WHAT'S CHANGED

WinWay Technology Co Ltd (6515.TW)	From	To
Price Target	NT\$15,000.00	NT\$12,000.00
MPI Corporation (6223.TWO)		
Price Target	NT\$7,500.00	NT\$8,000.00

Investor focus is shifting from price-hike beneficiaries to multi-year spec-upgrade plays. In semiconductors, testing equipment/consumables should benefit most from larger AI chip packages and longer testing times. We remain OW on MPI and Winway.

MPI – We expect 25-30% 3Q revenue growth Q/Q; CPO insertion test progress going well: MPI reported strong 2Q preliminary revenue up 33% Q/Q, 6% above MSe and 7% above the Street, mainly helped by strong ramp-up in Trainium 3 and Google TPU, with additional contributions from networking and DDIC. We expect strong AI demand to sustain this momentum. We see a [price hike across all product lines](#) driving 3Q revenue, with margin reaching ~60% amid relatively less CPC exposure. Our checks indicate that none of MPI's equipment has been disqualified in the insertion test flow, with insertion 3 probe on track to ship in 4Q and insertion 2 likely to start in mid-27. MPI will host an on-site earnings call on August 14, with key focus on the MEMS probe pin capacity expansion plan, CPO progress and revenue targets, and key AI GPU/ASIC market shares.

Winway – 3Q revenue seen topping 20% Q/Q, with 2H margin likely to recover to 43-45%: Although 2Q preliminary revenue tracked in line with expectations, GM was likely below 40%, potentially from a higher smartphone (plastic socket) mix; we monitor demand from low-cost models, stronger MEMS probe card contributions, and writing off defective products during the new capacity ramp. As all new capacity comes online, We expect Winway to fulfill all backlog into year-end, with stable yield and a better product mix in sockets and probe cards stabilizing 2H GM at 43-45%. Winway plans to release earnings on 6 Aug after the market close.

Raising MPI PT to NT\$8,000, cutting Winway to NT\$12,000: We increase our MPI near-term estimates due to stronger CPC/MEMS demand and price-hike benefits that will likely be sustained into 2027. We expect the stock to trade at 50x 2027e EPS with an earnings CAGR of 112% for 2025-28, vs. 36x now. On the other hand, we cut our Winway estimates, and our medium-term growth rate assumption to 13.2% from 16.4%, to reflect unstable GM; our new PT implies 58x 2027e EPS (currently 30x).

2Q26 result and 3Q26 guidance

— In-line

— Largely unchanged

- 2Q26 revenue was broadly in line, but gross margin likely fell below 40%, reflecting a higher mix of lower-margin smartphone plastic sockets and ramp inefficiencies.
- 3Q26 revenue could rise more than 20% Q/Q, as new capacity comes online and the company works through its backlog into year-end.
- 2H26 gross margin should recover to 43–45%, helped by improving yields, a better socket mix and increasing MEMS probe-card contributions.
- 2026 OpM came in better-than-feared from better opex control

MPI Corporation 6223.TWO

2Q26 result and 3Q26 guidance

↑ Likely upside surprise

↑ Modest revision higher

- 2Q26 revenue beat expectations, rising 33% Q/Q and exceeding MSe by 6%, driven by Trainium 3, Google TPU, networking and DDIC demand, which likely to drive better 2Q result.
- 3Q26 revenue could grow 25–30% Q/Q, supported by broad-based price hikes, continued AI ASIC momentum and a richer MEMS probe-card mix.
- Gross margin may approach 60% in 3Q, as price increases take effect across product lines and exposure to lower-margin CPC products remains limited.
- CPO insertion-test progress remains on track: no equipment has been disqualified, insertion-3 prober shipments are expected in 4Q26 and insertion 2 in mid-2027.

*Likely impact to consensus EPS is for the next 12 months

Details of MPI Business Development

Capacity

With a view toward meeting strong demand from customers, MPI intends to further increase its capacity substantially into 2026-27, in particular for MEMS probe cards. Its plan was to expand its VPC capacity from 1.2mn pins per month to 1.5mn in 2Q26, and it expects a further increase to 2mn per month in 4Q26. For MEMS, the company plans to expand capacity from 2.0mn pins per month to 2.5mn in 2Q26 and 3.5mn in 4Q26, which should help it further expand share in that market. Looking to 2027, management expects MPI to expand total VPC and MEMS capacity by 60% to around 8.8mn pins per month, with MEMS expansion magnitude outpacing VPC. However, with more new facilities and land purchased recently, we do not rule out its MEMS capacity reaching 8-10mn pins per month, with our bull case extending beyond 10mn.

Order visibility and contract liabilities vs. revenue

Management said during the most recent earnings call said that it expects its B/B ratio for all product lines to stay above 1 during 2026. Currently, order visibility for MPI has stretched from one quarter (historical average) to nine months. Additionally, contract liabilities rose 44% QoQ and 58% YoY in 1Q26, reaching 59% of revenue, indicating aggressive pre-payments from customers and helping to solidify future revenue streams.

CPO Business Update

For insertion 1, MPI is targeting both probe card and prober solutions for EIC and PIC; given resource limitations, it will focus on insertion 2 and insertion 3 first, although insertion 1-related equipment has already been shipped to customers. The newly purchased Hukou fab will focus on CPO equipment production, especially in phase 1 expansion.

In addition, our checks indicate that none of MPI's equipment has been disqualified in the insertion test flow, with insertion 3 probe on track to ship in 4Q and insertion 2 likely to start in mid-27.

MPI: Estimate Revisions and Financials

We lift our EPS estimates, factoring in stronger-than-expected 2Q26 revenue and 2H26 guidance. We expect the ongoing ramp of AI ASIC such as Trainium and networking, strong momentum in traditional non-AI business such as DDIC, and newly gained non-AI ASIC customers to continue bear fruit in the near term. CPO equipment shipment should start shipping in 2H26, with the newly purchased fab targeting CPO equipment production helping to sustain growth momentum into 2027-28. The GM increase is seen driven mainly by more shipments of MEMS probe cards as well as the price hike conducted across probe card product lines starting 3Q26.

MPI: Valuation Methodology

We lift our price target from NT\$7,500 to NT\$8,000: This factors in our 2026-28 estimate increases and a slightly decrease in the payout ratio from 75% to 67% for R&D investment. Other key RI models are unchanged, including a cost of equity of 9.78% (risk-free rate 2.0% and risk premium 6.0%), intermediate growth rate of 16%, and terminal growth rate of 4.0%. Our price target implies P/Es of 52x 2027e and 27x 2028e P/E, and we see valuation continuing to improve along with rising earnings. Our bull and bear case scenario values rise from NT\$10,000 and NT\$4,000 to NT\$11,000 and NT\$5,000, respectively, implying 69x and 31x 2027e EPS.

Risk Reward – MPI Corporation (6223.TWO)

MEMS probe cards and CPO equipment to lead growth

PRICE TARGET NT\$8,000.00

We derive our price target from a residual income model, as we believe this can best capture the long-term value. We assume a 9.78% cost of equity (risk-free rate 2.0% and risk premium 6.0%), a payout ratio of 67%, a medium-term growth rate of 16.0%, and a terminal growth rate of 4.0%. Our price target implies 50x/25x 2027e/2028e P/E. We believe its valuation will continue to climb along with growing earnings.

OVERWEIGHT THESIS

- We rate MPI OW relative to our coverage because it combines leading probe card technology (VPC/MEMS) with strong exposure to rising pin density and CPO-related testing, positioning it to capture structural growth and share gains in advanced semiconductor testing. We expect MPI's revenue to grow at an 86% CAGR over 2025-28.
- MPI is among the top five global probe card suppliers and stands out as the only Taiwanese manufacturer capable of delivering a complete range of probe card solutions.
- Besides existing demand from R&D, we expect CPO-related testing equipment demand, including wafer-level and die-level testing, to be the key growth driver and account for 24% of 2028 total sales.

BULL CASE

NT\$11,000.00

69x 2027e EPS

We assume: 1) 100% revenue CAGR, 2025-28e, on stronger-than-expected adoption of MEMS probe cards, with robust market share gain momentum and more project wins in CPO development; 2) faster-than-expected CPO introduction; 3) gross margin improves to over 70%, thanks to scale effects and the company's technology competitiveness; and 4) >150% EPS CAGR, 2025-28e.

BASE CASE

NT\$8,000.00

50x 2027e EPS

We expect: 1) 86% revenue CAGR, 2025-28e, on stronger-than-expected adoption of MEMS probe cards, with robust market share gain momentum and more project wins in CPO development; 2) CPO-related revenue to bear fruit upon 1H27 introduction; 3) gross margin to reach 63.5% in 2028, thanks to scale effects and the company's technology competitiveness; and 4) 112% EPS CAGR, 2025-28e.

BEAR CASE

NT\$5,000.00

31x 2027e EPS

We assume: 1) 20% revenue CAGR, 2025-28e, on slower-than-expected adoption of MEMS probe cards, with robust market share gain momentum and no project wins in CPO development; 2) slower-than-expected CPO introduction; and 3) customer bargaining power pushes gross margin below 40%; and 4) 30% EPS CAGR, 2025-28e.

Winway: Estimate Revisions and Quarterly Financials

We cut our 2026 estimate but increase 2027 and 2028: We see strong revenue momentum outweighed by unstable GM impact, especially in 2026. However, we still expect the bottom line to see operating leverage as the company continues to scale its revenue.

Winway: Valuation Methodology

We cut our price target from NT\$15,000 to NT\$12,000, reflecting our estimate changes and a reduced intermediate growth rate from 16.4% to 13.2% due to unstable GM impact. Our RI parameters are unchanged, including 9.14% cost of equity (risk-free rate 2.0% and risk premium 5.5%), a payout ratio of 80%, and a terminal growth rate of 4.5%. We derive our price target from a residual income model, as we believe this can best capture long-term value. Our bull and bear case scenario values decline from NT\$18,000 and NT\$9,000 to NT\$14,400 and NT\$6,400, respectively, implying 69x and 31x 2027e EPS.

Risk Reward – WinWay Technology Co Ltd (6515.TW)

Leader in testing sockets, with hypersocket migration and probe card growth

PRICE TARGET NT\$12,000.00

We derive our price target from a residual income model, as we believe this can best capture long-term value. We assume a 9.14% cost of equity (risk-free rate 2.0% and risk premium 5.5%), a payout ratio of 80%, a medium-term growth rate of 13.2%, and a terminal growth rate of 4.5%.

OVERWEIGHT THESIS

- We rate the shares OW relative to our coverage because WinWay is a key beneficiary of increasing package complexity and pin counts in AI/HPC chips, driving sustained ASP and margin expansion through hypersocket adoption and growing SLT/burn-in demand.
- We expect more product migration to coaxial sockets for consumer tech products, and WinWay plans to expand its capacity aggressively with a view toward supporting strong customer demand.
- For probe cards, WinWay provides vertically integrated solutions, including probe cards and sockets to the major customer. MEMS expansion and partnership with Technoprobe is also on track, and benefits from higher pin count and spec migration as well.

BULL CASE

NT\$14,400.00

69x 2027e EPS

We assume: 1) 100% revenue CAGR, 2025-28e, on stronger-than-expected adoption of hypersockets and MEMS probe cards with robust market share gain momentum; 2) faster-than-expected SLT and burn-in socket introduction to its end-customers; 3) gross margin improves to over 70%, thanks to scale effects and the company's technology competitiveness; and 4) >150% EPS CAGR, 2025-28e.

BASE CASE

NT\$12,000.00

58x 2027e EPS

We expect: 1) 89% revenue CAGR, 2025-28e, on strong adoption of hypersockets and MEMS probe cards with higher pin counts and spec migration momentum; 2) continuous SLT and burn-in socket introduction to its end-customers; 3) gross margin reaches 50% in 2028e, thanks to better product mix, scale effects and the company's technology competitiveness; and 4) 111% EPS CAGR, 2025-28e.

BEAR CASE

NT\$6,400.00

31x 2027e EPS

We assume: 1) 30% revenue CAGR, 2025-28e, on slower-than-expected adoption of hypersockets and MEMS probe cards; 2) slower-than-expected SLT and burn-in socket introduction to its end-customers; 3) customer bargaining power pushes gross margin below 40%; and 4) 50% EPS CAGR, 2025-28e.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of July 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
