.
Log Management	Federated Logs	Preview	Query external data stores from the Log Explorer using consistent syntax and facets.
Log Management	BYOC Logs	Now Available	Run logs within the user's own infrastructure while maintaining full integration with the Datadog platform.
Digital Experience Monitoring	Journey Monitoring	Preview	Track the health of critical user flows (such as login, checkout, or streaming) from a single unified view.

CPO Yanbing Li discussed “Datadog for AI,” focusing on three core challenges as agentic AI workloads move from prototype to production: ensuring reliability, maintaining safety and security, and scaling cost-effectively. She asserted that organizations must observe and secure the full AI stack—from infrastructure and data to models and agents. To address these challenges, DDOG introduced new capabilities (see Figure 4) across the data layer (including Data Observability and Data Analysis) and the model/agent layer (including Agent Console, Agent Observability, Patterns, and Bits Evals).

Figure 4 - DDOG: Major product announcements in the AI stack

Category	Product	Availability	Description
Agent/Model	Agent Console	Preview	Provide centralized monitoring for AI agents by collecting logs and metrics and surfacing real-time visibility into usage, cost, latency, productivity impact, and emerging issues.
	Agent Observability	Generally Available	Monitor, troubleshoot, and evaluate LLM applications to identify root causes, track performance, and assess quality, privacy, and safety.
	Patterns	Preview	Cluster production LLM interactions into behavioral patterns to surface operational and quality signals, enabling rapid identification of regressions, cost drivers, and failure modes.
	Bits Evals	Preview	Handle repetitive agent development tasks, analyze full-context performance data, generate and validate hypotheses across traces and datasets, and surface actionable fixes while maintain engineer control.
Data	Data Observability	Generally Available	Improve data reliability for analytics and AI applications while optimize performance and cost of data pipelines.
	Bits Data Analysis	Preview	Analyze business data through natural language by answering questions and enabling intuitive data exploration.
Infrastructure	GPU Monitoring	Generally Available	Provide centralized visibility into GPU fleet health, cost, and performance to optimize provisioning, improve workload efficiency, and reduce idle resource spend.

Source: Company Presentation, June 2026

VP of Security Product Tim Knudsen extended the discussion to security, highlighting three emerging challenges—securing AI agents, prioritizing an expanding vulnerability backlog, and defending against AI-scale attacks—and introduced three corresponding solutions, including AI Guard for AI Agents, a Runtime Prioritization Engine, and Bits AI for Security (see Figure 5).

Ms. Li concluded the keynote by tying together two core themes: “AI for Datadog,” which leverages AI to automate development, operations, and security workflows, and “Datadog for AI,” which provides the observability and protection required to build and operate AI applications at scale.

Figure 5 - DDOG: Major product announcements in Security

Category	Product	Availability	Description
AI Guard	AI Guard for Custom Agents	Now Available	Secure custom AI agents by detecting prompt injection, tool misuse, and data exfiltration, discovering unprotected agents, analyzing behavior, and blocking attacks in real time with inline guardrails.
	AI Guard for Coding Agents	Preview	Secure coding agents in developer workflows by detecting and blocking prompt injection, backdoor attacks, and other threats with real-time inline guardrails.
Cloud Security	Runtime Prioritization Engine	Preview	Identify and prioritize the highest-risk vulnerabilities by combining runtime behavior, exploitability, exposure, and business context from observability and security data.
Bits for Security	Bits Security Analyst	Generally Available	Investigate and triage security alerts autonomously, generate actionable reports, and enable SOC teams to focus on high-priority threats while reduce time spent on false positives.
	Bits Threat Hunting	Preview	Run hypothesis-driven threat hunts across telemetry data to assess exposure to attacker behaviors, surface impacted assets and indicators of compromise, and recommend or deploy new detection rules.
Code Security	AI-native SAST	Preview	Detect code vulnerabilities in pre-production through LLM-based analysis to identify security and quality issues.
APP and API Protection	API testing for AAP	Preview	Continuously validate endpoints against API risks, surfacing vulnerabilities and misconfigurations and converting API inventory into actionable findings for faster remediation.

Valuation

Our 12-month target price of \$230 is an average of our EV/revenue, EV/FCF, and DCF approaches (refer to Figure 6 for detailed calculations). We apply a 15.0x EV/revenue multiple to our CY27E revenue estimate of \$14.32 per share and add \$12.44 per share in CY27E starting net cash to produce a \$227 valuation. Additionally, we apply a 60.0x EV/FCF multiple to our CY27E FCF estimate of \$3.72 per share and add \$12.44 per share in CY27E starting net cash to produce a \$235 valuation. Our long-term DCF valuation of \$227 is based on a WACC of 11.8%, a beta of 1.5, and a terminal EV/FCF multiple of 25.0x in CY35E.

DDOG is trading above its 24-month average premium to our Macquarie Growth Software Index on a NTM EV/revenue basis (16.3x vs. 7.0x, or a 133% premium vs. a 24-month average premium of 39%); see Figures 7-8. DDOG's 16.3x NTM EV/revenue is 25% above the predicted multiple (13.1x) based on the multiple linear regression of EV/revenue to NTM revenue growth and NTM FCF margin ("Rule of X") on our growth software index (Figure 9). On an EV/FCF basis (Figure 11), DDOG is trading above our growth software index on CY26E (70.0x vs. 18.5x), CY27E (55.5x vs. 15.5x), and CY28E (44.3x vs. 13.1x).

Key Risks to Investment Thesis

Upside catalysts include the following:

- Continued growth through deeper penetration of high-value customer contracts and vendor consolidation;
- Effective cross-selling and up-selling motions;
- An uptick in cloud spending and the continued migration of workloads to the cloud;
- Outperformance in revenue growth, margin expansion, and cash flow generation.

Downside risks include the following:

- Intensified competition;
- Risks of service disruptions, cybersecurity incidents, performance degradation, or outages;
- Challenges in penetrating new markets;
- Negative shifts in the economic, political, regulatory, or market environments;
- Non-compliance with laws, regulations, rules, and standards;
- Failure to meet elevated expectations due to operational hiccups.

Company Description

Datadog was founded in 2010 to provide one of the first cloud monitoring solutions. The company then pioneered the observability category, which amalgamated metrics, logs, and traces for full cloud-stack management. The Datadog platform's data collection, monitoring, and troubleshooting capabilities enable developers, operations, and security teams to view, analyze, and troubleshoot the operational status of their cloud infrastructure and applications all in one place, supporting collaborative problem-solving in complex cloud environments.

Key Quant Findings

The quant model currently holds a marginally positive view on Datadog. The strongest style exposure is Growth, indicating this stock has good historic and/or forecast growth. Growth metrics focus on both top and bottom line items. The weakest style exposure is Earnings Momentum, indicating this stock has received earnings downgrades and is not well liked by sell side analysts.

Macquarie Alpha Model: Key rankings

The Macquarie Quant’s flagship Alpha model is a dynamic multi-factor model based on a staple of quant factors such as value, momentum, revisions, quality, and risk.

	Global	Market (Country)	Sector
	Whole Universe	United States	Software & Services
Macquarie Alpha Model	5803/17988	1201/3102	182/794
Fundamental (Consensus) *	3295/17988	501/3102	154/794

* based on Total Shareholder Return = Consensus Price target / Current Price

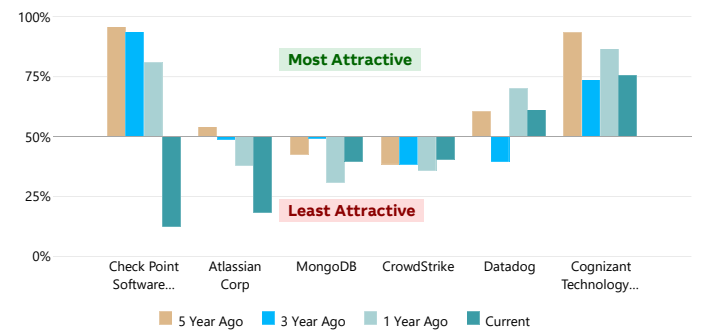

Alpha Model Decomposition

The Macquarie Alpha is decomposed into its sector and market relative factor & styles exposures (a higher/better percentile is coded in green, whilst lower in red).

Factors / Styles	Percentile relative to		Core factors in definition
	sectors (/794)	market (/3102)	
ALPHA	77%	61%	Built from the styles below
VALUE	50%	24%	Book, CF, Yield, Earnings Multiples
ANALYST	46%	31%	Revisions (Earnings, Recommendations)
MOMENTUM	72%	78%	Price Momentum
GROWTH	95%	98%	EPS, Sales (Forecast, Historic)
PROFITABILITY	82%	95%	ROE, Margin, Asset Turnover
QUALITY	61%	82%	Accruals, Earn Stability, Cash Conversion
CAPITAL	39%	30%	Investment/Capex, Net share issuance
LIQUIDITY	44%	94%	Size, Turnover, Analyst Coverage
LOW RISK	55%	58%	Beta, Volatility, Earn.Cert, Leverage
TECHNICAL	23%	23%	MACD, RSI, Bollinger, Williams R, etc

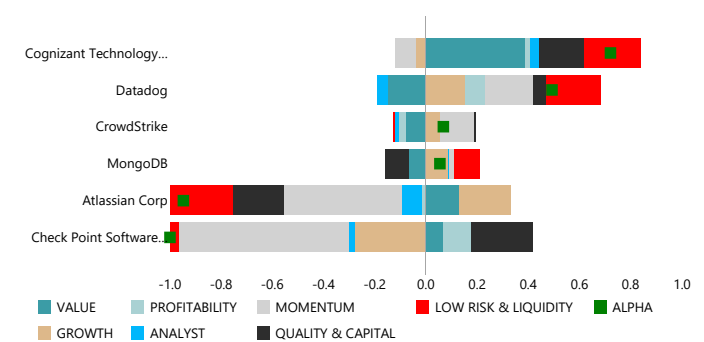

Current and Historical Alpha Model Rank

The chart shows the Macquarie Alpha model market ranking against the company’s peers and over recent history.

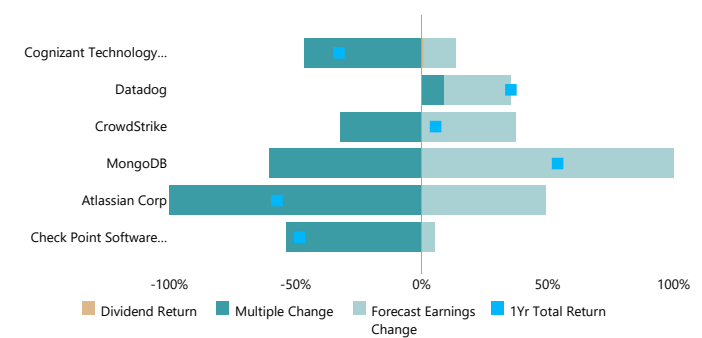

Factors driving the Alpha Model vs peers

For the comparable firms this chart shows the key underlying styles and their contribution to the current overall raw Alpha score.

Drivers of Stock Return

Breakdown of 1-year total return (local currency) into returns from dividends, changes in forward earnings estimates and the resulting change in earnings multiple.

Sensitivity analysis:

Clients receiving this report can request access to a model which allows for further in-depth analysis of the assumptions used, and recommendations made, by the author relating to the subject companies covered. Contact <https://www.macquarieinsights.com/contacts> for access requests.

Analyst Certification

We hereby certify that all the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. The views were reached independently, without any attempt of influence from anyone outside of Macquarie's Research business. Any and all opinions expressed have a reasonable basis, which are the result of the exercise of due care and skill. We confirm we (the authors), our team, and our associates do not hold securities in our sector of coverage, except for holdings disclosed to Research Compliance where we have received approval to hold temporarily until we are able to dispose of the holdings, and confirm the presence of disclosure language on this research which relates to this personal holding. To the best of our knowledge, we are not in receipt of, nor have included in this report, information considered to be inside information at the time of publication. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report. We acknowledge that the Analysts responsible for preparing this report receive compensation from Macquarie that is based upon various factors including Macquarie Group Ltd.'s overall revenues, a portion of which are generated by Macquarie Group's Investment Banking activities.

General disclaimers:

Other than Macquarie Bank Limited ABN 46 008 583 542 ("MBL"), any Macquarie Group entity noted is not an authorized deposit-taking institution for the purposes of the Banking Act 1959 (Commonwealth of Australia), and that entity's obligations do not represent deposits or other liabilities of MBL. Any investments are subject to investment risk including possible delays in repayment and loss of income and principal invested. MBL does not guarantee or otherwise provide assurance in respect of the obligations of that entity. This research has been prepared for the general use of the wholesale clients of the Macquarie Group and must not be copied, either in whole or in part, or distributed to any other person. You are permitted to store, display, analyze, modify, reformat, and print the information made available to you in the research only for your own use. You may not resell or reverse engineer this information to calculate or develop any index for disclosure and/or marketing or create any other derivative works or commercial product(s), data or offering(s) without the express written consent of the Macquarie Group. You are not permitted to publish, transmit, or otherwise reproduce this information, in whole or in part, in any format to any third party without the express written consent of the Macquarie Group. This foregoing restriction includes, without limitation, using, extracting, downloading or retrieving this information, in whole or in part, to train or finetune a machine learning or artificial intelligence system, or to provide or reproduce this information, in whole or in part, as a data source, prompt or input to any such system. If you are not the intended recipient you must not use or disclose the information in this research in any way. If you received it in error, please tell us immediately by return e-mail and delete the document. We do not guarantee the integrity of any e-mails or attached files and are not responsible for any changes made to them by any other person. MGL has established and implemented a conflicts policy at group level (which may be revised and updated from time to time) (the "Conflicts Policy") pursuant to regulatory requirements which sets out how we must seek to identify and manage all material conflicts of interest. Nothing in this research shall be construed as a solicitation to buy or sell any security or product, or to engage in or refrain from engaging in any transaction. In preparing this research, we did not take into account your investment objectives, financial situation or particular needs. Macquarie salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions which are contrary to the opinions expressed in this research. Macquarie Research produces a variety of research products including, but not limited to, fundamental

analysis, macro-economic analysis, quantitative analysis, and trade ideas. Recommendations contained in one type of research product may differ from recommendations contained in other types of research, whether as a result of differing time horizons, methodologies, or otherwise. Before making an investment decision on the basis of this research, you need to consider, with or without the assistance of an adviser, whether the advice is appropriate in light of your particular investment needs, objectives and financial circumstances. There are risks involved in securities trading. The price of securities can and does fluctuate, and an individual security may even become valueless. International investors are reminded of the additional risks inherent in international investments, such as currency fluctuations and international stock market or economic conditions, which may adversely affect the value of the investment. This research is based on information obtained from sources believed to be reliable but we do not make any representation or warranty that it is accurate, complete or up to date. We accept no obligation to correct or update the information or opinions in it. Opinions expressed are subject to change without notice. No member of the Macquarie Group accepts any liability whatsoever for any direct, indirect, consequential or other loss arising from any use of this research and/or further communication in relation to this research. Clients should contact analysts at, and execute transactions through, a Macquarie Group entity in their home jurisdiction unless governing law permits otherwise. The date and timestamp for above share price and market cap is the closed price of the price date. #CLOSE is the final price at which the security is traded in the relevant exchange on the date indicated. Members of the Macro Strategy team are Sales & Trading personnel who provide desk commentary that is not a product of the Macquarie Research department or subject to FINRA Rule 2241 or any other regulation regarding independence in the provision of equity research.

MSCI disclaimers:
